

# Divisional estimates

Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or on geographical regions.

The first row for each division gives the estimate of the relevant variable. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95% confidence interval for the estimate. For instance, in Agra division of Uttar Pradesh, in 2018, proportion of Std III-V children who can read Std II level text is 46.3%. With 95% probability, the true population proportion lies within 4.52% points of the estimate, i.e., between 50.8% and 41.8%.

## Uttar Pradesh

Division/Region	Not in school		Private school		Learning levels: All schools							
	% Children (Age 6-14) not enrolled in school		% Children (Age 6-14) enrolled in private school		Std III-V				Std VI-VIII			
	2016	2018	2016	2018	% Children who can read Std II level text		% Children who can at least do subtraction		% Children who can read Std II level text		% Children who can do division
