Young Children: Enrollment and Learning Status - Tripura

Analysis based on data from households. 4 out of 4 districts were surveyed in ASER 2018.

Early access to a supportive environment and exposure to developmentally appropriate activities can help children develop a solid foundation for future learning, both for school and for life. All major education policy and program documents in India now recognize this fact. However, recent ASER data shows major gaps between official norms and actual practice. These gaps are evident both when young children enter school and in what they are able to do in terms of foundational skills like reading and arithmetic. The gap between expectations and ground realities starts very early and needs to be addressed urgently. Once children fall behind, it is very difficult to catch up.

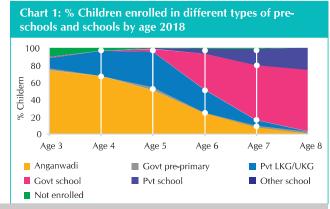

Age 3 to 8 years:

Where are young children enrolled?

Table 1: % Children enrolled in different types of pre-

Age 3 Age 4 67.4 0.0 29.1 0.0 0.0 0.0 3.5 100 Age 5 50.9 3.4 41.4 3.0 1.1 0.0 0.3 100 24.4 0.5 26.7 41.5 5.8 0.0 100 Age 6 1.1 Age 7 8.0 1.7 6.4 63.8 18.8 0.0 1.2 100 Age 8 0.9 2.0 0.3 71.3 25.6 0.0 0.0 100

This table shows the proportion of children enrolled in different types of pre-schools and schools by age. For example, at age 3, 73.9% children are enrolled in anganwadis, 2.4% in government pre-primary classes, 11.8% in private LKG/UKG, 0.6% in government schools, and 0.6% in private schools. 'Other' includes children going to any other type of institution. 10.6% children are not enrolled anywhere. Chart 1, a stacked area chart, is a visual representation of Table 1.

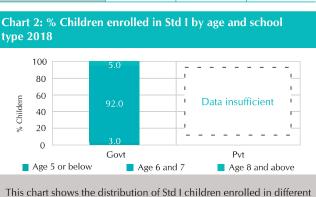

Key takeaways:

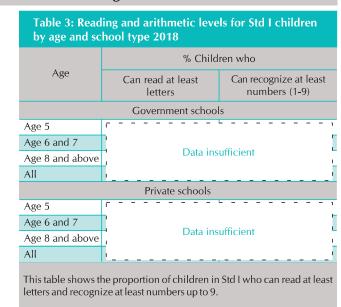

Children's pathways through pre-school and school do not always follow policy prescriptions or curriculum expectations.

- High enrollment in government institutions: At age 3 and 4, a significantly high proportion of children are enrolled in anganwadis (73.9% at age 3, 67.4% at age 4). This trend continues for older age groups. Government school enrollment continues to be considerably higher than private school enrollment. For example, 63.8% of age 7 children attend government schools and 18.8% attend private schools. (Table 1)
- Children enter Std I at age 6: In Tripura, majority of children under the age of 6 are enrolled in pre-schools. It is only at age 6 or later that they enter school. Almost all children enrolled in Std I in Tripura are either 6 or 7 years old. (Table 1 and Chart 2)

Can young children read letters and recognize numbers?

enrolled in	80.5	19.5	100	

types of schools by age.

Young Children: Enrollment and Learning Status by Sex – Tripura

Analysis based on data from households. 4 out of 4 districts were surveyed in ASER 2018.

Age 4 to 8 years:

Where are young boys and girls enrolled?

Table 4: % Children age 4-8 enrolled in Govt pre-schools/ schools by sex 2018						
Age	Enrolled in govt p	Sex-wise difference in enrollment in				
	Boys	Girls	percentage points			
Age 4	58.9	74.7	15.7			
Age 5	58.7	55.1	-3.6			
Age 6	59.4	73.3	13.8			
Age 7	70.9	75.9	5.0			
Age 8	70.4	77.6	7.2			

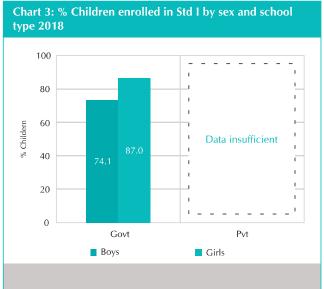

Note: Government pre-schools/schools include anganwadis, government pre-primary classes and government primary schools.

Key takeaways:

• Sex-wise difference in enrollment: Girls' enrollment is far higher than boys' enrollment at age 4 (by 15.7 percentage points) and 6 (by 13.8 percentage points). The sex-wise difference drops to 5 percentage points at age 7. There is a slightly higher enrollment of girls in Std I government schools (87% of girls and 74.1% of boys. (Table 4 and Chart 3)

Std I: Can young boys and girls read letters and recognize numbers?

This chart shows the distribution of Std I children enrolled in different types of schools by sex. For example, of all children enrolled in Std I, 74.1% of boys and 87% of girls are enrolled in government schools.
