Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95% confidence interval for the estimate. For instance, in Garhwal division of Uttarakhand, in 2014, % of Std I-II children who could read letters or more is 75.73%. With 95% probability, the true population proportion lies within ±4.62% points of the estimate, i.e., between 71.11% and 80.36%.
