VIII	3.1							12.8	37.5	36.9	6.6	3.1	100

How to read this table: If a child started school in Std I at age 6, she should be of age 8 in Std III. This table shows the age distribution for each class. For example, in Std III, 41.4% children are 8 years old but there are also 16.1% who are 7, 25.2% who are 9, 10.3% who are 10 and 4.8% who are older.

Chart 3: Trends over time % Children age 3, 4 and 5 not enrolled in school or pre-school 2006-2014*

* Data for 2011 is not comparable to other years and therefore not included here

2014	42.9	72.9	47.6	30.6	52.2	33.4

 $^{^{\}star}$ This is the weighted average for children in government and private schools only.

To interpret the chart at left (Chart 4), several things need to be kept in mind:

First, in ASER, all children are assessed using the same tool. The highest level on this tool is the ability to read a Std II level text. ASER is a "floor" level test. It does not assess children using grade level tools. At the highest level, what ASER can tell us is whether a child can read at least Std II level texts or not.

Based on this tool, we can see that proportion of children who can read Std II level text increases as they go to higher classes. By Std VIII children have completed eight years of schooling and by this stage a very high proportion of children are able to read text at least at Std II level. This is true for every year for which data is shown. It is possible that some children are reading at higher levels too but ASER reading tests do not assess higher than Std II level.

However, what is also worth noting is how children at a given grade are doing in successive years. For example, this chart allows us to compare the proportion of children able to read Std II level texts in Std V for cohorts that were in Std V in 2010, 2012 and 2014.

2014	25.7	58.4	30.8	9.0	30.3	11.8

^{*} This is the weighted average for children in government and private schools only.

To interpret the chart at left (Chart 5), several things need to be kept in mind:

First, in ASER, all children are assessed using the same tool. The highest level on this tool is the ability to do a numerical division problem (dividing a three digit number by a one digit number). In most states in India, children are expected to do such computations by Std III or Std IV. ASER is a "floor" level test. It does not assess children using grade level tools. At the highest level, what ASER can tell us is whether a child can do at least this kind of division problem.

Based on this tool, we can see that proportion of children who can do this level of division increases as they go to higher classes. By Std VIII children have completed eight years of schooling and by this stage a substantial proportion of children are able to do division problems at this level. This is true for every year for which data is shown. It is possible that some children are able to do operations at higher levels too but ASER arithmetic tests do not assess higher than this level.

However, what is also worth noting is how children at a given grade are doing in successive years. For example, this chart allows us to compare the proportion of children able to do division at this level in Std V for cohorts that were in Std V in 2010, 2012 and 2014.

Purchase	Charts, globes or other teaching material	37.7	61.3	1.0			

Table 22: School Management Committee (SMC) in schools 2014					
% Schools which said they have an SMC	97.8				
Of the schools that have SMC, % schools that had the last SMC meeting					
Before Jan 2014	3.7				
Jan to June 2014	27.0				
July to Sept 2014	61.3				
After Sept 2014	8.1				
% Schools that could give information about how many members were present in the last meeting	93.0				
Average number of members present in last meeting	13				

Every year schools in India receive three financial grants. This is the only money over which schools have any expenditure discretion. Since 2009, ASER has been tracking whether this money reaches schools.

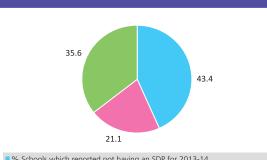

Name of Grant	Type of activity
School Maintenance Grant	For minor repairs and infrastructure maintenance. Eg. Repair of toilet, boundary wall, whitewashing
School Development Grant	For purchasing school and office equipment. Eg. Blackboards, sitting mats, chalks, duster
Teacher Learning Material Grant*	For purchasing teaching aids

^{*} In 2013-14 and 2014-15 Government of India stopped sending money for this grant in most states.

Table 21: Continuous and Comprehensive Evaluation (CCE) in schools 2013-2014

CCE in schools	2013	2014					
% Schools which said they have heard of CCE	59.0	74.6					
Of the schools which have heard of CCE, % schools which have received materials/manuals							
For all teachers	60.6	57.1					
For some teachers	16.5	16.8					
For no teachers	19.6	19.6					
Don't know	3.4	6.6					
Of the schools which have received manual, % schools which could show it	78.8	73.6					

Chart 6: School Development Plan (SDP) in schools 2014

- Schools which reported not having an SDP for 2013-14
- % Schools which reported having an SDP for 2013-14 but could not show it
- % Schools which reported having an SDP for 2013-14 and could show it
