Notes on ASER 2011

The first news of 2012 based on ASER 2011 is that private school enrollment in most states is increasing although the Right to Education Act for free and compulsory education is in place. Over 25\% of rural India's children go to private schools and the numbers will rise in coming years as education and wealth increase. ASER covers rural districts. The urban numbers are probably changing more rapidly towards private education.
The second piece of news is that not only are India's learning levels very poor on an international absolute scale, the levels in government schools in the North have steadily declined with the exception of Punjab and Himachal Pradesh. The decline is quite alarming and we expect that the results will be discussed, debated and perhaps even contested in some states. At first glance the decline of reading levels by 10-20 percentage points can seem shockingly impossible but I think there is enough in the data gathered over the years that indicates that this has been gradually building up possibly due to multiple factors, and something like Census 2011 has caused a major dip in the less functional state systems. It is noteworthy that private schools by and large everywhere, and the states of the South plus Gujarat and Maharashtra do not show a decline of reading levels as measured by ASER. In fact, some states show steady improvement over the years. On another note, a recent study by Education Initiatives- Wipro concludes that scores on common questions in tests given five years apart have declined about $7-10 \%$ among Std 4 children of elite schools of India. ${ }^{2}$ There is an urgent need to find out why learning levels are declining and to at least arrest the decline and improve the learning levels.

When we started seven years ago, many doubted that we could do the first survey successfully and yet we called it the ANNUAL Status of Education Report from the very first year. Later there were questions raised if there was a need to do this massive survey every year. Those who do this year after year also wondered when not much change was observed year after year, whether all this annual business was worthwhile. But in 2011, the efforts in doing the annual survey seem to be even more justifiable at least for some time to come.
This article attempts to explore the trends as seen from ASER measurements and observations over the last half a dozen years, or over a whole Plan period of India. I am sure the issue is more complex and many factors can be studied. We will be more than happy if researchers feel inspired to use our data to explore this fascinating phase of gradual but big, measurable but unseen changes in elementary education.
Ever since we launched ASER, our focus has been on two simple key points. First; are all children enrolled in school? What kind of school? Second; are the children learning at least the very basics of reading and numeracy? While ASER has won many friends and admirers, we have had our share of critics. We have chosen to focus on some very basic outcomes of education. If these outcomes improve, there is reason to believe that inputs are working. When they decline, it is a sure sign that inputs are not working.

Before we did the first survey, it was difficult for us to believe that over $90 \%$ rural children of this vast country were enrolled in schools. But once we had done the survey, we believed it. Many others including some eminent people did not, and said it was not consistent with their experience. A government sponsored independent survey around the same time came up with practically the same proportion of enrolled children. Every subsequent ASER threw up self-consistent numbers and trends at state and national level to further emphasize the validity and utility of the survey. Subsequently we also measured attendance, which showed that while enrollment was increasing in the Northern states, attendance of children in schools, which should be the real measure of enrollment, remained poor.
The increase in enrollment was an intended clear goal of the system and the system responded to the signals coming from Delhi and state capitals. Large centralized systems respond to simple and clear instructions or goals and not fine print. In a centralized but ill-functioning system with huge gaps of knowledge and skill-sets, a complex message is lost in the game of Chinese whispers. Worse, it may lead to a dysfunctional system becoming worse. A few months ago a senior government official was heard explaining to a gathering of head teachers the essence of the Right to Education Act. "Enroll all children. Do not beat them. Promote them to the next class. Make sure they do not drop out. Once you have done all this, you will have achieved RTE". But will learning happen simply if children stay in school?

[^0]The Government of India has not emphasized improvement in learning goals. The results framework of the ministry that goes with the annual plan guidelines gives learning outcomes a late and vague mention - all this in spite of all the evidence pointing towards dismal learning by every measure.
The ASER survey of children's reading and arithmetic levels has its critics and admirers. Our admirers like its simplicity and the fact that it has been tested and proven to be robust. The tools and techniques have been replicated and found to work in other parts of the world. But, the detractors have other views ranging from doubting the very integrity of the exercise to whether it is correct to measure outcomes at all and everything in between. Unfortunately, surveys, their potential, their meaning, and their limitations are not well-understood. Subsequent to ASER, other higher level and more sophisticated studies have been undertaken by Education Initiatives. NCERT studies have been published, and many state governments have been measuring learning levels using different methods, some of which are close to the ASER approach. Often these results do not match thanks to different approaches, methods, and tools. However, broadly all indicate that learning is poor in Indian schools.

ASER has followed the same basic procedures and has made sure that basic testing tools and methods of sampling and testing are the same every year for the core tests. As a result, although some of our findings may be inconsistent with other studies, they are self consistent year after year indicating good precision of the method and the techniques used.
The massive data gathered over the last years are showing some interesting trends that deserve the attention of policy-makers and researchers alike. The right to free and compulsory education is now on the ground. How are people reacting to it? How is it impacting schools? We cannot merely look at its impact every five years. In five years a Std 1 child will complete primary education and a Std 6 child will either drop out or go on to complete secondary schooling. But, if we let things go on the way they are, demographic disaster awaits us at the end of the decade if not sooner.

There is plenty new. The RTE act, if seriously implemented, will make it impossible for 'low cost' or 'affordable' schools to operate. But over the last six years private school enrollment in rural India has gone up by 5.5 percentage points, which translates into an increase of just over $25 \%$. It is quite likely that many, if not most, of the rural private schools do not meet RTE norms. So unless these children are all enrolled in RTE-compliant private schools, nearly 40 million rural children will have to be provided place in government schools. But, will the parents want to put their children in government schools even if they are 'good'? Can they be compelled to do so? What information do we have relevant to this question?

As far as private school enrollment is concerned, India can be divided into some broad regions. In the NorthWest, states like Punjab, Rajasthan, Haryana have had high enrollment in private schools. Since 2006, these enrollment numbers have gone up by $5-7$ percentage points- that is a $15-20 \%$ increase. The North-East shows mixed ratios with Assam and Arunachal being moderate, Tripura low, and Meghalaya, Mizoram, Nagaland and Manipur on the high side of private enrollment. In the East, states have traditionally had low enrollment in private schools, and these have gone up by about 1-3 percentage points- also a $20 \%$ increase. In this region Bihar has the unique distinction of actually decreasing the proportion enrolled in private school which is a likely reflection of the massive efforts to open schools, bring out of school children into school and appointing large numbers of teachers. But we also know that children's attendance in Bihar is the lowest in the country and nearly $60 \%$ elementary school children in this state go to private tutors. Bihar's immediate neighbors are also high tutor states. Maharashtra and AP show under $10 \%$ increase over their previous level of about $29 \%$ private school enrollment. But, the rest of the South is increasingly sending children to private schools.

The major enrollment story is in Tamil Nadu, Kerala, Maharashtra, and Uttar Pradesh. Each story is different in these extremely diverse states.

In Tamil Nadu, there are several strong reasons for attracting children to government schools - mid-day meal is said to be a major success over many years in bringing children to government schools. A few years ago a new child-centric, joyful, print-rich ABL methodology was introduced across the state. Yet, there is an overall increase of about 8 to 12 percentage points in private enrollment between Std 1 and 8 over five years. But a look at the charts below makes it obvious that the major increase is in Std 1-5 amounting to about 16 percentage points or
almost a doubling of private school enrollment. In Std 6-7-8 the increase is about 7 percentage points. It appears that the government schools in Tamil Nadu are not able to convince the parents that government schools are better. Is this only because parents associate some kind of a status with private schools and are not concerned with what goes on in the classroom? If so, is there not a need to reach out to parents and convince them?
. Tamil Nadu, Kerala, Uttar Pradesh and Maharashtra: Trends in percentage of children enrolled in private schools, Std 1-8

In Uttar Pradesh, which could be seen as the exact opposite of Tamil Nadu as far as government school functioning is concerned, private school enrollment in Std 1-5 has jumped up almost 20 percentage points to double the original number; while in upper primary segments, which had a high private enrollment, the increase is small but still substantial at 5 percentage points. The data suggest that in earlier cohorts private school enrollment in the early grades was relatively low and it rose as we moved to higher grades. Now it looks like private school enrollment starts high from as early as Std 1. Perhaps, upper primary private schools are expanding to include primary segments and those who can afford it are sending their children to private schools.

What is common between UP and Tamil Nadu apart from this big move towards private education? Serious research is needed to understand why parents in these two very different states are behaving similarly in massive numbers.

In Kerala, where there was already more than 50\% enrollment in private schools, there is still an eight percentage point increase in private enrollment. In the North-Western states, private school enrollment seems to have remained steady around $35-40 \%$ or inched up slowly, indicating a saturation effect. But Kerala seems to be breaking through any such saturation. It must be remembered that a very large proportion of private schools in Kerala are government aided, which are largely absent in the North-Western states. It is not clear if the existing private schools in Kerala are expanding, or more unaided private schools are opening.
The RTE Act offers 'per child cost' to unaided schools to accept $25 \%$ children of weaker sections. In Kerala, where only $40 \%$ are now in government schools and the number is going down, would it not make more sense to convert all government schools into 'aided schools' rather than keeping them under a centralized government control? Why not opt for a 'government funded locally managed school' model with either private groups or

Panchayats running the schools? Or, Kerala, with a very high proportion of private schools, may be ready for vouchers even though there will be political question marks.

Maharashtra presents a different case in contrast. Its private enrollment in primary segments has hardly gone up and the enrollments in upper primary segment, which are largely government aided schools, show no major increase either. The secondary segment in Maharashtra is largely private and aided, which is reflected in the chart. Why is the Maharashtra response to private schools like that of the Eastern states, which are poorer economically and educationally and not like Kerala?
These four states in some ways represent the variation among education systems in different states of India. Is there one "Indian education system"?
These questions present good research opportunities. However, it is almost predictable that unless regulation prevents it or unless suddenly a large population starts believing in neighborhood/common schools run by the government, the proportion of children going to private schools will go on increasing. The question is, how far? Based on previous ASERs and other studies, it is quite obvious that with increasing income and education of parents, people want to send their children to a private school if one is available nearby. Can government schools alone convince parents to do otherwise? Is there a need for greater social and political mobilization? Can it succeed?

When we published ASER2005 (the first one) many people were shocked (as were we), and some actually angry that the proportion of government school children in Bihar who could read was higher than in many other economically better off states. "Bihar, of all the places!" was an exclamation full of contempt often heard. But no one seemed to object that the ability to read in Bihar government schools was much higher than in UP or Rajasthan government schools.

As gurus of surveys say, what surveys provide are measurements and observations. These give estimates upon processing, which are perceptions of reality through the lenses of the survey tools. There are statistical methods available to measure how good these are (and ASER passes these tests quite well${ }^{3}$ ). ASER methods and tools have been replicated successfully by different groups in African countries and in Pakistan. What they mean or might mean is another thing. It is up to individuals to decide what comparisons to draw and what interpretations and inferences to make.

So, let us try to unravel the mystery of why Bihar children do better in reading. I will leave it to the economists to do detailed work and test a primary hypothesis that emerges from the table below.

Percent children in different states and systems who can read at least a Std 1 text in Std 3, 2006-11; and \% going to tutors in 2011

| State and school type * | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | \% going <br> to tutors in <br> 2011 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Bihar (Govt) | 51.7 | 52.6 | 49.7 | 42.3 | 43.9 | 29.9 | 42.0 |
| Bihar (Pvt) | 69.6 | 71.4 | 73.4 | 72.5 | 65.9 | 72.7 | 67.2 |
| W Bengal (Govt) | $X$ | $X$ | 47.9 | 49.3 | 51.7 | 46.8 | 67.9 |
| Rajasthan( Govt) | 31.6 | 28.7 | 31.5 | 25.8 | 27.2 | 22.6 | 4.7 |
| Rajasthan( Pvt) | 53.9 | 53.8 | 60.2 | 52.1 | 50.3 | 53.2 | 9.4 |
| UP (Govt) | 23.5 | 25.8 | 24.5 | 23.3 | 26.5 | 18.0 | 1.2 |
| UP (Pvt) | 50.3 | 53.2 | 56.3 | 48.7 | 51.3 | 50.7 | 13.5 |

* W Bengal private school data not included due to small observation numbers. Bihar private school data points are also small.

Note that the estimated percentage of children who can at least read a Std 1 text in Std 3 in Bihar and West Bengal lies in between private schools and government schools of Rajasthan and UP. There is a dip in 2011 in all these government schools. We shall deal with the decline in 2011 a bit later. For the moment let us work only

[^1]with numbers up to 2010. We know that there are many household factors that affect the learning levels of a child. Once these are controlled, as Dr. Wilima Wadhwa has shown in ASER 2009, the contribution of the private schools to the child's learning seems negligible in several states. In the present case, does tutoring represent all these factors to equalize?

Percent government school children who can read depending upon whether they go to tutor or not

|  | W Bengal <br> Government school |  | Odisha <br> Government school |  | Bihar <br> Government school |  | Jharkhand <br> Government school |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | with <br> tutor | without <br> tutor | with <br> tutor | without <br> tutor | with <br> tutor | without <br> tutor | with <br> tutor | without <br> tutor |
| \% Std 3 who can read <br> at least a Std 1 text | 53.9 | 32.9 | 55.9 | 27.6 | 35.5 | 27.9 | 38.1 | 24.0 |
| \% Std 5 who can read <br> at least a Std 2 text | 44.1 | 35.0 | 52.8 | 31.3 | 53.8 | 44.1 | 52.9 | 33.1 |

In all of the above states large but varied proportions of children go to private tutors. In other states the corresponding data points are low. The percentage of readers among government school children who go to tutors is unmistakably high in these high tutor and low private school states.

If the effectiveness of a school system was measured by the proportion of children without tutors who can read texts of Std 1 and 2 respectively at Std 3 or Std 5, we see an even worse picture. In fact, for those who wish to compare states, once the tutor effect is removed, most states excepting Kerala, Maharashtra, Punjab, and Himachal Pradesh start looking very similar.

It is observed in states where learning levels are declining that while the same proportion of children go to tutors year after year, their contribution to the child's learning level diminishes. This may mean that the tutor is a complementary factor and if the school functioning declines, the effectiveness of tutoring is lower too. This should make sense. It is noticeable that the impact of tutors is not the same in every state and in every class. It is as though tutoring is also a 'system', that functions well in some states and not in others.
In other words, the learning level of a child in a government school results from many factors. School is an important factor but it is only one of the factors.

Let us come to the observation that in 2011 the learning levels of government schools drop substantially. In fact, in government schools in Rajasthan, UP, and Bihar there is a continuous decline in learning levels over time until it drops sharply in 2011. It is noteworthy at the same time that the private school learning levels remain more or less unchanged.

What is going on? One likely contributing factor for big a drop in 2011 is that there was Census in early 2011 and teachers were pulled out of classrooms right in the most productive part of the school year after the OctoberNovember festive season. But there are other factors changing as well.
The school observation data from ASER can be used to track trends. ${ }^{4}$ The school attendance observed in UP and Bihar over the last five years is down from $67 \%$ in 2007 to $57 \%$ in UP and from $59 \%$ to $50 \%$ in Bihar. The drop between 2010 and 2011 is sharp. Rajasthan shows no such drop but W Bengal does so in 2011. Teacher attendance in Bihar and Rajasthan remains at around 85-90\% but has declined in UP from $92 \%$ to $82 \%$.
Another important observation is that in Rajasthan, which remained unchanged in terms of children's or teachers' attendance, the proportion of multigrade classrooms has gone up from $52 \%$ to $62 \%$. In UP it has gone up from $43 \%$ to $52 \%$. In Kerala it has gone up from $2 \%$ to $9 \%$. Note that all these are states with high proportions of children moving to private schools. With the exception of Maharashtra, Karnataka, and Tamil Nadu, the proportion of multigrade classes has increased in most states. Whether this is a consequence of a consciously adopted pedagogy or whether this reflects rationalization of teachers is not clear.

[^2]Just to be clear, I am not at all opposed to multigrade classrooms. In fact, I would prefer grouping children according to their current level rather than age alone. But the classroom management techniques and teacher preparation required in such situations is very high. If these are weak, as they today are, a multigrade classroom can prove to be a disaster. If ASER school observations over the years are correct, we are witnessing a quiet disaster.

The declining levels of learning and other factors are not unique to Rajasthan, UP, and Bihar. But there are exceptions as well.

The effectiveness of a system can be increased or decreased by changing a variety of factors. But to clearly identify these, we first need to have a measure of effectiveness of the system. This is only possible if the system defines the outcomes it wants and works towards achieving them. If construction of toilets and ensuring that they function is the desired outcome that the system is aiming for, then the system will respond accordingly as long as there are no other conflicting factors such as lack of water. If the idea is to ensure that children learn reading, writing, arithmetic, a focused system can achieve this. If we further want the child to be free of fear, able to think and express, that can be done. But for all this, the system must function and it should be capable of receiving messages and translating them effectively into appropriate action.
The exact opposite is also possible. In other words, the estimates of declining percentage of readers in every class may lead us to infer that the message being interpreted is that learning is not important.

Below are some charts of learning levels of government school systems as measured by ASER in different states over the years. A quick look at these charts makes it evident that as they move from one class to the next, a higher proportion of children can read Std 1 level text or more. This is what one would expect, given that some children do acquire the very basic skills measured by ASER with every additional year in school - although many do not. In Karnataka in 2011, for example, about 5.3\% of children can read Std 1 level text in Std 1. This number grows to 41.5\% by Std 3, and 70\% in Std 5. In Tamil Nadu in 2011, 3.9\% in Std 1, 26.1 in Std 3, and $67.5 \%$ in Std 5 can read a Std 1 level text.

But to assess whether the system is becoming more effective at teaching children to read, we need to compare the proportion of children who could read Std 1 level text in 2006 with the same proportion in successive years at the same Std. If the ability of the system to teach basic reading is improving, this should be reflected in an increase in the proportion of children in (say) Std 3 who could read from 2006 to 2011.
. Tamil Nadu and Karnataka: Percent government schools children able to read at least Std 1 text in respective Std and year

A look at Std 4 in Karnataka and Std 5 in Tamil Nadu suggests that the effectiveness of the classroom as per the measure of " \% children who can read at least a Std 1 text" is improving year after year. Although the proportion of children able to read a Std 1 text remains low in absolute terms at every Std in Tamil Nadu, the levels appear to be rising slowly year after year. At least they are not deteriorating for certain. In both states about 60-65\% children can read at this level by the time they are in Std 5. However, in getting there, more Karnataka children
learn to read in Std 2 and 3, while more Tamil Nadu children become readers with a jump as they move from Std 3 and 4.
In Kerala, Andhra, and Maharashtra there is no observed improvement nor loss of effectiveness of schools by the same measure. ${ }^{5}$
Gujarat should be mentioned as a state that has also started showing a steady although slow improvement in reading levels over the last three years. One major initiative in the state for the last three years is that government officers visit randomly chosen schools to assess performance of children around November and cross check teachers' evaluations.

Children's attendance, teacher attendance, and the proportion of multigrade classrooms in these states are largely unchanged or have improved and remain at high levels.

Punjab and Haryana: Percent children in government schools able to read at least a Std 1 text in respective Std and year

Here is an interesting case: Haryana and Punjab - neighbours who share a common capital - show opposing trends. The two states are almost identical with respect to private school enrollment, student and teacher attendance, and multigrade classrooms. Outwardly, they should function with the same effectiveness. Yet, one is getting better while the other is in decline. While Punjab shows year after year improvement especially after Std 2, Haryana seems to show deterioration especially when children reach Std 5. In other words, the Punjab system has been converting non-readers into readers at Std 3 and 4 with increasing effectiveness year after year so far. In contrast, in Haryana, although more children learn to read as they go from say Std 2 to 3 or Std 3 to 4, each year fewer children are learning to read at each step and this shows up as a cumulative decline in the percentage of children reading at the same Std when compared across years. In Haryana, the proportion of children who can read in Std 5 was around $85 \%$ in 2006 while it has steadily declined to $75 \%$ in 2011. The increase in Punjab and the decline in Haryana are both obvious and statistically significant.
. Odisha and Jharkhand: Percent children in government schools able to read at least a Std 1 text in respective Std and year.

[^3]The estimated decline in learning levels at Std 3 in UP, W. Bengal, Rajasthan, and Bihar was already shown in a table above. The decline in Odisha and Jharkhand is sharper at all grade levels especially after 2008. Particularly noteworthy is the sharp decline at every Std in 2011. It may be noted that average attendance of children in these states is observed to be around $90 \%$, and teacher attendance is also higher than the average among Northern and Eastern states. However, the main common factor is that multigrade classrooms have gone up by 7 to 10 percentage points. We are not aware of what else may have changed in the system. The sharp decline in 2011 is common with other Northern states and might be due to the additional Census factor laid over already poorly functioning systems.
It should be reiterated that private schools systems in the North do not show a similar decline in these basic learning levels.

These examples provide sufficient evidence that ASER can capture positive changes, negative changes, and note status quo in school systems over years.

This brings us to a major negative change in two states of Madhya Pradesh and Chhattisgarh. In Madhya Pradesh, according to ASER 2005 36\% government school children in Std 3 could read at least a Std 1 text. By 2006 this had jumped to 65\%. There was a further jump in 2008 to $81 \%$ after stability for one year. However, in subsequent years the Std 3 classes had lesser and lesser proportion of children who could read. The conversion to readers after Std 3 also slowed down. As a result we see that by 2011 the proportion of basic readers has fallen way below what it was in Std 3 and Std 5 in 2005-2006.
. MP and Chhattisgarh: Percent children in government school able to read at least a Std 1 text in respective Std and year.

In neighbouring Chhattisgarh, the decline is observed after academic year 2008. The Chhattisgarh decline looks relatively smaller than in MP today. However, it is comparable to what MP had seen in 2010. In other words, it is more than likely that unless corrective action is taken, the Chhattisgarh chart of the next ASER in 2012 will look like the MP chart of 2011.

How are the two states doing on other parameters observed by ASER?
. MP and Chhattisgarh: School indicators, 2007 and 2011

| Data for primary schools (1-5) \% | Madhya Pradesh |  | Chhattisgarh |  |
| :--- | :---: | :---: | :---: | :---: |
|  | 2007 | 2011 | 2007 | 2011 |
| Children's attendance | 67.0 | 54.5 | 72.0 | 73.1 |
| Teachers' attendance | 91.3 | 87.7 | 92.7 | 84.6 |
| Multigrade classrooms | 61.8 | 70.8 | 48.1 | 62.5 |
| Water provision and functioning | 78.5 | 69.1 | 77.6 | 73.4 |
| Private school enrollment | 13.0 | 19.0 | 9.0 | 12.5 |

It appears that there is a general decline. The increase in multigrade classrooms combined with increased teacher absenteeism and lower attendance of children (not in Chhattisgarh) from already low levels could cause a decline in reading levels like in other states. There is no documentation available for any other negative factors creeping into the MP and Chhattisgarh systems that could lead to additional negative effects.

The drops in learning levels are very high compared to other states because the baseline of learning levels in 2007-2008 for these two states was very high. How can such huge drops in the learning levels be explained? The answer may lie in why the learning levels might have gone up in the first place.
We have seen above that in Punjab and Tamil Nadu, although to varying extents, the proportion of children able to read has gone up steadily. In Punjab, the government took up a specific program to improve basic reading and numeracy for three years. The whole system was oriented towards achievement of goals that would be measured. The campaign had intended consequences as the State Project Director of SSA provided from-the-front leadership. The learning levels were quite high to begin with and they went up in small jumps over the years. In Tamil Nadu, the SSA provided similar leadership for about 4 years to establish the ABL methodology. The explicit and primary goal of ABL is not improvement of reading, which may be an outcome of an overall change in pedagogy that allows children to learn at their own pace rather than being encouraged to achieve reading skills as a priority. Hence, a slower pace of change may be expected. It is important to note that gains in reading levels due to both are captured by ASER over the years.
In Madhya Pradesh in 2005-06, and then again in 2007-08, the SSA took up very strong focused campaigns to improve reading and basic literacy with the involvement of teachers and village volunteers. In both years the respective State Project Directors provided leadership. Goals were set, officers and teachers were involved to achieve specific learning goals. In Chhattisgarh, there was a similar campaign for just one year, 2007-08. Once again, an energetic State Project Director of SSA led from the front, the school system was geared towards achieving set goals of basic reading and numeracy and there was a massive mobilization of volunteers in practically each village. In MP too, there was a massive volunteer campaign with volunteers working with children in each village.
The impact that a systemic momentum can have is easy to believe. What is missed is the impact that volunteers can have on such a large scale when working with the system.
Some individuals question our integrity and say that ASER cooks up figures to show Pratham's work in good light. There are others more kind in questioning our integrity. In our defence we can point out that similar campaigns taken up in UP or in Assam failed to show improvement although the government was involved and there were volunteers mobilized. In Uttarakhand, learning levels hardly moved. In Maharashtra and Gujarat the respective governments took certain steps without Pratham involvement and reading levels went up. It is our experience that when the government leadership took up something energetically and when volunteers also participated, learning levels showed improvements. With the momentum of the school system missing or weak, learning levels did not show improvement. In other words in the period 2007-2009, any large scale volunteer-based campaign without the government's involvement yielded no noticeable improvement. This is noted in various Pratham reports.
Fortunately, the world renowned MIT-based research group J-PAL has conducted rigorous randomized evaluations of Pratham's work with volunteers. ${ }^{6}$ These large scale studies conducted in varied places such as Mumbai, Baroda, Jaunpur (UP) and West Champaran (Bihar) all point to the impact volunteers have on learning levels of children at the very basic level that ASER measures. There is also a large scale study involving school teachers in Bettiah in West Champaran in summer camps, where children were grouped according to their learning levels rather than by grade or age and taught basic reading and literacy with focus. This study showed that not only did children who attended camps make progress, but they retained their advantage over other children for at least two years.?

We have already seen the impact tutors have on learning levels of children in government schools although the school attendance in Bihar is recorded at about $60 \%$. If the school system was more effective, learning levels would probably be higher (unless parents stop sending their children to tutors because schools are more effective, but this does not seem to happen in private schools and in advanced states such as Kerala).

[^4]The volunteers who helped children in massive numbers can be thought of as tutors focusing on certain tasks of reading. With this it is entirely possible to see the kind of jumps at the basic level of learning that are noted by ASER.
The effect of the campaigns in MP and Chhattisgarh is reflected in the measurement of their intended outcomes. The effect of campaigns of the previous year(s) is seen in ASER measurements which happen in OctoberNovember of the following academic year. The 2006 measurement in MP is a reflection of the campaign in 2005-2006 academic year and the 2008 measurement in Chhattisgarh is a reflection of the campaign of 20072008. The low learning levels jumped tremendously with the boost that came from the energetic campaigns. After 2008/2009, the campaigns were simply switched off by the new State Project Directors in the two states. The momentum was completely lost. Now, we see that not only are the focused learning improvement efforts off but other parameters are also going downhill.
The impact of school summer vacations on children's loss of learning has been studied in the United States and is said to impact socioeconomically disadvantaged children much more. Similar studies related to regular disruptions and vacations are badly needed in India. What happens if school and classroom functioning deteriorates? Is it possible that the fragile reading and numeracy skills acquired by a disadvantaged child in Std 2-3 will be forgotten or become rusty enough to once again classify the child as a non-reader? Our data suggests that this is what is happening in several states and needs to be studied further in depth.
In short, the rise in learning levels is a combination of an energised school system which would enhance its effectiveness as compared to other neighbouring states and the volunteer/tutor effect would be added on to this. Once these effects are switched off, and other parameters also deteriorate, the consequences can be dramatically observed in falling of learning levels as seen above.

The ASER data over the years are self consistent and have thrown up trends in enrollment and changes in learning levels that require more research to be done but even as they are, they deserve close attention.
There are two clear trends observable around the country.
One is that private school enrollment is increasing in most states and where there are few private schools, private tutoring is a surrogate for private schooling that seems to have an equalizing impact to some extent in several backward states in the East. Should tutoring be seen as a harmful nuisance or a necessary support system in a society that is semi-literate with low skills and knowledge all around? At a time when the government has put in place an act for free and compulsory education with planned increase in spending on government schools and curbs on private schools, there is a need to understand why and how the private sector is expanding now that it caters to nearly half the rural children in several states, and a possibly larger share of urban children in many large states.

The second is that while there are differences in the effectiveness of systems in different states in teaching children at different stages of schooling, the general level of effectiveness is scattered in a narrow band around a poor mean. Fortunately, everyone agrees with this! Trends over the last five-six years indicate that learning levels are gradually dropping in most large Northern and Eastern states while they are steady or improving slowly in the Southern and Western states. Private school effectiveness varies from state to state but ASER cannot detect a decline in private school effectiveness at the level of its measurement. These observations of learning level changes in government schools are correlated to other school observations that might affect the teachinglearning process. In addition, the special efforts undertaken by different state systems or the absence or reversal of these have to be taken into account to understand why the outcome measurements show changes. If this is done, a more practical strategy to improve learning levels in the more backward states can be evolved.

# ASER and learning profiles: The pace of learning is too slow 

## Lant Pritchett ${ }^{1}$

One of the big advantages of the ASER approach of testing children out of school is that it can assess the performance of children at a wide variety of grade (and age) levels. Rather than seeing just a snapshot of how children at one grade do against some grade-based standard, the ASER approach shows the entire learning profile of what fraction of children in each grade are in which level of performance on literacy and numeracy. In the case of ASER this is easiest to interpret at the highest and lowest categories of performance, for instance what fraction of children can read a level 2 story and what fraction of children can do division of a one digit into a three digit number. The point I want to make about these learning profiles is that the differences across grades reveal important facts about the dynamics of learning, in particular the fact that progress is so slow that 4 out of 5 children who do not have mastery will fail to acquire mastery in an entire year of schooling. Let me explain using the overall rural results from 2010.

Table 1 starts from the numbers from last year's report on the fraction of children who can read at level 2 or do subtraction, both grade 2 curricular objectives. Many children finish grade 2 not having mastered these simple skills, which is not perhaps shocking. What is shocking is the bottom line for reading, which is that 75 percent of children (3 out of every 4) who do not acquire reading or arithmetic mastery at the "grade appropriate" level don't acquire it in the following year either, and 3 out of 4 of those who still don't master these skills won't get it even after another entire year of schooling. This implies that only 1 in 4 students is making progress across these very low thresholds of literacy and numeracy per year of schooling.

I'll explain this simple calculation using reading from grade 4 to 5 . The fraction of students that could read Level 2 text in grade 4 was 38.1 percent and in grade 5 was 53.4 percent, so the proportion that could read increased by 15.3 percentage points. But many children already could read, so if we want to see what fraction of those who could not read acquired this ability, let's adjust this gain by the fraction who could not read in grade 4 which was 61.9 percent (100-38.1). So the gain from grade 5 over grade 4 as a percent of those who could not read

Table 1. Children gain slowly in skills even as they progress through grades- three out of four children who enter grade 3 or higher without a grade 2 skill leave without gaining mastery

| Grade | Reading |  |  | Arithmetic |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Can read level 2 text ${ }^{\text {a }}$ | Gain from grade to grade | Fraction of those who did not learn ${ }^{\text {b }}$ | Can subtract (or above) ${ }^{\text {a }}$ | Gain from grade to grade | Fraction of those who did not learn ${ }^{\text {b }}$ |
| 1 | 3.4\% |  |  | 5.5\% |  |  |
| 2 | 9.1\% | 5.7\% | 94.1\% | 17.1\% | 11.6\% | 87.7\% |
| 3 | 20.0\% | 10.9\% | 88.0\% | 36.4\% | 19.3\% | 76.7\% |
| 4 | 38.1\% | 18.1\% | 77.4\% | 57.4\% | 21.0\% | 67.0\% |
| 5 | 53.4\% | 15.3\% | 75.3\% | 70.3\% | 12.9\% | 69.7\% |
| 6 | 67.5\% | 14.1\% | 69.7\% | 80.1\% | 9.8\% | 67.0\% |
| 7 | 76.2\% | 8.7\% | 73.2\% | 84.3\% | 4.2\% | 78.9\% |
| 8 | 82.9\% | 6.7\% | 71.8\% | 85.4\% | 1.1\% | 93.0\% |
| Total gain from Grade 3 to Grade 8 |  | 62.9\% |  |  | 49.0\% |  |
| Average gain, Grades 3 to 8 |  | 12.3\% | $75.9 \%$ <br> (3 of 4 do not gain mastery in a year of instruction) |  | 11.4\% | $75.4 \%$ <br> (3 of 4 do not gain mastery in a year of instruction) |

a. Data from ASER 2010 (Rural) report tables 4 and 6.
b. $\quad$ Formula is $100-(($ gain from previous grade)/(100-fraction that could do in previous grade) $) * 100$.

[^5]in grade 4 was 24.7 percent ( $=15.3 / 61.9$ ). This implies that one of each four children who entered grade 4 not able to read at Level 2 passed that threshold of literacy during that year. But it also means that three out of four children who came into grade 4 not reading at a Standard 2 level progressed on to grade 5 without having learned how to read.

Overall this problem is exactly the same in arithmetic, with a slightly different pattern. M ore children pick up basic arithmetic quickly, so that by grade $3,36.4$ percent of children can do subtraction. But in the five additional years from grade 3 to grade 8 only 49 percent gain that level of arithmetic capability. This is because progress peters out and by grade 8 , even though 15 percent still cannot do subtraction, there is almost no progress at all.

This formulation of the learning problem in Indian rural basic education comes from seeing the entire learning profile and has been a contribution of the ASER approach. The flat learning profile which is the result of most students making no progress in answering particular questions has now been replicated in studies in Andhra Pradesh by the APRest study and in the work of Education Initiatives which have asked common questions across grades (see Beatty and Pritchett 2012).

I also find this formulation of the learning problem-that three out of four don't learn enough to pass a low threshold in a year-the most stark and striking. Imagine you are a child who came to school with the hope and promise that getting an education could transform your and your family's future by opening up the opportunities that learning enables. You perhaps weren't "school ready" and so in grade 3 you still cannot read a simple (level 2) paragraph but you still have hope. But the odds are 3 out of 4 against you learning in grade 3 . So now you are passed along to grade 4 as one of the 62 percent still not reading. You come again hoping that someone will notice, someone will help. Again the odds are against your hope, 3 out of 4 that you don't learn in grade 4 either. The result is that you could easily be one of the one in three children who complete lower primary schooling, passed through five entire years of schooling, having spent roughly 5,000 hours in school, still lacking the most fundamental of skills. And so, year after year, a dream deferred becomes a dream denied.

The ASER reports have performed a remarkable feat: bringing hard evidence to the table to measure outcomes of our elementary education system. To see the importance of this achievement, just look at the public discourse in various fields.

Most government schemes and budgets track allocation and utilisation of funds. A department that has utilised a large proportion of its allocated funds in a year is judged to have performed well, and gets further funding for the next year. This frequently results in significant spending tow ards the end of the financial year, as departments want to show "performance".

In some cases, outputs are measured. For example, in a child immunisation programme, the measure may include (in addition to spending targets), the number of children who have been vaccinated. However, even this metric only measures the means to the end target of less disease or lower child mortality. Rarely is the desired outcome measured and even rarer is the link made with financial outlays.

Another example can be used to illustrate the lack of outcome measures. The MNREGS is one of the key poverty alleviation schemes of the government. The central government publishes periodic data on the funds transferred to each state and the amount utilised. There is some further measurement - the number of persondays of employment generated. However, the idea that the scheme is designed to be a safety net has been lost. Low utilisation can be interpreted in two ways: the government is unable to provide sufficient jobs to the jobseekers (bad result), or that there is sufficient availability in the economy for alternate jobs leading to low demand for the scheme (good result). The way to answer this is by asking whether potential NREGS job seekers are able to get jobs in the scheme. This can be obtained only by surveying people on whether they needed to access the scheme and whether they obtained jobs. The answer to this question is not available.
Indeed, data on many social and economic indicators are not even collected or reported at annual intervals. India must be one of the few large economies which have no idea of their employment levels - the only data comes from the National Sample Survey every five years; most countries provide such data on a quarterly basis. M ost health statistics - such as child and maternal mortality, malnutrition, use of family planning methods - are collected in the NFHS surveys, at approximately five year intervals. Poverty levels are estimated every five years.

It is in this context that the ASER reports have become invaluable. These reports measure the learning levels of children across the country at annual intervals. There are two main contributions. First, time-series and crosssectional (district-wise) data is available to researchers who can link this data to various inputs and see the effect of various policy interventions. M ore importantly, ASER has changed the discourse in the field of education from that of measuring outlays (money spent) and outputs (teachers hired, schools built) to that of outcomes (ability of children to read and do arithmetic).

This change has not been reflected in some policies, though. The Right of Children to Free and Compulsory Education Act was passed in 2009 and brought into effect in April 2010. The Act guarantees access to schools - yesterday's problem that has been solved as evidenced by the $90 \%$ plus enrollment rates of children in first grade. The Act also requires all schools to have certain minimum norms - which are measured as physical infrastructure (building, library, kitchen, toilets), teacher-student ratio, teaching hours. What the Bill misses is a focus on whether the students are actually learning. Indeed, the Bill prohibits schools from holding back students in the same class if they do not perform adequately, but it does not provide for any special measures to be taken to ensure that no child is left behind. Hopefully, the data from the ASER reports will indicate the gaps and motivate policy implementers to deliver quality education to children. This means a shift of focus from inputs to outcomes such as ensuring that children in elementary schools are learning basic skills of the 3 R's, and developing the ability to think and create. Such skills will be essential for them to prosper in tomorrow's knowledge economy.

ASER has done an impressive job of measuring education outcomes. The skills built by the team in collating, assessing and evaluating data can be used to measure outcomes in areas such as health, livelihoods, and the effect of various government schemes. Perhaps, it is time for ASER Centre to expand to other socio-economic sectors.

[^6]
# From a Right to Schooling to a Right to Learning: Rethinking education finance 

Yamini Aiyar ${ }^{1}$

India's elementary education system is at a crossroads. In 2009, the Indian Parliament passed the Right to Education (RTE) Act guaranteeing the provision of free and compulsory education to all children between the ages of 6 to 14 years. At the heart of the law is a guarantee to ensure 'age-appropriate mainstreaming' for all children. In other words, the Act is a guarantee that every child in India acquires skills and know ledge appropriate to her age. Now, as efforts to deliver on this guarantee gain ground, the country faces an important choice: should elementary education be delivered through the current model that focuses on the expansion of schooling through a top-down, centralized delivery system? Or should we use the RTE as an opportunity to fundamentally alter the current system and create a bottom-up delivery model that builds on an understanding of children's learning needs and privileges accountability for learning rather than schooling?

For decades, the primary goal of the Indian government's elementary education policy has been to create a universal elementary education system by expanding schooling through inputs. Substantial finances have been provided to meet this goal. Between 2007-08 and 2009-10, India's elementary education budget increased from Rs. 68,710 to Rs. 97,255 crore in 2009-10. ${ }^{2}$

M ost of this money has been used to build school-level inputs through a large education bureaucracy controlled and managed by state and central governments. To illustrate, PA ISA analyzed the elementary education budgets of 7 states in the country for 2009-10 and 2010-11 (see Table 1 below for a state by state analysis). According to PAISA, on average, $77 \%$ of the education budget is invested in teachers and management costs. All critical teacher-related decision-making, for instance hiring or salary payment, lies with the state administration. ${ }^{3}$ Following teachers, the next largest investment is on the creation of school infrastructure - 15\% of the budget. Funds for infrastructure development are often channeled to schools; however, key decisions related to sanctions and procurement are taken by the district. Importantly, while a school can demand infrastructure funds, it has no decision-making power over the timing of receipt of these funds and de-facto funds have to be spent based on priorities set by the state and district administration. Interventions aimed directly at children, such as the provision of free textbooks and uniforms and addressing the problem of out of school children, account for just 7\% of the total investment.

Table 1. Breakdown of elementary education budgets in 7 states

|  | Andhra <br> Pradesh | Bihar | Himachal <br> Pradesh | Madhya <br> Pradesh | M aharashtra | Rajasthan | West <br> Bengal |
| :--- | ---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Teachers | $72 \%$ | $59 \%$ | $79 \%$ | $64 \%$ | $86 \%$ | $83 \%$ | $67 \%$ |
| School | $13 \%$ | $25 \%$ | $9 \%$ | $21 \%$ | $5 \%$ | $9 \%$ | $19 \%$ |
| Children | $4 \%$ | $10 \%$ | $1 \%$ | $8 \%$ | $5 \%$ | $1 \%$ | $10 \%$ |
| Quality | $2 \%$ | $1 \%$ | $1 \%$ | $1 \%$ | $1 \%$ | $2 \%$ | $1 \%$ |
| Management | $9 \%$ | $4 \%$ | $9 \%$ | $5 \%$ | $4 \%$ | $4 \%$ | $4 \%$ |
| Misc | $0 \%$ | $0 \%$ | $1 \%$ | $0 \%$ | $0 \%$ | $1 \%$ | $0 \%$ |

Interw oven in this top-down system is an intent to involve parents in decision-making. In 2001, the Government of India (GOI) launched the Sarva Shiksha Abhiyan ((SSA), now the programmatic vehicle for the delivery of the RTE) with a mandate that expenditure decisions be taken based on plans made at the school level through Village Education Committees (VEC). These plans are then aggregated at the district and state levels. Drawing on this model, the RTE mandates the creation of School M anagement Committees (SMCs) tasked with similar responsibilities. Despite this bottom-up planning structure, the centralized delivery system has disempowered these committees and in fact created disincentives for parental participation in a number of ways:

[^7]First, teachers, as pointed out already, are not accountable to SMCs.
Second, committees have spending powers over very little money. In 2010-11, committees had spending powers over just about $5 \%$ of SSA funds. Even these funds are expected to be spent based on norms set by GOI. So, if a school wants to spend more than the norm on, say, purchasing teacher material or if a school wants to invest more in improving children's reading capabilities by dipping in to its maintenance fund - it can't. Table 2 below offers an illustrative example from Hyderabad of the different activities over which an SMC can actually take decisions.

Third, governance inefficiencies further curtail SMC powers. As PAISA has repeatedly pointed out, school grants rarely reach schools before October (the PAISA district studies found that on average school grants reach school bank accounts toward the end of September/early October). These delays in fund flows mean that needs at the school often remain unmet owing to lack of money. More worryingly, PAISA found that in many districts, expenditures even for school grants are based on formal or informal orders received from district and block officials. Consequently, often monies are spent without adequate consideration to school needs.

In essence, SSA has promoted a bottom-up delivery system with no bottom-up control or decision-making power. The result is thus a de-facto centralized, top-down system.

Table 2. Activities for which SMCs in Hyderabad city can take decisions

| Activity | IS SMC <br> resolution <br> sufficient? | Is any <br> additional <br> approval <br> needed? | From |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Desks <br> and <br> Chairs | No | Yes | SSA Planning | 2 months | SSA office | Approval of design; <br> Three quotatiions |
| from local suppliers |  |  |  |  |  |  |$|$

The shift towards enhancing learning requires that the system focus on the needs of individual schools and children. GOI has argued that implementing the RTE requires a system that recognizes 'the need for the creation of capacity within the education system and the school for addressing the diversified learning needs of different groups of children who are now in the school system.'4

School Management Committees hold the key to implementing such a decentralized structure. The first and most critical step therefore in the shift from schooling to learning will be to empower school management committees. There are three immediate reform measures that could be implemented to achieve this goal:

[^8]1. M oving away from the current norm-based funding system for SM Cs to an untied block grant structure that would enable the school to take spending decisions based on its own felt needs. The quantum of the grant could be determined on the basis of per-child enrollment in schools, thus linking grant amounts with schoolspecific characteristics.
2. Strengthening planning capacity through focused community level trainings. With the launch of RTE, budgets for community training have been significantly enhanced. How ever, for the moment, much of this money remains unspent as training is not priority. Prioritizing training and developing innovative methods to build planning capacity at the SMC level is essential.
3. Strengthening transparency and monitoring. A transparent tracking system holds the key to a strong, accountable, decentralized system of delivery. Building structures to ensure real time tracking of finances is thus critical.

Will this lead to more learning for school children? At the very least, such a system will serve to strengthen parent engagement and ownership with the school and encourage accountability to parents. This is a critical first step.

Not far from the village primary school, there was a group of women. I started chatting with them. "How is the education in this school?" I asked. "I send my children to school" said one lady. "I even send my son and daughter to tuition and buy them books." Several women joined the conversation. "How do you know if your child is learning well?" I wanted to know. "How can we tell?" they said. "We are not literate. But we send our children to school and we send them to tuition also. So they must be learning."

It was a mild November day in Rohtas district in south-western Bihar. Rohtas is known as the rice bowl of the state. Canals criss-cross the district. The rice fields were green and stretched in all directions. Our village was in the Dehri block. It was afternoon. School was over. Children had come home, left their books and bags and were playing outside. Women sat in the sun cleaning rice and talking to each other. It felt good to sit in the afternoon sunshine. It was a good time for conversations.

I had been asking children to come and read. What I had were several sets of reading tasks - letters, words, simple paragraphs and a short 8-10 line story - all in big black font, printed on white paper. Children were curious. I had been sitting on the edge of the women's group. Children crowded around me, some looking over my shoulder, some from the side. All of the texts contained basic, simple and familiar words that are easy to spell, everyday words, sentences and contexts that children could relate to. Nothing more than what is in the Std Il textbook. Everyone tried to read. Many could read the letters and some could read the words, only a few managed to read the paragraph and the story.

The women watched their children's attempts. There was a woman in a blue sari. Her daughter was in Std 4 and could not read. "Do you know if your child can read this?" I asked the blue sari mother. "How am I supposed to know?" she argued back. "I myself cannot read." "Which of these are the hardest to read, do you think?" I continued, pointing to the letters, words and sentences. "I don't know. I am illiterate," she answered, somewhat irritated. "Look at the paper, look at these things, what seems easy and what seems difficult?" Now my blue sari mother became adamant. "Why are you forcing me? I told you I cannot read." On the sidelines, her eight year old daughter was enjoying the interaction. Perhaps she was enjoying it because the tables were turned. She began to persuade her mother to focus on the paper. With some hesitation on her side and much encouragement from her daughter, the lady adjusted her pallu on her head and leaned over. "This one must be easy", she said, pointing to the letters, "because many children could do it. That one (pointing to the story) is not easy because even bigger children could not do it."
"Okay", I persisted. "Do you know when your child has a fever?" "Of course!!!" She looked at me in surprise; all mothers know when their child is sick. "What do you do when your child has a fever?" I asked her. The blue sari mother replied instantly. "That's simple. I feel her forehead. If it is hot then I know she has a fever. I do some simple things at home. If in two or three days the fever does not go down, I take her to the doctor. I can even take her to a private doctor. I ask the doctor for some medicine. After another few days if the fever does not go down then I will take her back to the same doctor and fight with him......." "So you have an MBBS degree" I said. "What is that?" she asked suspiciously. "That is a medical degree" I replied. "Oh no no" she laughed. "Remember I told you that I am illiterate!"
"I am very puzzled," I continued. 'Why is that even though you are illiterate you know exactly what you need to do when a child has fever but when it comes to her schooling you don't do anything when she cannot read?" Now the blue sari mother was ready with her answer. "That is very simple" she explained. "We go to the doctor only sometimes when there is problem. He cannot come to my house to cook and feed and take care of my children. I have to do it. But the teacher is with my child every day. My job is to send my child to school and teacher-ji's job is to teach my child. I am doing my job and so she should do her job".

India's Parliament passed the Right to Education Act in 2009, thereby guaranteeing quality free and compulsory education to all children in the age group six to fourteen across the country. While most of the provisions of the Act are concerned with ensuring adequate inputs to schools, there are four key elements that have the potential to fundamentally transform the landscape of elementary education in India.

[^9]First, in spirit the goal of the RTE Act is to ensure that every child (whether currently out of school or presently enrolled in school) has the opportunity to reach grade level competencies/educational levels appropriate to his or her age all the way up to age fourteen.

Second, continuous, comprehensive evaluation of children's progress through the elementary years means that teachers need to understand where the children are today, and plan for where to take them next based on that understanding.

Third, efforts have to be made to explain children's progress to parents.
Fourth, every school has to develop a School Development Plan with the help of the local School M anagement Committee. By design, many members of these committees will be parents.

Today, almost all of India's children are enrolled in school. The journey to ensure schooling for all has needed efforts from both sides - governments and communities. The credit goes to governments who provided schooling and to parents who send their children to school. The next journey must be that of ensuring learning for all. Taking parents along on this journey is critical, urgent and long overdue. ASER 2011 shows that 46\% of mothers of children who are in school today have not been to school themselves. At a rough estimate, there are probably 100 million mothers who are like our blue sari mother in Rohtas. New methods and mechanisms need to be innovated on scale to allow mothers to meaningfully participate in discussions and actions related to how children's learning can be improved. Simple tools like those used in ASER are a good starting point. Without real participation of parents, especially mothers, the key objectives of RTE cannot be effectively translated from policy into practice.

"Namaste, I am [name] from [organization] in [district], and I am xx ASERs old".

Every year, the ASER roll out in the field begins around September with state level training workshops for master trainers, one or two from each district in the state. Some come from ASER partner organizations and others from Pratham. There's usually a mix of those who are four, five, or six "ASERs old" and those who are brand new, and this novel way of introducing themselves quickly separates the veterans from the 'freshers'.

So where do all these people - around 1,000 master trainers and 25,000 volunteers each year - actually come from? An incredible variety of partner organizations conduct ASER each year. From the Department of Sheep Husbandry in Kargil to Google in Gurgaon; from IIT Rourkee to Our Carrom Club in M anipur; from District Institutes for Education and Training (DIETs) in Chhattisgarh to the Tejas M ahila Mandal in Nagpur; from Deutsche Bank staff in Hyderabad to high school students all across A runachal Pradesh. These are the institutions that visit 300,000 households and meet 700,000 children each year. Year after year, they make ASER possible.
Given the basic calculation of close to 600 districts $\times 7$ years, one might expect the total number of partners to date to be higher still. But ASER has been fortunate to partner with organizations with a steady presence across multiple districts and even multiple states. For example, Kudumbashree in Kerala has participated in ASER from its inception in 2005, and 'did' ASER in the entire state single handedly for six consecutive years. Then there's Nehru Yuva Kendra, the network of youth clubs whose huge presence across rural India has facilitated ASER every year in multiple districts across ten states.

Many organizations have participated in ASER more than once, and more than $10 \%$ - 200 organizations -are veterans of four or more ASERs. Of these, 18 have been ASER partners every single year, from 2005 to 2011 (see box). M ore than a third of these are located in Jharkhand.
ASER has found twice as many partners in Maharashtra than in any other state, testimony in part to the vibrant presence of colleges and non government organizations, but also due to Pratham's long history and extensive network in the state. On the flip side, there are states and districts where every year there's a long struggle to find partners, and state ASER teams have on occasion come up with creative solutions. In Kargil, the only people willing to travel extensively around

## Veteran ASER partners

## Institutions that have

participated in ASER every year, from 2005 to 2011:

Abhiyan, Jharkhand
Akshara Foundation, Karnataka
Consumer Unity and Trust Society, Rajasthan

EMBARK Youth Association, Karnataka

Gram Jyoti Kendra, Jharkhand
Grassroot, Tamil Nadu
Jawahar Jyoti Bal Vikas Kendra, Bihar

Jiral College, Odisha
Khaira College, Odisha
Kudumbashree, Kerala
Lohardaga Gram Swaraj
Sansthan, Jharkhand
Lok Prerna Kendra, Jharkhand
Mahima College, Odisha
Malenadu Education and Rural Development Society, Karnataka

Nav Bharat Jagriti Kendra, Jharkhand

Sahyogini, Jharkhand
Samajk Parivartan Sansthan, Jharkhand

Sankalp Bahuuddeshiya Prakalp, Maharashtra the district were personnel from the Department of Sheep Husbandry, who were pressed into service three years in a row. In A runachal Pradesh, where colleges and NGOs are few and far between, students from government secondary schools have been regular ASER volunteers.
Across India, some fascinating patterns emerge in terms of the type of organizations that do ASER. In Haryana, the ASER partner lists are heavily populated by colleges, and NGOs are sparse; whereas in Jharkhand, the situation is exactly the reverse. In Nagaland and M eghalaya, ASER is conducted mainly by students' unions, and in Rajasthan, large numbers of B.Ed colleges have joined in.

The increasing participation of DIETs across the country is a very welcome trend. In 2007, all DIETs in Andhra Pradesh were instructed by the State Project Director (SPD) to participate in ASER, but since 2008, they have voluntarily chosen to do so - and have conducted the survey across the entire state for five years in a row now.

[^10]Other states, too, have seen increased participation by DIETs over time, with a total of 48 of them in 9 states taking part in ASER 2011. Given that the ASER exercise is about engaging citizens in producing and thinking about evidence related to outcomes, getting current and future teachers to participate in an assessment of basic learning outcomes may contribute more towards improving 'quality' in elementary education than centrally mandated policy directives ever could.

In the coming years, a major challenge for ASER Centre will be to find ways to systematically build on these relationships with partners, not an easy task given their number and geographical spread, but a critical one if assessment is to lead to action. From 2012, we hope to engage in deeper collaborations with at least some of these institutions in the core areas of capacity building, research and assessment.

Table 1. ASER partners 2005-11, by state and type of institution

| State | Type of partners who participated |  |  |  |  |  | TOTAL |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

# From Mumbai, Multan to Mombasa or Karachi, Kanyakumari to Kilamanjaro...! 

Baela Raza Jamil ${ }^{1}$

In Lahore today (January 2, 2012), we kicked off our week-long training of 35 ASER district and provincial associates from all 9 regions of the country to build capacity for disseminating the results of ASER 2011. The spirit of ASER was buzzing with a unique chemistry of a youthful group. We decided to begin with personal statements on 'aser ne kya aser kiya' (how did ASER impact me?) followed by names and backgrounds in that order. These confessional or declaratory identity markers are vital for the growing global ASER community, for defining ourselves in this unique program of citizen-led surveys. ASER is, after all, about citizens' voices on learning and accountability. It can only be captured through an extension of the personal and the public voice as one, and we at ASER Pakistan are practicing that art of expression that commits to the challenges of learning and improvement - from parents and teacher union members to elected representatives. ASER truly bridges the public and private divide, merging field, theory and practice to address the crises in and opportunities for education.

A journey that began perhaps as education tourism for the Pakistani civil society organizations in the summer of 2006-7 just outside Jaipur, Rajasthan and Delhi through open source sharing, truly hallmarked as the Pratham Way, has now been mainstreamed as an annual ritual for the measuring of education systems in Pakistan for the third year running. UW EZO in East Africa and ASER India are comrades in arms for informing and taking action for the EFA movement. With almost one million children surveyed in 5 countries annually, the methodology for literacy and numeracy measurement in ASER is neither 'quick nor dirty' but very rigorous. As the countdown to 2015 gets underway, the local, national and global community has come to expect that this survey will provide information about progress made and challenges remaining.

Dialogues are intensifying on: whole system/whole school reforms; what assessments tell us about learning gaps across gender and geographies; how to bridge inequality gaps; whether consensus is possible on the theme of 'quality' exacerbating the inequality and transition gaps at all levels of the education spectrum. The ever-widening relevance gap due to knowledge obsolescence in a world inhabited by 7 billion people compels us tow ards perennial renew al of 'learning' interfaced with local contexts and accessible technologies in classrooms and outside. While the centrality of the teacher as the universal provocateur and innovator cannot be minimized, what does this mean for countries diverse in terrain, practices and resources?

Like ASER India, or UWEZO in East Africa, we are deeply cognizant that ASER Pakistan is not about naming and shaming governments but really about calling citizens to action as the primary stakeholders - what is to be done for OUR children and what can we do NOW? On a popular note the India-Pakistan exchanges for ASER and Chalo Parho Barho (let's read and grow) initiatives are affectionately termed as the learning caravans 'from Mumbai to Multan'. As teams navigate the spectrum of emergent relationships from South Asia to Africa in 2012 these could be from M umbai, Multan to M ombasa or from Karachi, Kanyakumari to Kilamanjaro! Either way, the collaborations for people-led research will generate new genres of monitoring and sharing of learning resources. We love them at ITA/SAFED and are proud of the emergent multiple and distributed centers of leadership triggered by ASER India in 2008, and would be happy to support other South Asian countries in this much needed people's enterprise of claiming their fundamental rights to quality education.

[^11]In August 2011, Zippora, Grace and I visited ASER from Uwezo East Africa. The experience in Delhi was refreshing, providing a taste of what Pratham and ASER are doing to promote learning in the various states in India. But besides the walk through Safdarjung, or the night train ride to Lucknow, or even the breath-taking visit to the Taj M ahal, one memory lingers vivid - the contrast I experienced in one rural village, around 30 kilometers from Delhi.

As I cow ardly walked behind my ASER friends to test children in this village, unsure whether the buffaloes would attack (the Kenyan buffalo is extremely wild), some children and mothers disappeared behind doors, not sure what our mission was. Getting them to direct us to a certain household took time as they could not understand well, nor could they read the list of names we attempted to present to them. But anyhow, we always got our feet into the right households. The encounter with so many non-literate parents openly revealed the hard time their children had, trying to break the chains of illiteracy in households without role models. Adults and children looked curiously at me, wondering perhaps which state of India I was from, but lacking the confidence to ask. On a number of occasions, I volunteered, through a translator, to reveal that I came from Africa, a country called Kenya. M ore often than not, this was followed by plain nods of appreciation, with no further discussion.

But a little bit later, we walked into a well-built home, met a neatly-dressed father. Before I could sit down, he requested his daughter to offer me a glass of water. Hardly did I know the hospitality awaiting me. As we rose to proceed to the next household, the man quickly called in Hindi - ask this visitor to remain with us, and tell us more about Africa! This caught me off-guard, after the rhythm of under-confident and non-literate parents. I was confused, since I wanted to experience a little bit more of households and children. But my colleagues were quick to come to a decision - you remain, we will come back to collect you. I sat down again, the man disappeared behind the curtains and reappeared with a bowl of sweets and more water. I learned that he was an advocate. We held discussions in English (with translations for the daughter) comparing learning in India and in Kenya, and analyzing the various challenges related to poor quality of education. The confident and brilliant daughter informed me that she wanted to be a world badminton star, but her priority was also to get good grades in school.
The contrast between these families was very familiar to me, as this is often the inequality between the urban and rural, the poor and the wealthy in most parts of Kenya. But the most disturbing observation relates to the extent to which these inequalities are affecting learning. In Kenya, we have established that children of educated mothers and fathers are by far more likely to remain in school and acquire basic learning competences, as compared to their counterparts whose parents have not completed the primary school cycle. Indeed, girls whose mothers have no schooling are 7 times more likely to be out of school than their peers whose mothers have completed primary education. Yet, the Uwezo Kenya findings reveal that 15\% of fathers and 19\% of mothers had never been to school. This is truly the biggest challenge of literacy. In both Kenya and India, a certain cycle is definitely prevailing - recycling illiteracy down the generations.

My thought is that just as we consider orphans, children with disability and girls as vulnerable children and children with special learning needs, I would argue that children of non-literate parents need to be included in this category. Only if we focus on breaking the illiteracy cycles within these households, can we truly break the illiteracy cycles in our countries.

But thanks for the water and the sweets!

[^12]

## What's new in ASER 2011

The purpose of ASER 2011's rapid assessment survey in rural areas is twofold: (i) to get reliable estimates of the status of children's schooling and basic learning (reading and arithmetic level) at the district level; and (ii) to measure the change in these basic learning and school statistics from last year. Every year a core set of questions regarding schooling status and basic learning levels remains the same. However a set of new questions are added for exploring different dimensions of schooling and learning in the elementary stage. The latter set of questions is different each year.

ASER 2011 brings together elements from various previous ASERs. The core questions on school status and basic reading and arithmetic remain. From 2009-10, we retain questions on paid tuition, parents' education, household and village characteristics. ASER 2011 once again visited one government primary school in every sampled village.

## Sampling Strategy (Household sample - children's learning and enrollment data)

The sampling strategy used helps to generate a representative picture of each district. All rural districts are surveyed. The estimates obtained are then aggregated (using appropriate weights) to the state and all-India levels. Like last year, the sample size is 600 households per district. The sample is obtained by selecting 30 villages per district and 20 households per village.

The villages were randomly selected using the village directory of the 2001 Census. The sampling was done using the PPS (Probability Proportional to Size) sampling technique. PPS is a widely used standard sampling technique and is the appropriate technique to use when the sampling units are of different sizes. In our case, the sampling units are the villages. This method allows villages with larger populations to have a higher chance of being selected in the sample.

In ASER 2010, we retained 10 villages from 2008 and 2009 and added 10 new villages. In ASER 2011 we dropped the 10 villages from ASER 2008, kept the 10 villages from 2009 and 2010 and added 10 more villages from the Census village directory. The 10 new villages were also chosen using PPS. The 20 old villages and the 10 new villages will give us a "rotating panel" of villages, which generates more precise estimates of changes. Since one of the objectives of ASER is to measure the change in learning, creating a panel is a more appropriate sampling strategy.

Each district receives a village list with appropriate block information along with the data from the 2001 Census on total number of households and total population. The village list also specifies which villages are from 2009, from 2010 and which are new villages.

Like past ASERs, the village list is final and cannot be replaced. This is to maintain randomness of the sample to obtain reliable estimates.

## For further information

The ASER team has consulted with national level sampling experts including those at NSSO and ISI. For more information, please email contact@asercentre.org.

Each year since 2005, ASER has been done in practically every rural district in the country. In every district, ASER is conducted by volunteers from a local organization in the district; these are colleges and universities, NGOs, youth groups, women's organizations and others. We estimate that close to 25,000 young people volunteer to do ASER each year. This is how we are able to reach close to $3,00,000$ households and meet more than 7,00,000 children annually. ASER is the largest annual effort to understand the status of schooling and learning of children in India. For such an effort to sustain itself year after year, it is critical to focus on strengthening and improving its internal processes. Training is one of the most important processes that help us to equip our volunteers with skills necessary for surveying a village and assessing children.
Typically, ASER follows a 3 tier training structure. The National Workshop is followed by a state level training in every state. This is followed by district level training where volunteers are trained to conduct the ASER survey.
National Workshop: During this workshop ASER state teams are oriented on ASER processes and survey material for the year is finalized. The workshop is also used to plan for state level trainings and partner selection. Each ASER state team comprises anywhere betw een 2 to 5 full time people, depending on the size and complexity of the state. ${ }^{1}$

New features this year:

- An important feature of the National W orkshop this year was the emphasis given to mock trainings. M embers were informed in advance about the topics they had to train on and thus had an opportunity to plan their content and delivery.
- An elaborate recheck process was designed this year. The formats were piloted in the National Workshop and subsequent discussions during the workshop helped to crystallize the process.
State level training workshops: These workshops prepare Master Trainers who will then take charge of rolling out ASER in their districts. Master Trainers are usually a combination of participants from the district local partners and Pratham team members. Close to 800 M aster Trainers from partner organizations participated in ASER 2011.

Usually, state level trainings are organized for 4 days and have four main components:

- Classroom sessions: To orient the participants on ASER process. Simple presentations and case studies help state teams carry out these sessions.
- Field practice sessions: Every element of ASER is practised extensively in the field. During the workshop, participants and trainers go to nearby villages.
- Mock Training: These sessions are intended to improve the training capabilities of participants and thus prepare them to impart training at the district level.
- Quiz: A quiz is administered tow ards the end of each state level training and immediate feedback is provided to participants. This helps to ensure that all participants have understood the ASER process and to identify participants who may not have obtained the minimal understanding required to conduct ASER.
Performance in mock trainings, field visits and the quiz was analyzed to identify weak Master Trainers, who were either eliminated or provided with additional support during district trainings.

District level training workshops: In the past, these trainings were generally held for 2 days. However, in order to improve the quality of training, the time for training was increased for ASER 2011. Trainings in most districts were organized for 3 days this year. Like state level trainings, the key elements of district trainings included classroom sessions, field practice sessions, and a quiz. Typically, in most districts, volunteers scoring low on the quiz were either eliminated or paired with strong volunteers to carry out the survey.

[^13]Some useful and effective innovations this year included the use of large flex banners. At the district level it is difficult to have a projector to show the survey formats to the whole group while training. To deal with this problem, we printed our survey formats on large flex banners that could be displayed easily while explaining how to fill survey formats to volunteers. These banners are quite portable, easy to use and an effective low cost substitute for projectors.

Another innovation implemented in most states for ASER 2011 was the establishment of a "call centre" to support master trainers and volunteers in the field.

Monitoring of trainings: A few processes were instated to ensure that the important aspects of trainings were implemented across all state and district trainings. Some of these were:

- Call Centre: In most states, a person was assigned to interact with the Master Trainers on a daily basis and ensure that they have taken care of the basic processes in trainings, survey and recheck
- District Compilation Sheet: Survey results for every village in a district were compiled in a district compilation sheet. The sheet also had quiz marks and attendance records for volunteers. A lot of emphasis was given on this sheet for monitoring and recheck and it was ensured that quiz scores and daily attendance of volunteers are entered.
- In addition, most state trainings were attended by the respective Pratham State Head and a member of the Central ASER team.

Our effort each year is to improve our training processes. We have been able to substantially improve the quality of trainings this year. How ever, there is still scope to improve the training skills of our master trainers as well the quality of trainings at the district level. The detailed feedback received from ASER staff as well as from an external consultant will be instrumental in enabling us to make further improvements next year.

## ASER 2011 - Monitoring \& Recheck

The credibility of any survey rests on the validity of its data. Over the past 6 years, many measures have been taken to ensure that the ASER survey is done as well as possible. In 2011, we went one step further. Keeping in mind the cost and time constraints, and drawing on the extensive field experiences of our ASER team from past years, we instituted some new processes with a view to provide more support to the survey in the field and to further strengthen the survey.

## Some of the major changes were:

- Training Duration - Training for volunteers was extended to 3 days in most districts instead of the usual 2 days as in past years.
- Survey Duration - In most districts, the survey was conducted on two consecutive weekends instead of one. This allowed increased amount of monitoring and recheck of villages between the two weekends.
- Purposive M onitoring \& Recheck - Almost everywhere, villages to be monitored and rechecked were selected on the basis of certain predefined criteria. This ensured that poorly surveyed villages could be identified and resurveyed immediately. In previous years, villages to be rechecked were selected randomly
- Documentation - For the first time in ASER 2011, we recorded contact numbers, attendance information and quiz performance of all 25,000 surveyors. These data will be used for further analyses and dissemination purposes.

In ASER 2011, approximately 41\% of all villages surveyed were either monitored or rechecked by Master Trainers.

## Some new features in ASER 2011 for supporting ASER in the field:

- Call Centre - In many states, an ASER call centre was set up at the state level. An ASER team member was responsible for regularly telephoning Master Trainers in every district to monitor the progress of the survey. This ensured instant troubleshooting of problems and prompt support to remote or problematic districts.
- M onitoring and Recheck - This year's process had several new elements and operated at different levels: ${ }^{1}$
- M aster Trainers visited at least four villages per district during the weekends when the survey was in the field.
- M aster Trainers visited $4-8$ villages out of the 30 villages in the district to recheck. These villages were selected based on examining the survey formats that were handed back by the volunteers and a district summary sheet compiled by M aster Trainers.
- A recheck was also done across 14 states and 43 districts by a central team of ASER staff. These were cross-state visits by ASER team members from other states.
- SM S Recheck - In Rajasthan, Gujarat, Chhattisgarh and Himachal Pradesh, M aster Trainers texted testing data to a designated phone number. All the SM Ss could be viewed on and downloaded from a website. These numbers were then analyzed by members of the ASER Central team and recheck villages chosen. This also enabled us to get a sense of the quality of the survey in these states at a very early stage.

In most cases, rechecked villages where problems were found were re-surveyed. If for any reason this was not possible, the data for that village was dropped.

[^14]
## How to make a map and make sections

## To start MAKING A MAP - walk \& talk:

- To get to know the village, walk around the whole village first before you start mapping. Talk to people: How many different hamlets/sections are there in the village? Where are they located? What is the estimated number of households in each hamlet/section? Ask the children to take you around the village. Tell them about ASER. This initial process of walking and talking may take more than an hour.
Map:
- Rough map : It is often helpful to first draw all the roads or paths leading to the village. It helps to first draw a map on the ground so that people around you can see what is being done. Use the help of local people to show the main landmarks - temples, mosques, river, road, school, bus-stop, panchayat bhavan, shop etc. M ark the main roads/streets/paths through the village prominently on the map. If you can, mark the directions - north, south, east, west.
- Final map : Once everyone agrees that this map is a good representation of the village, and it matches with your experience of having walked around the whole village, copy it on to the map sheet that has been given to you.
ONCE THE MAP IS MADE, WE NEED TO PICK 4 SECTIONS OF IT. WE WILL SURVEY 5 HOUSEHOLDS IN EACH SECTION.
- How to mark and number sections on the map you have made?

## 1. VILLAGE WITH HAMLETS

If the village is divided into hamlets:

- Mark the hamlets on the map and indicate approximate number of households in each hamlet.
- If the village consists of more than 4 different hamlets, then make chits with numbers for each hamlet. Randomly pick 4 chits.
- On the map, indicate which hamlets were randomly picked for surveying. If there are 4 or less hamlets, then go to all of these hamlets.
- Do not worry if there are more people in one hamlet than in another. We will survey a hamlet as long as there are households in it.
- Note: Marking selected hamlets on the map is very important. It helps in re-check.

2. VILLAGE WITH LESS THAN 4 HAMLETS

- $\mathbf{2}$ hamlets: Divide each hamlet in 2 parts and take 5 households from each section.
- $\mathbf{3}$ hamlets: Take 7,7 and 6 households from the 3 hamlets respectively.

## WHAT TO DO IF :

- The hamlet has less than 5 households - then survey all the households in the hamlet and survey the remaining households from other hamlets.
- The village has less than 20 households- then survey all the households in the village.

## 3. CONTINUOUS VILLAGE

If it is a village with continuous habitations:

- Divide the entire village into 4 sections geographically.
- For each section, note the estimated number of households.
- We will survey all 4 sections of the village.

## What to do in each section/hamlet

In the entire village, information will be collected from a total of $\mathbf{2 0}$ randomly selected households.
To do this, you need to select 5 households from each of the 4 previously selected hamlets/sections, regardless of the total number of households in each hamlet or section. Use the following procedure:

- Go to each selected hamlet/section. Try to find the central point in that hamlet/section. Stand facing dwellings in the center of the habitation and start household selection from the left.
- Select households to survey using the every 5th household rule. While selecting households count only those dwellings that are residential.
- Household in this case refers to every 'door or entrance to a house from the street'.

## WHAT TO DO IF :

- The household has multiple kitchens: In each house ask how many kitchens or 'chulhas' there are? If there is more than one kitchen in a household, then randomly select any one of the kitchens in that household. You will survey only those individuals who eat from the selected kitchen. After completing survey in this house proceed to next 5th house (counting from the next house on the street, NOT from the next 'Chulha').
- The household has no children: If there are no children at all or no children in the age group 3-16 in the selected household but there are inhabitants, INCLUDE THAT HOUSEHOLD. Take the information about the name of head of the household, total number of members of the household and household assets. Such a household WILL COUNT as one of the 5 surveyed households in each hamlet/section but NO information about mothers or fathers will be collected.
- The house is closed: If the selected house is closed or if there is nobody at home, note that down on your compilation sheet as "house closed". THIS HOUSEHOLD DOES NOT COUNT AS A SURVEYED HOUSEHOLD. DO NOT INCLUDE THIS HOUSEHOLD IN THE SURVEY SHEET. M ove to the next/adjacent open house.
- There is no response: If a household refuses to participate, record the house on your compilation sheet in the "No response" box. However, as above, THIS HOUSEHOLD DOES NOT COUNT AS A SURVEYED HOUSEHOLD. DO NOT INCLUDE THIS HOUSEHOLD IN THE SURVEY SHEET. M ove on to the next adjacent house.
- Continue until you have 5 households in that hamlet/section in which the inhabitants were present, and they participated in the survey. Remember that you need to survey 5 households, regardless of the number of children you find.
- If you have reached the end of the section before 5 households are sampled, go around again using the same every 5th household rule. If a surveyed household gets selected again then go to the next household. Continue till you have 5 households in the section.
- Stop after you have completed $\mathbf{5}$ households in the hamlet/section. Now move to the next selected hamlet/section. Follow the same process using the 5th household rule.
- Make sure that you go to households ONLY when children are likely to be at home. This means that it should be on a Sunday.

How to sample households in a hamlet in a village?

What to do in a house with mutiple kitchens?

## What to do in each household

## 1. General information

Household Number: Write down the household number in every sheet. Write $\mathbf{1}$ for the first household surveyed, $\mathbf{2}$ for the second household surveyed and so on till the $\mathbf{2 0}^{\mathbf{t h}}$ household.

Total number of members in the household who eat from the same kitchen: Ask the adults present and write down the total number. If there are multiple kitchens/'chulhas' in the household, include only those household members who eat from the same kitchen.

## 2. Information about children aged $\mathbf{3 - 1 6}$ years

We will collect information from the sample household about all children age 3-16 who regularly live in the household and eat from the same kitchen. Ask members of the household as well as neighbours to help you identify these children. ALL such children should be included, even if their parents live in another village or if they are the children of the domestic help in the household.

## WHAT TO DO IF:

- There are older children: Often older girls and boys (in the age group 11 to 16) may not be thought of as children. Be sensitive to this issue. Avoid saying "children". Probe about who all live in the household to make sure that nobody in this age group gets left out. Often older children who cannot read are very shy and hesitant about being tested.
- Children not at home: Sometimes children may not be at home during your visit to the house. They may be in the market, fields or even visiting a nearby town/village.If the child is somewhere nearby, but not at home, take down information about the child, like name, age, and schooling status. Ask family members to call the child so that you can speak to her/him directly. If she does not come immediately, mark that household and revisit it once you are done surveying the other households. In case you are unable to meet with the child directly, because she/he may be outside the village, leave the testing information blank.
- There are relatives' children who live in the sample household on regular basis: Sometime you will find children of relatives who live in the sample household. We will include these children because they live in the same household on a regular basis. But we will NOT take information about their parents because they do not live in this household.
- Children not living in the household: If there are children in the family who do not regularly live in the household, for e.g. children who are studying in another village or children who got married and are living elsewhere, we will not include them
- There are visiting children: Do not include children who have come to visit their relatives or friends in the sampled village or household. They do not regularly live in the sample household.

Many children may come up to you and want to be included out of curiosity. Do not discourage children who want to be tested. You can interact with them. But data must be noted down $\underline{\text { ONLY }}$ for children living in the 20 households that have been randomly selected.

Now that we have identified which children to survey, let us review what information to collect about each child. One row of the household format will be used for each child.

- Mother's name: At the beginning of the entry for each child, we will write the name of the child's mother. Note down her name ONLY if she is alive and regularly living in the household. If the child's mother is dead or not living in the household we will NOT write her name.

If the mother has died or has been divorced and the child's stepmother (father's present wife) is living in the household, we will include her as the child's mother.

- Father's background information: At the end of the entry for each child, we ask for the age and schooling information of the child's father. As in the case of the mother, we will only write this information if the father is alive and regularly living in the household. If the father is dead or not living in the household we will not ask for this information.

If the father has died or has been divorced and the child's stepfather (mother's present husband) is living in the household, we will include him as the child's father.

## Child's name, age, sex and schooling status:

The child's name, age and sex should be filled for all children aged 3 to 16 from the sample household selected for the survey.

After noting down these details, there are two main blocks of information about each child.

## Children aged 3-16 years

The first block "For age 3-16" is to be asked for ALL children aged $\mathbf{3}$ to $\mathbf{1 6}$ in the household. On the household sheet:

- Note down if the child is attending anganwadi (ICDS), balwadi, or nursery/LKG/UKG, etc. This information will be recorded in the first column "Anganwadi or Pre-School Status".
- If the child goes to school, this information will be noted in the "Schooling Status" column. Note down their Std., whether they go to government/ private school, madarsa, EGS/AIE or any other school.
- If the child has never been to any anganwadi/preschool or school etc., record it in the "Out of School children (Never enrolled)" column.
- For children who have dropped out of/left school, note this information in the "Out of School (Drop out)" column.
- Probe carefully to find out the class the child was in when she/he left/dropped out of school. Note the class in which the child was studying when she/he dropped out irrespective of the fact whether the child passed or failed in that class.
- Record the actual year when the child left school. E.g. if the child dropped out in 2002 write ' 2002 '. Similarly if the child dropped out in the last few months write '2011'.

## Children aged 5-16 years

The remaining blocks of information "For age 5-16" are to be filled ONLY for children aged 5 to $\mathbf{1 6}$.

- Ask all children if they take any tuition, meaning paid classes in addition to regular school and note the response in "Tuition" column. If yes, ask if any school teacher takes the tuition class attended by the child. The school teacher could be teaching in ANY school, not necessarily the school where the child studies. If the child does not take tuition, do not ask this question.
- Also ask children if they attend the specific school which you have/will be surveying and note it in the "Does child go to the surveyed school" section.
- Askthe child/ parent what the official 'medium of instruction' in the child's school is.
- All children in this age group will be tested in basic reading and basic math. (We know that younger children will not be able to read much or do sums but still follow the same process for all children so as to keep the process uniform).

## 3. Mother's background information

We will ask some additional questions about the mother of each child in the age group 3-16 years who has been surveyed. We will ONLY ask this information about mothers whose names have been recorded earlier, against individual children's name. No other mothers will be included.

If the mother is not present in the household at the time of the survey, ask other adults/members in the family and note down the information.

For each mother, we will ask her age, whether she has attended school or not and if yes, up to what class has she studied. Note down the class that she has successfully completed/passed. For example, if she has gone to school but says that she did not complete Std 1, enter 0 under 'Std. completed'.

## 4. Children living outside the village ( $10-16$ years)

Ask the child/adult the names of all children of the sampled household in the age group of 10-16 who live outside the village. (More than 6 months in a year)

- The child from the sampled household means that if the child had been staying in the household, she would have eaten from the same kitchen/chulha.
- Living outside means

1. The child has been living away from home for more than 6 months a year, or
2. The child left home in the last 6 months and will be living away for more than 6 months a year in the future.

## 5. Household indicators

All information on household indicators is to be recorded based, as much as possible, on observation and evidence. However, if for some reason you cannot observe it note down what is reported by household members only and not by others.

- Type of house the child lives in: Types of houses are defined as follows:
- Pucca House: A pucca house is one which has walls and roof made of the following material:
- Wall material: Burnt bricks, stones (packed with lime or cement), cement concrete, timber, ekra etc
- Roof M aterial: Tiles, GCI (Galvanised Corrugated Iron) sheets, asbestos cement sheet, RBC (Reinforced Brick Concrete), RCC (Reinforced Cement Concrete), timber etc.
- Kutcha House: A Kutcha house is one which has walls and/or roof which are made of material other than those mentioned above, such as un-burnt bricks, bamboos, mud, grass, reeds, thatch, loosely packed stones, etc.
- Semi-Pucca house: A house that has fixed walls made of pucca material but the roof is made of material other than those used for pucca house.

## - Electricity in the household:

- Mark yes or no by observing if the household has wires/electric meters and fittings or not.
- If there is an electricity connection, ask whether the household had electricity any time on the day of your visit, not necessarily when you are doing the survey.
- Toilets: Mark yes or no by observing if there is a constructed toilet in the house. If you are not able to observe, then ASK whether there is a constructed toilet or not.
- Television: M ark yes or no by observing if the house has a television or not. If you don't see one, ASK. It does not matter if the television is in working condition or not.
- Cable TV: If there is a TV in the household, ask whether there is cable TV. This includes any cable facility which is paid for by the household (including Direct To Home (DTH) facility).
- Mobile phone: Mark yes if any member of the household owns a mobile phone.
- Reading material
- New spaper: M ark yes if the household gets a newspaper every day.
- Other reading material: This includes story books, magazines, religious books, comics etc. but does not include calendars.

## 6. Other Questions for the household:

Computer skills in the household: M ark yes if anyone in the household knows how to use a computer. This question should be asked to the family members. Do not observe.
Language spoken in the household: Ask the child which language is spoken at home by the family members. Please refer to the list of languages and put the appropriate code in the given box.
Write down the code of the language told by the respondent, regardless of what you may think the household speaks at home. If the language mentioned by the respondent is not in the Language Code List, then write 999. For eg., if the respondent says 'Avadhi' is the language spoken at home, and 'Avadhi' is not in the Language Code List, then write 999.

If the family says they speak more than one language in the household, then find out which is the main language spoken at home. Accordingly, record ONLY 1 LANGUAGE CODE in the household format.

## From 2005 to 2011: Evolution of ASER

## ASER 2005

Age group 6-14
Children were asked

- Enrollment status
- Type of school

Children also did:

- Reading tasks
- Arithmetic tasks

School visits

## Sampling :

Randomly selected
20 ASER 2005 villages

## ASER 2008

Age group 3-16
Children were asked

- Enrollment status
- Type of school

Children 5-16 also did:

- Reading tasks
- Arithmetic tasks
- Telling time
- Currency tasks

Mother's education

Household characteristics
Village information

## Sampling :

Randomly selected
10 ASER 2006 villages
10 ASER 2007 villages
10 new ASER 2008 villages
ASER 2006
Age group 3-16
Children were asked

- Enrollment status
Type of school
Children 5-16 also did:
Reading tasks
- Crithmetic tasks
- Writing tasks
M other's education
M others were also asked to
read a simple text

## Sampling :

Randomly selected
20 ASER 2005 villages
10 new ASER 2006 villages

## ASER 2009

Age group 3-16
Children were asked

- Enrollment status
- Type of school
- Tuition status
- Pre-school status (Age 5-16)

Children 5-16 also did:

- Reading tasks
- Arithmetic tasks
- English tasks

M other's education Father's education M others were also asked to read a simple text

Household characteristics
Village information
School visits

## Sampling:

Randomly selected
10 ASER 2007 villages
10 ASER 2008 villages

[^15]
## ASER 2011 : Reading tasks

## All children were assessed using a simple reading tool. The reading test has 4 categories:

- Letters : Set of commonly used letters.
- Words: Common familiar words with 2 letters and 1 or 2 matras.
- Level 1 (Std 1 ) text: Set of 4 simple linked sentences, each having no more than $4-5$ words. These words or their equivalent are in the Std 1 textbook of the state.
- Level 2 (Std 2 ) text: " Short" story with 7-10 sentences. Sentence construction is straightforward, words are common and the context is familiar to children. These words or their equivalent are in the Std 2 textbook of the state.

## पढ़ने की जाँच (3)

Sample: Hindi basic reading test में बहुत काले-काले बादल छाये थे। ठंडी-ठंडी हवा चल रही थी मुझे बाहर झूला झूलने का मन किया। बड़े भैया एक मोटी सी रस्सी लेकर बाहर आये। भैया ने रस्सी को पेड़ से लटकाकर झूला बनाया। सब ने मिलकर ख़ब झूला झूला। बाकी बच्चे भी आकर मज़े से झूलने लगे। झूलते-झूलते रात हो गई।

In developing these tools in each state language, care is taken to ENSURE

- Comparability with the previous years' tools with respect to word count, sentence count, type of word and conjoint letters in
words
- Compatibility with the vocabulary and sentence construction used in Std 1 and Std 2 language textbooks of the state
- Familiarity with words and context through extensive field piloting

## How to test reading?

## PARAGRAPH

## START

 HERE:Ask the child to read either of the 2 paragraphs.
Let the child choose the paragraph herself. If the child does not choose give her any one paragraph to read. Ask her to read it. Listen carefully to how she reads.

## The child is not at 'Paragraph Level' if she:

- Reads the text like a string of words, rather than a sentence.
- Reads the text haltingly and stops very often.

OR

- Reads the text fluently but with more than 3 mistakes.

If the child is not at 'Paragraph Level' then ask the child to read words.

## WORDS

Ask the child to read any 5 words from the word list.
Let the child choose the words herself. If she does not choose, then point out words to her.
The child can read words, if she:

- Reads at least $\mathbf{4}$ out of the $\mathbf{5}$ words with ease.

If the child is at 'Word Level', then ask her to try to read the paragraph again and then follow the instructions for paragraph level testing.
If she can correctly and comfortably read words but is still struggling with the paragraph, then mark the child at 'Word Level'.
If the child is not at word level (cannot correctly read at least 4 out of the 5 words chosen), then show her the list of letters.

The child can read a paragraph, if she:

- Reads the text like she is reading a sentence, rather than a string of words.
- Reads the text fluently and with ease, even if she is reading slowly.
- Reads the text with not more than $\mathbf{3}$ mistakes.

If the child can read a paragraph, then ask the child to read the story.

Ask the child to read the story.
The child is at 'Story Level' if she:

- Reads the text like she is reading a sentence, rather than a string of words.
- Reads the text fluently and with ease. The child may read slowly.
- Reads the text with not more than $\mathbf{3}$ mistakes.

If the child is at 'Story Level' then mark the child at story level.
If the child is not at 'Story Level', then mark the child at 'Paragraph Level'.

## LETTERS

Ask the child to read any 5 letters from the letters list.
Let the child choose the letters herself. If she does not choose, then point out letters to her.
The child can read letters, if she:

- Correctly recognizes at least $\mathbf{4}$ out of 5 letters with ease.

[^16]
## ASER 2011 : Arithmetic tasks

All children were assessed using a simple arithmetic tool. The arithmetic test has 4 categories:

- Number recognition 1 to 9: randomly chosen numbers between 1 to 9
- Number recognition 11 to 99: randomly chosen numbers between 11 to 99
- Subtraction: 2 digit numerical problems with borrowing
- Division: 3 digit by 1 digit numerical problems.

## How to test arithmetic?

## SUBTRACTION: 2 DIGIT WITH BORROWING

Show the child the subtraction problems. She can choose a problem, if not you can point.
Ask the child what the numbers are and then ask her to identify the subtraction sign.
If the child is able to identify the numbers and the sign, ask her to write and solve the problem. Observe to see if the answer is correct.
Even if the first subtraction problem is answered wrong, still ask the child to solve the second question with the same method.
If the child makes a careless mistake, then give her another chance with the same question.

If she cannot do both subtraction problems correctly, then give her the number recognition (1199) task. Even if the child can do one subtraction problem correctly, give her the number recognition (11-99) task.

## NUMBER RECOGNITION (11-99)

Point one by one to 5 numbers. Child can also choose.
Ask her to identify the numbers.
If she can correctly identify at least $\mathbf{4}$ out of 5 numbers then mark her as a child who can "recognize numbers from 11-99."

If she cannot recognize numbers from 11-99, then give her the number recognition (1-9) task.

If she does both the subtraction problems correctly, ask her to do a division problem.

## DIVISION 3 digit by 1 digit

Show the child the division problems. She can choose one to try. If not, then you pick one.
Ask her to write and solve the problem.
Observe what she does. If she is able to correctly solve the problem, then mark her as a child who can do "division". Note: The quotient and the remainder both have to be correct.
If the child makes a careless mistake, then give her another chance with the same question.

If the child is unable to solve a division problem correctly, mark her as a child who can do "subtraction".

## NUMBER RECOGNITION (1-9)

Point one by one to 5 numbers. Child can also choose.
Ask her to identify numbers.
If she can correctly identify at least 4 out of 5 numbers then mark her as a child who can
" recognize numbers from 1-9."
If not, mark her as a child who " cannot recognize numbers" or "nothing".

## What to do in a school?

## GENERAL INSTRUCTIONS

- Visit any government school in the village with classes from Std 1 to 7/8. If there is no school in the village which has classes from 1 to 7/8, then visit the government school with the highest enrollment in Std 1 to 4/ 5. If the village does not have a government school with primary classes, do not visit any school.
- In the top box of the School Observation Sheet, put a tick according to the school type.
- Note the time of entry, date and day of visit to the school.
- M eet the Head M aster(HM ). If the HM is absent, then meet the senior most teacher of the school. Explain the purpose and history of ASER and give the 'Letter to the $\mathrm{HM}^{\prime}$. Be very polite. Assure the HM and teachers that the name of the school will not be shared with anybody.
- Ask the HM for the enrollment registers or any official document on the enrollment in that school.

## Section 1: Children's Enrollment \& Attendance

- Ask to see the registers of all the standards and fill in the enrollment. If a standard/class has many sections, then take total enrollment.
- Then move around to the classes/areas where children are seated and take down their attendance classw ise by counting them yourself. You may need to seek help from the teachers to distinguish children class-w ise as they are normally found seated in mixed groups. In such a case, ask children from each standard to raise their hands. Count the number of raised hands and accordingly fill the same in the observation sheet, class - wise. Please note that only children who are physically present in the class while you are counting should be included.
- Attendance of class with many sections: Take headcount of the individual sections, add them up and then write down the total attendance.

## Section 2: Note the official language used as the medium of instruction

## Section 3: Teachers

- Ask the HM and note down the number of teachers appointed. The number of regular government teachers does not include the Head M aster. Acting HM will be counted as a regular teacher. HM on deputation will be counted under the regular HM category.
- If the school has para-teachers, mark them separately. In many states para-teachers are called by different names such as Shiksha Mitra, education volunteer etc.
- Observe and count how many $\mathrm{HM} /$ /teachers are present and note the information.

## Section 4: Classroom Observations- ONLY FOR STD 2 and STD 4

- This section is for Std. $\mathbf{2}$ and Std. $\mathbf{4}$ only. If there is more than one section for a class, then randomly choose any one to observe. You may need to seek help from the teachers to distinguish children class-wise as they are normally found seated in mixed groups.
- Observe the seating arrangement of children. See whether children of each class are sitting alone or with children of other classes.
- Observe where children are sitting (in classroom, in the verandah or outside) and fill accordingly.
- Observe whether there is a blackboard where they are sitting and what is the condition of the blackboard (write on the blackboard) and fill accordingly.
- Observe if there was any other teaching material available like charts on the wall, board games etc. where they are sitting. (M aterial painted on the walls of the classroom does not count as teaching material.)

## Section 5: Mid Day Meal (MDM)

- Ask the HM/any other teacher whether the MDM was served in the school on the day of the visit today.
- Observe if there is a kitchen/shed for cooking the M DM .
- Observe whether the MDM was served in the school on the day of the visit. (Look for the evidence of the MDM in the school like dirty utensils or meal bought from outside). M ark accordingly.

## Section 6: Facilities in the school

- Count the total number of pucca rooms in the school excluding toilets and kitchen shed. Then count the number of rooms being used for teaching purposes.
- Observe if there is an office/store/office cum store. M ark yes if you observe any one of these.
- Observe if there is a play ground (Definition of Playground: it should be within the school premises with a level playing field and/or school playing equipment eg: slide, swings etc).
- Observe if there are library books in the school (Even if kept in a cupboard).
- Observe if library books are being used by children.

Observe if there is a hand pump/tap which can be used for drinking water and if so, whether you could drink the water. If not, check whether any other drinking water facility is available.

- Observe if the school has a complete boundary wall or complete fencing.
- Observe if there are computers in the school to be used by children and if yes, then did you see children using computers.

## Section 7: School Grant Information (SSA)

Assure the HM and others that the name of the school will not be shared with anybody. Ask the person answering this section about the grants very politely. If the person refuses to answer or is hesitant to answer this section, then do not force the person and move on to the next section.

- For this section, note down information separately for financial year 2010-11 (1 ${ }^{\text {st }}$ Apr 2010-31 ${ }^{\text {st }}$ March 2011) and financial year 2011-12 (1st Apr 2011 - until the date of the survey).
- The HM should be asked this section (In the absence of the Head Master, ask the senior most teacher present). Tick the type of school/standard and the designation of the person being asked (Head Master/ Regular teacher/ Para teacher).
- In case of school with Std. 1-7/8 with 2 separate HM s, and with separate SSA bank accounts, please take the grants information for the primary section (Std. 1-4/5) only.

## Section 8: SSA Annual Grants

This section is divided into two parts - one for financial year 2010-11 (1st Apr 2010-31 ${ }^{\text {st }}$ Mar 2011) and one for financial year 2011-12 ( $1^{\text {st }}$ Apr 2011 - until the date of the survey).
For each time period, ask if the school got four grants viz. School Maintenance Grant (SMG), School grant or School Development Grant (SDG), Teachers Grant/ Teacher Learning Material (TLM) and new classroom grant.
If yes, then put a tick under 'Yes' column
Otherw ise:

- If the HM / the respondent says that he/she has not received the grant or says that he/she is going to receive the grant in the future, then mark under 'No' column.
- If the HM / respondent has no knowledge of whether or not the school has received the grant, then mark under 'Don't know' column.
If school has received the grant, then ask whether the entire amount was spent or not. Keep the following points in mind while marking this question:
- Did you spend the full amount: Mark 'Yes' only if the full amount was spent. M ark 'No' if nothing has been spent or any amount less than full has been spent. M ark 'Don't know', if the HM is not aware of whether the money has been spent or not.
Please Note: If there is a school with standards 1-7/8, and there are 2 HM 's and 2 SSA bank accounts for section $1-4 / 5$ and $5 / 6-7 / 8$, then note the grant information only for the primary section (Standard 1-4/5).

## Section 9: Activities carried out in the school (Since April 2010)

This section has two parts. First we want to know whether the listed activities have taken place. Second we want to know which grant was used to undertake the activity.
Ask if the school has done white wash /plastering, painting blackboard/ display board, building repairs (roof, floor, wall) etc, since April 2010. Then tick the appropriate box and then mark the grant under which this activity was undertaken.
Note: There can be 3 different answers to this question. First option is SDG and/or SM G. If either SDG or SM G was used, then please tick 'SDG/SM G or both'. If TLM was used, then please tick 'TLM'. If its neither of these 3 grants but some other grant/source, then please tick on 'Any other grant' and if the respondent says that the activity has happened but he doesn't remember the grant, then please tick on 'Don't know'.

## Section 10: Meeting with officials

Take information for this section only from the HM. If the HM is not available, then skip this section.
How often does the HM meet the officials at the Block, Cluster and District level: M ark accordingly.

- If the HM says once in 14-15 days or twice a month or fortnightly, please mark '2 times a month'.
- If the HM says once in 29-30 days or once in a month, please mark under 'monthly'.
- If the HM says once in 2-3 months or 4 times a year or quarterly, please mark 'Once in 2-3 months'.
- If the HM says twice a year, or once in 6 months, please mark 'Once in 6 months'.
- If the HM does not meet the particular official at all, please mark 'Never'.

## Section 11: Toilet facility in the school

- Observe whether the school has a common toilet, a separate toilet for girls, a separate toilet for boys and a separate toilet for teachers. Ask the HM / any teacher/ any child if you cannot tell who the toilets are for.
- For each type of toilet facility that you find in the school, note whether it is locked or not. If it was not locked, note whether it was usable or not.
- If 2 common toilets or other type of toilets are there in the school then take information about the toilet which is in a better condition.

## IMPORTANT:

After filling out the School Observation sheet, get the HM 's name and contact number. W rite this information in the relevant box given on the top right of pg 2 in the format. This is essential for recheck purposes.

## School and home language information in ASER 2011

The Right to Education Act recommends that the child's " medium of instruction shall, as far as practicable, be in the child's mother tongue" (Chapter V, Section 29, Clause 2 (f)). Several studies have indicated that children whose home language is different from the school language have lower attendance and learning levels. ${ }^{1}$

Given this background, for the first time in ASER, in 2011 we recorded the child's home language. This enables us to see how many children have a home language background that is different from the medium of instruction in school.

Given the multiplicity of Indian languages and dialects, finalising a list of languages that could be used for the survey was a mammoth task in itself. As a starting point, we took into consideration the list of 22 scheduled languages mentioned in Census 2001. ${ }^{2}$ We also consulted experts at the Central Institute of Indian Languages, Mysore. Their suggestion was that in addition to the list of scheduled languages list, we could also include a list of 100 non-scheduled languages. A further list of 234 mother-tongue languages was also suggested. ${ }^{3}$ (In the M other tongue list, Hindi is listed in 49 different ways! )

Including all three lists would have given us a list with over 350 languages. While this would have made the survey much more comprehensive, it posed quite a few problems for our volunteers and for data analysis. All these languages would have to be coded and extreme care would have to be taken in the field to fill in the codes correctly, which would have proved to be a cumbersome and complicated process in the field. Hence, given that this was our first attempt to engage with the question of language, we decided to use the list of 22 scheduled and 100 non-scheduled languages from Census 2001.

## For data collection, ASER volunteers were given the follow ing instructions:

- Ask the child or any adult in the household which language is spoken at home, by the family members. Refer to the list of languages and put in the appropriate code in the given box.
- If the family says they speak more than one language in the household, then find out which is the main language spoken at home. Accordingly, write ONLY ONE LANGUAGE CODE in the household format.
- Write down the code of the language mentioned by the respondent, regardless of what you may think the household speaks at home. If this language is not in the 'Language Code List', then write 999. For eg., if the respondent says 'Avadhi' is the language spoken at home, and 'Avadhi' is not coded in the 'Language Code List', then write 999.

## ASER 2011 (Rural) Findings

## The proportion of children currently not enrolled in school is declining

- In ASER 2011, the proportion of children in the 6-14 age group not currently enrolled in school is 3.3\%, down from 6.6\% in 2006. In 2010, this number was $3.4 \%$.
- 11 to 14 year old girls are the hardest to keep in school. Rural India shows substantial progress on this front. The figure for out of school girls (11-14) was $10.3 \%$ in 2006. It has declined to $5.2 \%$ in 2011.
- Many of the states that had a high proportion (over 10\%) of 11-14 year old girls out of school in 2006 have made significant progress. In 2011, this proportion was lower than the All India average of $5.2 \%$ in states like Bihar ( $4.5 \%$ ), West Bengal $(4.3 \%)$ and Chhattisgarh $(4.3 \%)$. Uttar Pradesh has shown the least progress with $11.1 \%$ girls in this age group out of school in 2006 and $9.7 \%$ in 2011.
- Substantial numbers of five year old children are enrolled in school. The All India figure stands at 57.8\% for 2011. This proportion varies across states, ranging from $87.1 \%$ in Nagaland to $18.8 \%$ in Karnataka.

## Private school enrollment is rising in most states

- Nationally, private school enrollment has risen year after year for the 6-14 age group, increasing from 18.7\% in 2006 to $25.6 \%$ in 2011.
- Two states in the country, Kerala and Manipur, have more than $60 \%$ of children enrolled in private schools. In both these states the proportion of aided private schools is high. According to ASER 2011 data, between 30 to $60 \%$ of children in rural areas of Haryana, Uttar Pradesh, Nagaland, Meghalaya, Punjab, Jammu \& Kashmir, Rajasthan, Uttarakhand, M aharashtra and Andhra Pradesh are enrolled in private schools.
- Tamil Nadu shows an increase of 11.6 percentage points in private school enrollment between 2007 and 2011. In Uttar Pradesh, private school enrollment has increased from 39.3\% in 2010 to 45.4\% in 2011.

## Reading levels showing decline in many states

- Nationally, reading levels have declined in many states across North India. The All India figure for the proportion of children in Std V able to read a Std 2 level text has dropped from $53.7 \%$ in 2010 to $48.2 \%$ in 2011. However, in a few states there is good news. In Gujarat, Punjab and Tamil Nadu the numbers for 2011 are better than for 2010. Several states in the north-eastern region of India also show positive change. Karnataka and Andhra Pradesh numbers remain unchanged from last year.
- Similar trends are observed in the proportion of Std III children able to read at least a Std I level text. In addition to the states mentioned above, Himachal Pradesh does not show any decline in Std III reading levels.

## Arithmetic levels also show a decline across most states

- Basic arithmetic levels also show a decline. Nationally, the proportion of Std III children able to solve a 2 digit subtraction problem with borrowing has dropped from $36.3 \%$ in 2010 to $29.9 \%$ in 2011. This decline is visible in almost every state; only Andhra Pradesh, Karnataka and Tamil Nadu show improvements from 2010 to 2011. Several states in the north-eastern region of India also show positive change. There is no change in arithmetic levels for Std III in Gujarat.
- Among Std V children the ability to do the same task has dropped from 70.9\% in 2010 to 61.0\% in 2011.

## A quarter of all rural children attend primary schools where the medium of instruction is different from their home language ${ }^{1}$

- ASER 2011 recorded children's home and school language for the first time. The data indicates that children's home language was different from the school's medium of instruction for one out of four children surveyed. This figure does not include most states of the North East or Jammu \& Kashmir. ${ }^{2}$

## Incidence of tuition is higher in Eastern states

- In both government and private schools, between 20 to $25 \%$ of all children attend paid tuition classes outside school. This number varies considerably by state and by grade level. The proportion of children going to paid tutors remains high in the Eastern states of Odisha, Bihar and West Bengal, where private school enrollment is very low. Kerala is another state with a high incidence of tuition.

## School observations

The school information reported in ASER is collected during a visit to one government school with primary sections in each sampled village.

## Teachers' attendance is high

- In ASER 2011, an average of about $87 \%$ of all appointed teachers were observed to be in school on the day of the visit. Gujarat stands out with $95.6 \%$ teachers attending in primary schools. Ten major states had teacher attendance figures that were 90\% or higher.

## Children's attendance of concern in some states

- At the All India level, children's attendance shows a decline from 73.4\% in 2007 to $70.9 \%$ in 2011 in rural primary schools. The decline is slightly steeper in upper primary schools, where it decreased from $75.6 \%$ in 2007 to $71.9 \%$ in 2011. In some states, children's attendance shows a sharp decline over time: for example in primary schools of Bihar, average attendance of children was $59.0 \%$ in 2007 and $50.0 \%$ in 2011 . In M adhya Pradesh this figure has fallen from 67.0\% in 2007 to 54.5\% in 2011; in Uttar Pradesh from 64.4\% (2007) to 57.3\% (2011) and in M anipur from 76.7\% in 2007 to 52.3\% in 2011.

## More than half of all Std 2 and Std 4 classes are multigrade

- For Std 2 and Std 4, ASER observes whether children in these classes are sitting together with children from other classes. Nationally, for rural primary schools, more than half of all classes visited were multigrade. For example Std 2 was sitting with one or more other classes in $58.3 \%$ of primary schools and $57.6 \%$ of schools with upper primary sections. In Jammu and Kashmir, Jharkhand and M eghalaya, more than $80 \%$ of observed Std 2 and 4 classrooms in primary schools were multigrade.

## Computers increasingly available in upper primary schools

- Almost a third of upper primary schools visited had computers (30.8\%). In addition, in several states, the proportion of schools where children were observed using computers was high - for example Kerala (78.7\% ), Tamil Nadu (51.1\%) , Gujarat (31.0\%) and M aharashtra (30.6\%).
- In contrast, only $7.9 \%$ of all government primary schools visited had computers. Kerala is a noteworthy exception, with $78.5 \%$ of primary schools having computers and $52.3 \%$ primary schools where children were observed using them.

[^20]
## Schools get their grants, but not on time

- Between FY 2008-9 and FY 2010-11 the flow of SSA grants to schools improved significantly. However, this improvement occurred largely between FY 2008-9 and 2009-10. In fact a marginal decrease in the proportion of schools receiving grants is observed between FY 2009-10 and 2010-11.
- The data suggest that schools tend to get their grants during the second half of the fiscal year. There is a slight drop in the proportion of schools receiving grants in the first half of the fiscal year between 2010-11 and 2011-12.

## RTE Indicators

## Not much change in compliance on PTR and CTR

- At the All India level, there has been a marginal improvement in the proportion of schools complying with RTE norms on pupil-teacher ratio, from $38.9 \%$ in 2010 to $40.7 \%$ in 2011. In 2011, Kerala stands out with $94.1 \%$ of schools in compliance, and in Jammu \& Kashmir, Nagaland and Manipur, more than $80 \%$ schools are in compliance with these norms.
- At the All India level, there has been a marginal decline in the proportion of schools with at least one classroom per teacher, from $76.2 \%$ in 2010 to $74.3 \%$ in 2011. In Mizoram, $94.8 \%$ of schools comply with the teacher-classroom norms and in Punjab, Uttarakhand, Rajasthan, Uttar Pradesh, Gujarat and Maharashtra more than $80 \%$ of schools are in compliance.

## No major changes in building, playground and boundary wall provision

- All India figures for 2011 show no significant improvement in the proportion of schools with an office cum store. This figure remains at $74 \%$. Similarly, for the country has a whole, about $62 \%$ of visited schools had a playground, both in 2010 and in 2011. However, there has been an increase in the proportion of all schools that have a boundary wall, from $50.9 \%$ in 2010 to $54.1 \%$ in 2011.

## Drinking water provision unchanged

- Nationally, the proportion of schools with no provision for drinking water remained almost the same $17.0 \%$ in 2010 and $16.6 \%$ in 2011. In the North East, the proportion of schools with no water provision ranged from 23.8\% in Assam to 87.3\% in M anipur in 2011.
- The proportion of schools with a useable drinking water facility has remained steady at about $73 \%$. Kerala has the best record with $93.8 \%$ schools that have a useable drinking water facility.

## Better provision of girls' toilets

- The All India proportion of schools with working toilets has increased marginally from 47.2\% in 2010 to 49.1\% in 2011.
- The proportion of schools where there was no separate girls' toilet has declined from 31.2\% in 2010 to $22.6 \%$ in 2011. Also, there has been a substantial improvement in the proportion of schools that have separate girls' toilets that are useable. This figure has risen from 32.9\% in 2010 to $43.8 \%$ in 2011.

## More libraries in schools, and more children using them

- The proportion of schools without libraries has declined from $37.5 \%$ in 2010 to $28.6 \%$ in 2011. Children were seen using the library in more schools as well - up from $37.9 \%$ in 2010 to $42.3 \%$ in 2011.

## India rural

ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 558 OUT OF 583 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6 -14 ALL | 69.9 | 25.6 | 1.1 | 3.3 | 100 |
| Age: 7-16 ALL | 68.0 | 25.7 | 1.0 | 5.3 | 100 |
| Age: 7-10 ALL | 71.5 | 25.3 | 1.3 | 1.9 | 100 |
| Age: 7-10 BOYS | 69.3 | 27.8 | 1.2 | 1.8 | 100 |
| Age: 7-10 GIRLS | 74.1 | 22.5 | 1.4 | 2.1 | 100 |
| Age: 11-14 ALL | 68.7 | 25.6 | 0.9 | 4.8 | 100 |
| Age: 11-14 BOYS | 66.8 | 28.0 | 0.9 | 4.4 | 100 |
| Age: 11-14 GIRLS | 70.8 | 23.1 | 0.9 | 5.2 | 100 |
| Age: 15-16 ALL | 57.0 | 27.0 | 0.8 | 15.3 | 100 |
| Age: 15-16 BOYS | 56.8 | 27.9 | 0.7 | 14.6 | 100 |
| Age: $15-16$ GIRLS | 57.2 | 25.9 | 0.8 | 16.1 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS.
'мот in SCHool' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $10.3 \%$ in 2006 to $7.3 \%$ in 2007 to $7.2 \%$ in 2008 to $6.8 \%$ in 2009 to $5.7 \%$ in 2010 to $5.2 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 26.5 | 43.0 | 17.5 | 7.5 | 5.5 |  |  |  |  |  |  |  | 100 |
| II | 4.1 | 14.6 | 38.8 | 28.0 | 6.3 | 5.0 | 3.3 |  |  |  |  |  | 100 |
| III |  | . 1 | 12.0 | 41.8 | 23.6 | 11.3 | 2.7 | 4.5 |  |  |  |  | 100 |
| IV | 4.3 |  |  | 13.8 | 34.7 | 30.9 | 7.1 | 5.8 | 3.4 |  |  |  | 100 |
| V | 5.5 |  |  |  | 8.3 | 42.9 | 24.0 | 12.1 | 3.5 | 3.8 |  |  | 100 |
| VI | 3.7 |  |  |  |  | 12.5 | 35.0 | 33.3 | 8.8 | 6.8 |  |  | 100 |
| VII | 4.9 |  |  |  |  |  | 9.5 | 42.5 | 27.2 | 10.3 | 5.6 |  | 100 |
| VIII | 4.5 |  |  |  |  |  |  | 13.8 | 39.1 | 28.7 | 9.9 | 4.1 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $41.8 \%$ children are 8 years old but there are also $12.0 \%$ who are $7,23.6 \%$ who are 9 , $11.3 \%$ who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | In LKG/ UKG | In School |  |  | $\begin{aligned} & \overline{8} \\ & \overline{=0} \\ & \frac{0}{0} \\ & \overline{0} \\ & \vdots \\ & \vdots \\ & \vdots \\ & \vdots \end{aligned}$ | $\begin{aligned} & \overline{N 0} \\ & \stackrel{0}{0} \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Govt | Pvt | Other |  |  |
| Age 5 | 25.9 | 10.3 | 36.8 | 19.8 | 1.3 | 6.0 | 100 |

Chart 3: Trends over time
Five year olds in pre-school \& school 2007, 2009 \& 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 38.4 | 39.4 | 15.3 | 3.9 | 3.0 | 100 |
| II | 16.6 | 34.6 | 28.3 | 11.8 | 8.7 | 100 |
| III | 8.5 | 22.9 | 28.4 | 21.5 | 18.8 | 100 |
| IV | 4.7 | 14.4 | 21.2 | 25.7 | 34.2 | 100 |
| V | 3.5 | 9.7 | 14.6 | 24.1 | 48.2 | 100 |
| VI | 1.7 | 5.8 | 9.3 | 20.5 | 62.8 | 100 |
| VII | 1.2 | 4.0 | 6.3 | 16.2 | 72.4 | 100 |
| VIII | 1.0 | 2.6 | 4.3 | 12.7 | 79.4 | 100 |
| Total | 10.4 | 17.8 | 16.6 | 16.9 | 38.3 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $8.5 \%$ children cannot even read letters, $22.9 \%$ can read letters but not more, 28.4\% can read words but not Std 1 text or higher, $21.5 \%$ can read Std 1 text but not Std 2 level text, and $18.8 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 4: Trends over time

\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language*

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 74.7 |
| Home language is different from school language | 25.4 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

* This table does not include data for Jammu and Kashmir, Manipur, Assam, Nagaland, Tripura, Meghalaya, Mizoram \& Arunachal Pradesh. Please consult the respective state pages for the language tables.

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | :---: | :---: | ---: | :---: |
|  |  | 1 -9 | $11-99$ |  |  |  |
| I | 36.5 | 42.2 | 16.9 | 3.2 | 1.2 | 100 |
| II | 15.0 | 38.5 | 32.8 | 11.0 | 2.7 | 100 |
| III | 7.5 | 26.9 | 35.7 | 23.2 | 6.7 | 100 |
| IV | 3.8 | 17.2 | 30.6 | 32.3 | 16.1 | 100 |
| V | 2.9 | 12.0 | 24.1 | 33.5 | 27.6 | 100 |
| VII | 1.6 | 7.4 | 18.8 | 32.8 | 39.4 | 100 |
| VII | 1.3 | 5.0 | 15.4 | 30.0 | 48.3 | 100 |
| VIII | 1.1 | 3.4 | 12.5 | 26.3 | 56.8 | 100 |
| Total | 9.5 | 20.3 | 23.8 | 23.4 | 22.9 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 7.5\% children cannot even recognize numbers 1-9, 26.9\% can recognize numbers up to 9 but not more, 35.7 \% can recognize numbers to 99 but cannot do subtraction, $23.2 \%$ can do subtraction but not division, and $6.7 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## India rubal

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 9: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | :---: | :---: | :---: | :---: |
| Std I-IV/V: Primary | 9230 | 9389 | 8419 | 8473 |
| Std I-VII/VIII: Primary + Upper primary | 4836 | 5359 | 5821 | 5810 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha A bhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. M ore detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in M arch 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

How much goes to each school

For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per $\quad$ This grant can be used for primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$ Rs 12000 if the school is Std I-VIIIVIII.

Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises. buying school equipment such as blackboard, sitting mats etc. Also for buying chalk, duster, registers and other office equipment.

The grant amount varies by type of school: whether it is a primary or upper primary school.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^22]

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 22 OUT OF 22 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6 -14 ALL | 62.3 | 34.7 | 0.3 | 2.8 | 100 |
| Age: 7-16 ALL | 61.1 | 32.9 | 0.2 | 5.7 | 100 |
| Age: 7-10 ALL | 59.9 | 38.7 | 0.3 | 1.1 | 100 |
| Age: 7-10 BOYS | 54.9 | 44.1 | 0.2 | 0.8 | 100 |
| Age: 7-10 GIRLS | 64.8 | 33.5 | 0.3 | 1.4 | 100 |
| Age: 11-14 ALL | 66.4 | 28.3 | 0.3 | 5.1 | 100 |
| Age: 11-14 BOYS | 63.1 | 32.5 | 0.2 | 4.2 | 100 |
| Age: 11-14 GIRLS | 69.5 | 24.2 | 0.3 | 6.0 | 100 |
| Age: 15-16 ALL | 50.7 | 28.4 | 0.2 | 20.7 | 100 |
| Age: 15-16 BOYS | 48.9 | 31.9 | 0.1 | 19.1 | 100 |
| Age: 15-16 GIRLS | 52.4 | 25.2 | 0.2 | 22.2 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS 'мот in school' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $8.6 \%$ in 2006 to $8.1 \%$ in 2007 to $6.6 \%$ in 2008 to $10.8 \%$ in 2009 to $6.6 \%$ in 2010 to $6.0 \%$ in 2011

## Table 2: Sample description

\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 24.2 | 44.2 | 20.1 | 8.0 | 3.5 |  |  |  |  |  |  |  | 100 |
| II | 2.4 | 14.1 | 49.1 | 22.7 | 8.3 | 3.5 |  |  |  |  |  |  | 100 |
| III | 1. | . 6 | 13.8 | 47.6 | 24.0 | 9.0 | 4.0 |  |  |  |  |  | 100 |
| IV | 2.5 |  |  | 14.9 | 48.8 | 22.1 | 8.2 | 3.5 |  |  |  |  | 100 |
| V | 2.7 |  |  |  | 7.9 | 55.7 | 21.9 | 9.2 | 2.5 |  |  |  | 100 |
| VI | 1.6 |  |  |  |  | 11.8 | 48.7 | 30.3 | 6.4 | 1.3 |  |  | 100 |
| VII | 1.8 |  |  |  |  |  | 10.7 | 54.5 | 24.6 | 6.7 | 1.8 |  | 100 |
| VIII | 2.9 |  |  |  |  |  |  | 13.0 | 55.3 | 21.9 | 6.8 |  | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $47.6 \%$ children are 8 years old but there are also $13.8 \%$ who are $7,24.0 \%$ who are 9 9.0\% who are 10 years old, etc

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | $\begin{aligned} & \text { In LKG/ } \\ & \text { UKG } \end{aligned}$ | In School |  |  |  | $\stackrel{\square}{0}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Govt | Pvt | Other |  |  |
| Age 5 | 16.4 | 18.8 | 33.0 | 30.0 | 0.1 | 1.8 | 100 |
| Age 6 | 1.3 | 9.6 | 49.0 | 39.2 | 0.2 | 0.8 | 100 |

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 19.6 | 48.7 | 25.1 | 4.2 | 2.4 | 100 |
| II | 5.7 | 27.7 | 40.4 | 15.5 | 10.8 | 100 |
| III | 2.8 | 11.9 | 31.1 | 29.9 | 24.3 | 100 |
| IV | 1.7 | 5.9 | 18.0 | 31.1 | 43.3 | 100 |
| V | 1.3 | 3.9 | 11.1 | 23.7 | 60.1 | 100 |
| VI | 0.5 | 1.8 | 6.8 | 20.0 | 70.9 | 100 |
| VII | 0.3 | 1.9 | 4.4 | 13.4 | 80.0 | 100 |
| VIII | 0.4 | 0.8 | 2.5 | 10.2 | 86.1 | 100 |
| Total | 4.4 | 13.8 | 18.5 | 18.9 | 44.5 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $2.8 \%$ children cannot even read letters, $11.9 \%$ can read letters but not more, $31.1 \%$ can read words but not Std 1 text or higher, $29.9 \%$ can read Std 1 text but not Std 2 level text, and $24.3 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.
Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 69.2 |
| Home language is different from school language | 30.8 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Andhra Pradesh rural 

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 -9 | $11-99$ |  |  |  |
| I | 16.5 | 42.1 | 37.3 | 3.4 | 0.7 | 100 |
| II | 4.0 | 21.1 | 54.9 | 17.5 | 2.4 | 100 |
| III | 1.9 | 7.6 | 44.5 | 39.9 | 6.1 | 100 |
| IV | 1.0 | 2.8 | 27.6 | 44.7 | 23.9 | 100 |
| V | 1.0 | 2.3 | 18.3 | 40.1 | 38.2 | 100 |
| VII | 0.6 | 0.6 | 11.5 | 35.2 | 52.2 | 100 |
| VII | 0.4 | 0.9 | 10.9 | 29.0 | 58.8 | 100 |
| VIII | 0.4 | 0.4 | 9.2 | 24.6 | 65.4 | 100 |
| Total | 3.5 | 10.5 | 28.0 | 29.4 | 28.7 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 1.9\% children cannot even recognize numbers 1-9, 7.6\% children can recognize numbers up to 9 but not more, $44.5 \%$ can recognize numbers to 99 but cannot do subtraction, $39.9 \%$ can do subtraction but not division, and $6.1 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 11.0 | 16.4 | 17.0 | 18.6 | 20.8 | 17.3 | 24.6 | 13.5 | 17.8 |
|  | Pvt | 24.8 | 29.0 | 33.1 | 31.5 | 37.6 | 31.7 | 36.7 | 28.5 | 30.9 |
| 2009 | Govt | 21.2 | 22.9 | 24.7 | 22.3 | 24.7 | 22.4 | 24.1 | 19.8 | 22.9 |
|  | Pvt | 31.6 | 40.6 | 36.7 | 37.4 | 37.1 | 40.4 | 35.3 | 39.2 | 36.7 |
| 2010 | Govt | 12.0 | 13.7 | 14.7 | 14.7 | 12.6 | 17.3 | 13.2 | 13.0 | 13.9 |
|  | Pvt | 23.5 | 26.3 | 25.0 | 29.8 | 26.4 | 32.9 | 22.9 | 24.4 | 26.3 |
| 2011 | Govt | 11.6 | 14.8 | 16.7 | 16.2 | 18.4 | 12.6 | 14.6 | 9.8 | 14.5 |
|  | Pvt | 20.0 | 25.1 | 27.6 | 29.0 | 31.5 | 29.8 | 26.4 | 29.5 | 26.8 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Andhra Pradesh rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | ---: | ---: | ---: | ---: |
| Std I-IV/N: Primary | 379 | 477 | 475 | 510 |
| Std I-VII/VIII: Primary + Upper primary | 229 | 156 | 157 | 132 |
| Total schools visited | 608 | 633 | 632 | 642 |

## Student and teacher attendance

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

How much goes to each school

For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per $\quad$ This grant can be used for primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$
Rs 12000 if the school is Std I-VIIIVIII.

Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^24]

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## Arunachal Pradesh rural

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 11 OUT OF 13 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | ---: | ---: | ---: | :---: |
| Age: 6-14 ALL | 78.9 | 17.0 | 0.3 | 3.8 | 100 |
| Age: 7-16 ALL | 79.3 | 15.3 | 0.4 | 5.0 | 100 |
| Age: 7-10 ALL | 78.3 | 18.2 | 0.3 | 3.2 | 100 |
| Age: 7-10 BOYS | 77.9 | 19.3 | 0.4 | 2.4 | 100 |
| Age: 7-10 GIRLS | 79.0 | 16.7 | 0.2 | 4.2 | 100 |
| Age: 11-14 ALL | 81.9 | 13.6 | 0.2 | 4.3 | 100 |
| Age: 11-14 BOYS | 81.3 | 14.8 | 0.4 | 3.5 | 100 |
| Age: 11-14 GIRLS | 82.6 | 12.1 | 0.0 | 5.3 | 100 |
| Age: 15-16 ALL | 77.2 | 10.3 | 0.7 | 11.8 | 100 |
| Age: 15-16 BOYS | 76.2 | 11.3 | 0.9 | 11.6 | 100 |
| Age: 15-16 GIRLS | 78.4 | 9.0 | 0.6 | 12.1 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS. 'мот in SCHool' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $8.7 \%$ in 2006 to $6.9 \%$ in 2007 to $5.6 \%$ in 2008 to $5.7 \%$ in 2009 to $4 \%$ in 2010 to $5.3 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 34.1 | 32.4 | 15.8 | 8.7 | 9.0 |  |  |  |  |  |  |  | 100 |
| II | 10.1 | 16.0 | 34.0 | 18.3 | 9.5 | 6.6 | 5.5 |  |  |  |  |  | 100 |
| III | 2.6 | 9.2 | 14.8 | 26.4 | 20.2 | 16.9 | 9.9 |  |  |  |  |  | 100 |
| IV |  | . 7 | 6.5 | 14.2 | 22.6 | 23.2 | 10.4 | 11.1 | 9.2 |  |  |  | 100 |
| V | 8.7 |  |  |  | 10.0 | 32.4 | 12.8 | 16.1 | 8.2 | 5.8 | 5.9 |  | 100 |
| VI | 6.8 |  |  |  |  | 13.5 | 15.2 | 27.9 | 17.4 | 8.9 | 5.2 | 5.1 | 100 |
| VII | 8.1 |  |  |  |  |  | 6.4 | 23.3 | 22.5 | 17.5 | 13.3 | 9.1 | 100 |
| VIII | 4.0 |  |  |  |  |  |  | 12.6 | 18.4 | 26.5 | 22.4 | 16.1 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $26.4 \%$ children are 8 years old but there are also $14.8 \%$ who are $7,20.2 \%$ who are $9,16.9 \%$ who are 10 years old, etc.

## Young children in pre-school and school

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 17.5 | 41.4 | 32.2 | 6.2 | 2.7 | 100 |
| II | 6.8 | 26.4 | 42.3 | 15.7 | 8.8 | 100 |
| III | 3.8 | 13.0 | 35.6 | 27.0 | 20.6 | 100 |
| IV | 1.1 | 8.2 | 20.8 | 31.9 | 38.0 | 100 |
| V | 1.6 | 5.6 | 11.6 | 26.0 | 55.2 | 100 |
| VI | 1.4 | 3.1 | 6.7 | 19.0 | 69.7 | 100 |
| VII | 0.4 | 3.8 | 5.3 | 15.7 | 74.8 | 100 |
| VIII | 0.7 | 2.4 | 3.9 | 13.3 | 79.7 | 100 |
| Total | 4.8 | 14.9 | 22.8 | 20.0 | 37.5 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $3.8 \%$ children cannot even read letters, $13 \%$ can read letters but not more, $35.6 \%$ can read words but not Std 1 text or higher, $27 \%$ can read Std 1 text but not Std 2 level text, and $20.6 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 4: Trends over time <br> \% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 -9 | $11-99$ |  |  |  |
| I | 14.8 | 35.7 | 43.5 | 4.1 | 2.0 | 100 |
| II | 5.7 | 21.0 | 52.6 | 16.1 | 4.7 | 100 |
| III | 4.2 | 12.7 | 37.7 | 35.4 | 10.0 | 100 |
| IV | 1.8 | 6.9 | 18.0 | 49.1 | 24.3 | 100 |
| V | 1.1 | 6.5 | 12.9 | 39.3 | 40.2 | 100 |
| VI | 1.3 | 2.7 | 7.7 | 30.9 | 57.4 | 100 |
| VII | 1.4 | 2.4 | 6.9 | 24.3 | 65.0 | 100 |
| VIII | 0.7 | 1.3 | 3.5 | 20.5 | 73.9 | 100 |
| Total | 4.4 | 12.8 | 26.2 | 27.9 | 28.7 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 4.2\% children cannot even recognize numbers 1-9, 12.7\% children can recognize numbers up to 9 but not more, $37.7 \%$ can recognize numbers to 99 but cannot do subtraction, $35.4 \%$ can do subtraction but not division, and $10 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | IIII | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 7.8 | 8.2 | 8.9 | 11.1 | 11.9 | 13.1 | 10.8 | 17.9 | 10.5 |
|  | Pvt | 37.1 | 40.5 | 48.6 | 54.6 | 50.1 | 55.4 | 34.3 | 43.3 | 45.5 |
| 2009 | Govt | 9.4 | 9.5 | 11.5 | 12.1 | 10.9 | 12.8 | 15.4 | 16.5 | 11.9 |
|  | Pvt | 50.3 | 48.5 | 50.7 | 51.7 | 45.4 | 49.1 | 37.1 | 43.3 | 48.3 |
| 2010 | Govt | 8.6 | 8.6 | 8.4 | 10.6 | 10.0 | 10.0 | 10.4 | 8.6 | 9.3 |
|  | Pvt | 51.0 | 26.9 | 28.5 | 36.3 | 34.4 | 42.1 | 38.9 | 25.8 | 35.0 |
| 2011 | Govt | 7.8 | 8.1 | 7.3 | 10.0 | 8.8 | 9.8 | 9.5 | 10.7 | 8.8 |
|  | Pvt | 30.1 | 25.8 | 28.9 | 21.9 | 28.0 | 27.1 | 27.1 | 26.3 | 27.0 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Arunachal Pradesh rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | :---: | :---: | :---: | ---: |
| Std I-IV/V: Primary | 135 | 138 | 152 | 136 |
| Std I-VIINIII: Primary + Upper primary | 105 | 138 | 107 | 71 |
| Total schools visited | 240 | 276 | 259 | 207 |

## Student and teacher attendance

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to |
| :---: | :--- |
| each school |$\quad$ For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$ Rs 12000 if the school is Std I-VII/VIII

Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for buying school equipment such as blackboard, sitting mats etc. Also for buying chalk, duster, registers and other office equipment.

The grant amount varies by type of school: whether it is a primary or upper primary school.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## ASSの

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 22 OUT OF 23 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6 -14 ALL | 77.8 | 14.5 | 3.5 | 4.2 | 100 |
| Age: 7-16 ALL | 75.4 | 14.4 | 3.5 | 6.7 | 100 |
| Age: 7-10 ALL | 80.1 | 14.8 | 3.0 | 2.2 | 100 |
| Age: 7-10 BOYS | 78.7 | 15.7 | 2.9 | 2.6 | 100 |
| Age: 7-10 GIRLS | 81.6 | 13.7 | 3.1 | 1.6 | 100 |
| Age: 11-14 ALL | 75.0 | 13.8 | 4.1 | 7.1 | 100 |
| Age: 11-14 BOYS | 73.2 | 14.3 | 3.9 | 8.6 | 100 |
| Age: 11-14 GIRLS | 76.9 | 13.4 | 4.3 | 5.5 | 100 |
| Age: 15-16 ALL | 62.0 | 14.9 | 3.4 | 19.6 | 100 |
| Age: 15-16 BOYS | 60.3 | 13.5 | 3.1 | 23.1 | 100 |
| Age: 15-16 GIRLS | 63.9 | 16.5 | 3.9 | 15.7 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS.
'NOT IN SCHOOL' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 5\% in 2006 to $9.9 \%$ in 2007 to $8.3 \%$ in 2008 to $6.4 \%$ in 2009 to $7.4 \%$ in 2010 to $5.5 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 26.1 | 40.6 | 21.2 | 7.6 | 4.4 |  |  |  |  |  |  |  | 100 |
| II | 3.8 | 14.0 | 39.2 | 29.7 | 7.4 | 5.9 |  |  |  |  |  |  | 100 |
| III |  | 3.2 | 14.1 | 39.2 | 28.2 | 9.9 | 5.4 |  |  |  |  |  | 100 |
| IV | 3.3 |  |  | 14.8 | 30.1 | 36.5 | 7.5 | 7.8 |  |  |  |  | 100 |
| V | 5.6 |  |  |  | 7.8 | 39.7 | 28.1 | 12.0 | 6.7 |  |  |  | 100 |
| VI | 3.9 |  |  |  |  | 11.6 | 27.7 | 39.3 | 11.4 | 6.1 |  |  | 100 |
| VII | 4.1 |  |  |  |  |  | 7.2 | 36.5 | 32.3 | 13.2 | 6.6 |  | 100 |
| VIII | 3.6 |  |  |  |  |  |  | 13.4 | 31.8 | 37.4 | 9.8 | 4.0 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $39.2 \%$ children are 8 years old but there are also $14.1 \%$ who are $7,28.2 \%$ who are 9 , 9.9\% who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | In LKG/ UKG | In School |  |  |  | $\begin{aligned} & \overline{\mathrm{T}} \\ & \stackrel{0}{0} \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Govt | Pvt | Other |  |  |
| Age 5 | 35.6 | 2.9 | 45.1 | 12.5 | 1.4 | 2.6 | 100 |
| Age 6 | 6.5 | 2.5 | 70.9 | 14.8 | 3.4 | 2.0 | 100 |

Chart 3: Trends over time
Five year olds in pre-school \& school 2007, 2009 \& 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 36.2 | 40.0 | 17.3 | 4.2 | 2.3 | 100 |
| II | 16.0 | 34.8 | 30.3 | 13.2 | 5.8 | 100 |
| III | 8.5 | 22.2 | 33.7 | 20.6 | 14.9 | 100 |
| IV | 4.3 | 15.0 | 28.6 | 26.7 | 25.4 | 100 |
| V | 3.7 | 12.6 | 20.8 | 26.7 | 36.2 | 100 |
| VI | 2.6 | 7.0 | 15.9 | 25.4 | 49.2 | 100 |
| VII | 1.9 | 4.2 | 12.7 | 23.0 | 58.1 | 100 |
| VIII | 2.0 | 2.8 | 8.0 | 18.2 | 69.0 | 100 |
| Total | 11.0 | 19.4 | 21.7 | 19.1 | 28.9 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $8.5 \%$ children cannot even read letters, $22.2 \%$ can read letters but not more, $33.7 \%$ can read words but not Std 1 text or higher, 20.6\% can read Std 1 text but not Std 2 level text, and $14.9 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 4: Trends over time <br> \% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Note: This tool was also available in Bodo, Bangla, English and Hindi.

## Chart 5: Trends over time <br> \% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| \% Children who took the reading test in:** | \% | Of the \% Children who tested in:** | \% Children whose home language was: |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Assamese | Bengali | Bodo | Karbi/M ikir | Other * | Total |
| Assamese | 82.9 | Assamese | 44.5 | 17.2 | 2.5 | 3.1 | 32.8 | 100 |
| Bengali | 14.2 | Bengali 1.1 89.7 5.7 0.2 3.2 100 <br> * 'Other' includes all languages from the list of scheduled and non-scheduled languages except those specified above. Data for home language of children tested in Hindi and English has not been reported here due to small cell sizes. <br> ** Data in this table does not include the following districts - Bongaigaon, Darrang, Kokrajhar and Nalbari. The data for these four districts is being processed. |  |  |  |  |  |  |
| Hindi | 1.6 | * 'Other' includes all languages from the list of scheduled and non-scheduled languages except those specified above. Data for home language of children tested in Hindi and English has not been reported here due to small cell sizes. <br> ** Data in this table does not include the following districts - Bongaigaon, Darrang, Kokrajhar and Nalbari. The data for these four districts is being processed. |  |  |  |  |  |  |
| English | 1.3 |  |  |  |  |  |  |  |
| Total | 100.0 |  |  |  |  |  |  |  |

Note: In ASER 2011 for every state, reading tools were provided in the main medium of instruction of government schools. In Assam, children were given the choice of reading in Assamese, Bengali, Hindi, English or Bodo. Figures for Bodo have not been included as they are currently being processed. For home languages, a list of 122 languages was provided to all survey teams. This included 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 -9 | $11-99$ |  |  |  |
| I | 32.9 | 48.9 | 14.7 | 2.9 | 0.7 | 100 |
| II | 14.5 | 42.9 | 33.6 | 8.0 | 1.0 | 100 |
| III | 6.6 | 32.3 | 37.6 | 20.4 | 3.1 | 100 |
| IV | 4.3 | 21.6 | 37.1 | 28.3 | 8.7 | 100 |
| V | 3.3 | 17.4 | 33.0 | 32.4 | 14.0 | 100 |
| VI | 2.7 | 8.6 | 28.6 | 36.5 | 23.7 | 100 |
| VII | 2.2 | 7.0 | 22.3 | 37.6 | 31.0 | 100 |
| VIII | 1.9 | 4.4 | 18.7 | 36.2 | 38.8 | 100 |
| Total | 9.9 | 25.4 | 28.4 | 23.4 | 12.9 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 6.6\% children cannot even recognize numbers 1-9, 32.3\% children can recognize numbers up to 9 but not more, $37.6 \%$ can recognize numbers to 99 but cannot do subtraction, $20.4 \%$ can do subtraction but not division, and $3.1 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 7.8 | 11.4 | 15.5 | 17.2 | 20.6 | 26.0 | 28.2 | 33.7 | 18.2 |
|  | Pvt | 16.3 | 30.0 | 32.2 | 31.0 | 24.0 | 24.4 | 29.3 | 38.7 | 27.3 |
| 2009 | Govt | 11.0 | 12.9 | 13.8 | 19.0 | 20.7 | 23.0 | 21.6 | 29.4 | 18.0 |
|  | Pvt | 24.2 | 29.0 | 31.2 | 40.5 | 30.7 | 27.8 | 30.3 | 27.9 | 29.6 |
| 2010 | Govt | 8.0 | 9.2 | 12.6 | 14.8 | 17.8 | 18.5 | 22.2 | 26.5 | 15.2 |
|  | Pvt | 22.6 | 30.7 | 24.8 | 35.1 | 28.7 | 28.2 | 27.7 | 30.4 | 28.2 |
| 2011 | Govt | 6.8 | 12.5 | 12.6 | 15.2 | 14.7 | 18.7 | 21.8 | 24.3 | 15.0 |
|  | Pvt | 24.4 | 29.5 | 30.2 | 31.5 | 34.3 | 27.9 | 33.3 | 36.9 | 30.6 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## ASSam RURAL

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | ---: | ---: | ---: | ---: |

|  | Payment of bills (electricity, water, cleaning etc.) | 16.2 | 79.3 | 4.5 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

How much goes to each school

For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per $\quad$ This grant can be used for primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$
Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^29]

5
$5+1$ Headteacher
Pupil-Teacher Ratio (excluding Headteacher) shall not exceed 40

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 37 OUT OF 37 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6 -14 ALL | 90.1 | 5.5 | 1.5 | 3.0 | 100 |
| Age: 7-16 ALL | 89.4 | 5.1 | 1.3 | 4.1 | 100 |
| Age: 7-10 ALL | 90.4 | 5.9 | 1.6 | 2.1 | 100 |
| Age: 7-10 BOYS | 89.1 | 7.4 | 1.5 | 2.0 | 100 |
| Age: 7-10 GIRLS | 92.0 | 4.1 | 1.6 | 2.3 | 100 |
| Age: 11-14 ALL | 90.3 | 4.7 | 1.1 | 3.9 | 100 |
| Age: 11-14 BOYS | 89.6 | 5.9 | 1.1 | 3.4 | 100 |
| Age: 11-14 GIRLS | 91.2 | 3.3 | 1.0 | 4.5 | 100 |
| Age: 15-16 ALL | 83.1 | 3.4 | 1.4 | 12.2 | 100 |
| Age: 15-16 BOYS | 82.8 | 3.7 | 1.3 | 12.2 | 100 |
| Age: 15-16 GIRLS | 83.7 | 2.9 | 1.5 | 11.9 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS.
'мот in SCHool' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $17.6 \%$ in 2006 to $9.7 \%$ in 2007 to $8.8 \%$ in 2008 to $6 \%$ in 2009 to $4.6 \%$ in 2010 to $4.5 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 23.4 | 42.0 | 17.1 | 10.4 | 7.0 |  |  |  |  |  |  |  | 100 |
| II | 5.1 | 15.3 | 25.2 | 33.8 | 7.0 | 8.9 | 4.9 |  |  |  |  |  | 100 |
| III | 4.8 |  | 9.6 | 33.7 | 20.2 | 20.1 | 3.4 | 8.3 |  |  |  |  | 100 |
| IV | 5.2 |  |  | 14.4 | 16.5 | 37.7 | 8.3 | 11.7 | 6.4 |  |  |  | 100 |
| V | 7.4 |  |  |  | 6.8 | 31.5 | 19.6 | 21.0 | 5.8 | 7.9 |  |  | 100 |
| VI | 4.4 |  |  |  |  | 14.8 | 16.5 | 37.7 | 13.2 | 8.3 | 5.2 |  | 100 |
| VII | 1.6 |  |  |  |  | 6.3 | 7.2 | 31.1 | 25.5 | 16.4 | 8.0 | 4.0 | 100 |
| VIII | 6.5 |  |  |  |  |  |  | 15.4 | 23.2 | 31.5 | 15.6 | 7.7 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $33.7 \%$ children are 8 years old but there are also $9.6 \%$ who are $7,20.2 \%$ who are 9 , 20.1\% who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | In LKG/ UKG | In School |  |  |  | $\begin{aligned} & \overline{\widetilde{0}} \\ & \stackrel{0}{0} \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Govt | Pvt | Other |  |  |
| Age 5 | 46.3 | 2.9 | 40.5 | 4.8 | 1.4 | 4.2 | 100 |
| Age 6 | 12.1 | 2.0 | 75.5 | 5.7 | 2.0 | 2.7 | 100 |

Chart 3: Trends over time
Five year olds in pre-school \& school 2007, 2009 \& 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 53.9 | 30.6 | 9.4 | 3.1 | 3.1 | 100 |
| II | 25.9 | 35.1 | 23.1 | 8.5 | 7.5 | 100 |
| III | 12.9 | 26.2 | 29.1 | 16.5 | 15.4 | 100 |
| IV | 7.1 | 17.0 | 21.1 | 24.2 | 30.7 | 100 |
| V | 4.7 | 10.3 | 13.9 | 21.6 | 49.5 | 100 |
| VI | 2.1 | 5.9 | 8.3 | 16.6 | 67.0 | 100 |
| VII | 1.6 | 3.2 | 4.8 | 12.4 | 78.0 | 100 |
| VIII | 1.6 | 1.8 | 3.2 | 9.3 | 84.2 | 100 |
| Total | 16.4 | 18.7 | 15.5 | 14.0 | 35.5 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, 12.9\% children cannot even read letters, $26.2 \%$ can read letters but not more, $29.1 \%$ can read words but not Std 1 text or higher, $16.5 \%$ can read Std 1 text but not Std 2 level text, and $15.4 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 47.0 |
| Home language is different from school language | 53.0 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 I-9 | I1-99 |  |  |  |
| I | 51.0 | 35.0 | 9.1 | 3.3 | 1.6 | 100 |
| II | 23.2 | 40.5 | 22.7 | 9.3 | 4.4 | 100 |
| III | 11.2 | 29.5 | 29.7 | 20.7 | 8.9 | 100 |
| IV | 5.5 | 18.1 | 26.7 | 30.6 | 19.1 | 100 |
| V | 3.7 | 11.7 | 17.5 | 30.2 | 36.9 | 100 |
| VI | 2.2 | 6.2 | 11.3 | 26.8 | 53.5 | 100 |
| VII | 1.4 | 3.5 | 8.7 | 21.6 | 64.8 | 100 |
| VIII | 1.7 | 2.1 | 5.6 | 16.2 | 74.3 | 100 |
| Total | 14.9 | 21.0 | 17.6 | 19.3 | 27.3 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 11.2\% children cannot even recognize numbers 1-9, 29.5\% children can recognize numbers up to 9 but not more, $29.7 \%$ can recognize numbers to 99 but cannot do subtraction, $20.7 \%$ can do subtraction but not division, and $8.9 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 23.9 | 31.5 | 37.9 | 39.9 | 42.3 | 44.2 | 51.6 | 54.8 | 37.7 |
|  | Pvt | 53.3 | 56.5 | 64.1 | 65.1 | 66.6 | 67.2 | 70.3 | 65.8 | 61.6 |
| 2009 | Govt | 32.9 | 38.5 | 43.4 | 47.4 | 51.2 | 56.5 | 55.9 | 61.0 | 46.1 |
|  | Pvt | 53.2 | 62.9 | 68.7 | 65.8 | 68.5 | 73.4 | 73.3 | 66.4 | 64.0 |
| 2010 | Govt | 31.8 | 38.8 | 42.3 | 46.9 | 55.5 | 55.9 | 59.8 | 63.6 | 47.7 |
|  | Pvt | 41.5 | 37.6 | 62.7 | 66.5 | 63.7 | 66.9 | 67.7 | 65.0 | 54.8 |
| 2011 | Govt | 31.5 | 38.3 | 41.8 | 48.2 | 50.9 | 55.4 | 58.9 | 63.0 | 46.7 |
|  | Pvt | 53.0 | 60.9 | 66.7 | 60.5 | 66.6 | 61.9 | 64.5 | 63.0 | 60.8 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Bihar RURAL

Facilitated by PRATHAM
As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | ---: | ---: | ---: | ---: |
| Std I-IV/N: Primary | 481 | 353 | 265 | 252 |
| Std I-VII/VIII: Primary + Upper primary | 491 | 607 | 702 | 770 |
| Total schools visited | 972 | 960 | 967 | 1022 |

## Student and teacher attendance

|  | Payment of bills (electricity, water, cleaning etc.) | 15.7 | 81.0 | 3.3 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

How much goes to each school

For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per $\quad$ This grant can be used for primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$
Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^30]
## Right to Education indicators

## Table 17: Schools by total enrollment 2010 and 2011

| School <br> enrollment | 2010 |  | 2011 |  |

As part of ASER 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. During this school visit, RTE indicators were observed and are reported here.

Extracts from the Schedule of The Right of Children to Free and Compulsory Education Act 2009 Norms and standards for a School (Sections 19 and 25)

## Number of teachers in Std 1-5:

- Admitted children
<= 60
61-90
91-120
121-200
> 150
$>200$
No. of teachers
2
3
4
5
$5+1$ Headteacher
Pupil-Teacher Ratio (excluding Headteacher) shall not exceed 40

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## Chhattisgarh rural

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 15 OUT OF 16 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | ---: | ---: | ---: | ---: |
| Age: 6 -14 ALL | 86.4 | 11.0 | 0.2 | 2.4 | 100 |
| Age: 7-16 ALL | 84.8 | 10.3 | 0.2 | 4.8 | 100 |
| Age: 7-10 ALL | 86.4 | 12.3 | 0.2 | 1.1 | 100 |
| Age: 7-10 BOYS | 86.2 | 12.8 | 0.1 | 0.9 | 100 |
| Age: 7-10 GIRLS | 86.7 | 11.7 | 0.3 | 1.4 | 100 |
| Age: 11-14 ALL | 87.1 | 8.7 | 0.2 | 4.0 | 100 |
| Age: 11-14 BOYS | 87.4 | 8.6 | 0.3 | 3.8 | 100 |
| Age: 11-14 GIRLS | 86.9 | 8.8 | 0.1 | 4.3 | 100 |
| Age: 15-16 ALL | 75.9 | 9.4 | 0.1 | 14.6 | 100 |
| Age: 15-16 BOYS | 75.1 | 9.6 | 0.1 | 15.3 | 100 |
| Age: 15-16 GIRLS | 76.8 | 9.3 | 0.2 | 13.7 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS
'мот in school' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $13.6 \%$ in 2006 to $8.5 \%$ in 2007 to $8.7 \%$ in 2008 to $4.9 \%$ in 2009 to $3.2 \%$ in 2010 to $4.3 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 17.4 | 62.2 | 16.6 | 3.8 |  |  |  |  |  |  |  |  | 100 |
| II | 2.2 | 10.0 | 44.6 | 36.7 | 6.4 |  |  |  |  |  |  |  | 100 |
| III |  | 2.7 | 7.8 | 40.8 | 40.2 | 8.6 |  |  |  |  |  |  | 100 |
| IV | 3.1 |  |  | 8.6 | 33.1 | 43.8 | 6.3 | 5.1 |  |  |  |  | 100 |
| V | 8.4 |  |  |  |  | 34.0 | 41.4 | 10.6 | 5.7 |  |  |  | 100 |
| VI | 1.9 |  |  |  |  | 7.5 | 29.9 | 45.7 | 10.2 | 4.9 |  |  | 100 |
| VII | 3.1 |  |  |  |  |  | 6.2 | 30.1 | 43.1 | 12.6 | 4.9 |  | 100 |
| VIII | 3.8 |  |  |  |  |  |  | 8.6 | 25.7 | 44.7 | 13.0 | 4.2 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $40.8 \%$ children are 8 years old but there are also $7.8 \%$ who are $7,40.2 \%$ who are 9 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | $\begin{aligned} & \text { In LKG/ } \\ & \text { UKG } \end{aligned}$ | In School |  |  |  | ¢0 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 36.0 | 49.0 | 11.1 | 2.4 | 1.5 | 100 |
| II | 11.8 | 46.6 | 28.7 | 8.4 | 4.5 | 100 |
| III | 5.6 | 27.5 | 36.9 | 20.2 | 9.8 | 100 |
| IV | 2.9 | 14.5 | 27.9 | 29.5 | 25.2 | 100 |
| V | 2.3 | 10.1 | 15.5 | 28.2 | 44.0 | 100 |
| VI | 1.6 | 5.5 | 9.5 | 22.1 | 61.3 | 100 |
| VII | 1.0 | 5.4 | 7.5 | 16.0 | 70.2 | 100 |
| VIII | 0.7 | 4.0 | 3.7 | 12.4 | 79.2 | 100 |
| Total | 7.9 | 20.6 | 17.9 | 17.6 | 36.1 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $5.6 \%$ children cannot even read letters, $27.5 \%$ can read letters but not more, $36.9 \%$ can read words but not Std 1 text or higher, 20.2\% can read Std 1 text but not Std 2 level text, and $9.8 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$

## Chart 4: Trends over time

\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 0.6 |
| Home language is different from school language | 99.4 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Chhattisgarh rubal 

## Arithmetic

Table 6: \% Children by class and ARITHM ETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 I-9 | $11-99$ |  |  |  |
| I | 36.9 | 52.1 | 7.7 | 2.2 | 1.1 | 100 |
| II | 12.7 | 53.6 | 27.1 | 5.6 | 1.1 | 100 |
| III | 4.3 | 37.4 | 38.9 | 16.6 | 2.8 | 100 |
| IV | 2.5 | 20.5 | 34.1 | 34.3 | 8.7 | 100 |
| V | 2.3 | 13.2 | 27.6 | 38.1 | 18.9 | 100 |
| VI | 0.9 | 9.8 | 19.4 | 35.7 | 34.3 | 100 |
| VII | 1.3 | 7.5 | 20.9 | 31.5 | 38.8 | 100 |
| VIII | 0.4 | 4.8 | 13.7 | 31.0 | 50.1 | 100 |
| Total | 7.8 | 25.2 | 23.9 | 24.3 | 18.8 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 4.3\% children cannot even recognize numbers 1-9, 37.4\% children can recognize numbers up to 9 but not more, $38.9 \%$ can recognize numbers to 99 but cannot do subtraction, $16.6 \%$ can do subtraction but not division, and $2.8 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | IIII | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 2007 | Govt | 1.1 | 1.2 | 0.7 | 1.6 | 2.1 | 2.0 | 2.1 | 3.8 | 1.7 |
|  | Pvt | 7.4 | 4.8 | 8.6 | 5.4 | 17.1 | 4.1 | 9.5 | 9.0 | 8.0 |
| 2009 | Govt | 2.8 | 3.1 | 3.4 | 3.6 | 3.0 | 2.7 | 2.6 | 3.2 | 3.1 |
|  | Pvt | 8.3 | 9.1 | 12.4 | 18.9 | 15.0 | 10.5 | 17.4 | 19.2 | 12.8 |
| 2010 | Govt | 0.9 | 1.4 | 0.9 | 1.8 | 1.9 | 1.8 | 2.4 | 2.6 | 1.7 |
|  | Pvt | 7.4 | 11.9 | 9.8 | 9.2 | 9.4 | 12.5 | 8.3 | 11.0 | 9.9 |
| 2011 | Govt | 0.5 | 0.4 | 0.8 | 1.2 | 1.9 | 1.3 | 1.5 | 1.5 | 1.2 |
|  | Pvt | 7.7 | 8.2 | 12.1 | 2.4 | 16.3 | 6.0 | 5.9 | 10.5 | 8.5 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Chhattisgarh rubal

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

How much goes to each school

For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per $\quad$ This grant can be used for primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$
Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

Pupil-Teacher Ratio (excluding Headteacher) shall not exceed 40

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## Gujarat rural

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 25 OUT OF 26 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Age: 6 -14 ALL | 86.1 | 10.8 | 0.4 | 2.7 | 100 |
| Age: 7-16 ALL | 82.1 | 12.4 | 0.4 | 5.1 | 100 |
| Age: 7-10 ALL | 89.3 | 9.1 | 0.3 | 1.3 | 100 |
| Age: 7-10 BOYS | 88.6 | 9.8 | 0.4 | 1.1 | 100 |
| Age: 7-10 GIRLS | 90.2 | 8.2 | 0.3 | 1.4 | 100 |
| Age: 11-14 ALL | 82.5 | 12.7 | 0.4 | 4.4 | 100 |
| Age: 11-14 BOYS | 82.8 | 13.7 | 0.5 | 2.9 | 100 |
| Age: 11-14 GIRLS | 82.1 | 11.5 | 0.3 | 6.1 | 100 |
| Age: 15-16 ALL | 58.4 | 21.5 | 0.7 | 19.4 | 100 |
| Age: 15-16 BOYS | 60.4 | 23.3 | 0.9 | 15.4 | 100 |
| Age: 15-16 GIRLS | 55.8 | 19.2 | 0.4 | 24.5 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS
'мот in school' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in schoo has changed from $11.7 \%$ in 2006 to $7.6 \%$ in 2007 to $10.9 \%$ in 2008 to $10.2 \%$ in 2009 to $8 \%$ in 2010 to $6.1 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 26.0 | 62.0 | 7.8 | 4.2 |  |  |  |  |  |  |  |  | 100 |
| II | 1.1 | 9.2 | 75.7 | 10.5 | 3.6 |  |  |  |  |  |  |  | 100 |
| III |  | . 0 | 7.7 | 73.8 | 12.3 | 4.2 |  |  |  |  |  |  | 100 |
| IV | 3.1 |  |  | 8.3 | 69.9 | 14.3 | 4.4 |  |  |  |  |  | 100 |
| V | 2.4 |  |  |  | 5.6 | 71.4 | 14.6 | 6.0 |  |  |  |  | 100 |
| VI | 1.6 |  |  |  |  | 6.3 | 66.0 | 21.0 | 5.1 |  |  |  | 100 |
| VII | 3.1 |  |  |  |  |  | 7.6 | 63.5 | 18.8 | 7.0 |  |  | 100 |
| VIII | 1.6 |  |  |  |  |  |  | 7.5 | 67.2 | 17.4 | 6.3 |  | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $73.8 \%$ children are 8 years old but there are also $7.7 \%$ who are $7,12.3 \%$ who are 9 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 29.5 | 47.2 | 16.9 | 2.9 | 3.6 | 100 |
| II | 11.4 | 33.7 | 33.8 | 12.3 | 8.8 | 100 |
| III | 4.2 | 16.3 | 34.5 | 25.0 | 20.1 | 100 |
| IV | 2.2 | 10.3 | 22.8 | 28.2 | 36.5 | 100 |
| V | 1.2 | 6.0 | 14.4 | 29.2 | 49.2 | 100 |
| VI | 1.1 | 2.7 | 6.6 | 25.5 | 64.2 | 100 |
| VII | 0.5 | 2.3 | 5.8 | 20.1 | 71.4 | 100 |
| VIII | 0.9 | 2.3 | 4.2 | 12.9 | 79.8 | 100 |
| Total | 5.8 | 14.1 | 17.1 | 20.2 | 42.8 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $4.2 \%$ children cannot even read letters, $16.3 \%$ can read letters but not more, $34.5 \%$ can read words but not Std 1 text or higher, $25 \%$ can read Std 1 text but not Std 2 level text, and $20.1 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 4: Trends over time

\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| $\%$ Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 99.3 |
| Home language is different from school language | 0.8 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Gujarat rural 

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | :---: | :---: | ---: | :---: |
|  |  | 1 -9 | $11-99$ |  |  |  |
| I | 30.0 | 53.6 | 12.8 | 2.3 | 1.3 | 100 |
| II | 12.4 | 45.8 | 33.0 | 6.4 | 2.4 | 100 |
| III | 5.3 | 26.6 | 43.4 | 19.4 | 5.3 | 100 |
| IV | 2.9 | 15.7 | 36.8 | 30.6 | 14.1 | 100 |
| V | 1.8 | 9.9 | 29.5 | 36.0 | 22.7 | 100 |
| VI | 1.4 | 6.0 | 20.6 | 40.9 | 31.3 | 100 |
| VII | 1.1 | 4.7 | 15.7 | 36.4 | 42.1 | 100 |
| VIII | 1.1 | 3.8 | 12.9 | 29.3 | 53.0 | 100 |
| Total | 6.4 | 19.5 | 25.8 | 26.2 | 22.1 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 5.3\% children cannot even recognize numbers 1-9, 26.6\% children can recognize numbers up to 9 but not more, 43.4\% can recognize numbers to 99 but cannot do subtraction, $19.4 \%$ can do subtraction but not division, and $5.3 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | IIII | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | ---: |
| 2007 | Govt | 3.9 | 5.6 | 6.0 | 5.8 | 7.4 | 7.3 | 10.2 | 13.0 | 6.9 |
|  | Pvt | 19.8 | 23.5 | 26.6 | 26.1 | 40.3 | 31.1 | 35.2 | 26.0 | 27.9 |
| 2009 | Govt | 5.5 | 7.1 | 7.1 | 9.0 | 9.2 | 9.0 | 9.1 | 11.9 | 8.3 |
|  | Pvt | 29.4 | 33.8 | 39.9 | 40.4 | 44.0 | 38.8 | 31.0 | 23.8 | 33.2 |
| 2010 | Govt | 5.5 | 8.9 | 8.5 | 10.7 | 9.5 | 10.7 | 10.4 | 9.8 | 9.3 |
|  | Pvt | 21.4 | 36.9 | 44.1 | 35.9 | 40.8 | 39.4 | 39.8 | 28.8 | 35.3 |
| 2011 | Govt | 6.8 | 9.5 | 9.8 | 11.3 | 10.5 | 10.6 | 11.1 | 14.3 | 10.5 |
|  | Pvt | 39.7 | 52.4 | 49.8 | 46.3 | 54.4 | 45.7 | 56.2 | 40.7 | 47.8 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Gujarat rubal

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

| Other | Expenditure on school events | 73.8 | 24.5 | 1.7 |
|  | Payment of bills (electricity, water, cleaning etc.) | 54.6 | 42.1 | 3.3 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

How much goes to each school

For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per $\quad$ This grant can be used for primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$
Rs 12000 if the school is Std I-VIIIVIII.

Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^32]

ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 16 OUT OF 20 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6 -14 ALL | 54.9 | 43.4 | 0.3 | 1.4 | 100 |
| Age: 7-16 ALL | 56.5 | 41.0 | 0.3 | 2.1 | 100 |
| Age: 7-10 ALL | 52.9 | 46.0 | 0.3 | 0.8 | 100 |
| Age: 7-10 BOYS | 49.8 | 49.3 | 0.2 | 0.7 | 100 |
| Age: 7-10 GIRLS | 57.1 | 41.7 | 0.3 | 1.0 | 100 |
| Age: 11-14 ALL | 58.7 | 39.2 | 0.3 | 1.8 | 100 |
| Age: 11-14 BOYS | 55.2 | 43.2 | 0.1 | 1.5 | 100 |
| Age: 11-14 GIRLS | 63.0 | 34.4 | 0.4 | 2.1 | 100 |
| Age: 15-16 ALL | 60.3 | 32.7 | 0.5 | 6.5 | 100 |
| Age: 15-16 BOYS | 58.2 | 35.9 | 0.4 | 5.6 | 100 |
| Age: 15-16 GIRLS | 62.9 | 28.7 | 0.8 | 7.7 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS 'мот in Sснооц' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 8.4\% in 2006 to $7 \%$ in 2007 to $5.1 \%$ in 2008 to $4.3 \%$ in 2009 to $1.8 \%$ in 2010 to $2.1 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 29.0 | 40.4 | 18.8 | 7.2 | 4.6 |  |  |  |  |  |  |  | 100 |
| II | 6.0 | 19.1 | 33.6 | 27.6 | 7.7 | 6.1 |  |  |  |  |  |  | 100 |
| III |  | 5.1 | 17.9 | 38.5 | 22.2 | 11.1 | 5.2 |  |  |  |  |  | 100 |
| IV | 6.0 |  |  | 20.4 | 31.2 | 28.3 | 7.3 | 6.9 |  |  |  |  | 100 |
| V | 7.2 |  |  |  | 14.2 | 39.6 | 21.7 | 11.8 | 5.4 |  |  |  | 100 |
| VI | 4.9 |  |  |  |  | 17.9 | 33.9 | 27.5 | 9.8 | 6.0 |  |  | 100 |
| VII | 5.2 |  |  |  |  |  | 16.2 | 39.1 | 22.4 | 10.5 | 6.6 |  | 100 |
| VIII | 7.2 |  |  |  |  |  |  | 20.2 | 33.8 | 24.1 | 11.0 | 3.6 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, 38.5 $\%$ children are 8 years old but there are also $17.9 \%$ who are $7,22.2 \%$ who are 9 , $11.1 \%$ who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | $\begin{aligned} & \text { In LKG/ } \\ & \text { UKG } \end{aligned}$ | In School |  |  |  | $\stackrel{\square}{\circ}$ |

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 27.4 | 39.1 | 21.0 | 6.1 | 6.4 | 100 |
| II | 10.3 | 27.4 | 30.5 | 14.9 | 16.9 | 100 |
| III | 5.1 | 16.5 | 24.8 | 22.5 | 31.0 | 100 |
| IV | 4.0 | 9.1 | 13.6 | 23.5 | 49.9 | 100 |
| V | 2.0 | 5.5 | 10.9 | 15.6 | 66.0 | 100 |
| VI | 0.9 | 2.7 | 6.0 | 12.7 | 77.7 | 100 |
| VII | 1.1 | 1.4 | 3.3 | 9.1 | 85.1 | 100 |
| VIII | 0.4 | 0.7 | 2.8 | 8.4 | 87.7 | 100 |
| Total | 6.5 | 13.0 | 14.4 | 14.2 | 52.0 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $5.1 \%$ children cannot even read letters, $16.5 \%$ can read letters but not more, 24.8\% can read words but not Std 1 text or higher, $22.5 \%$ can read Std 1 text but not Std 2 level text, and $31 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 78.5 |
| Home language is different from school language | 21.5 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Haryana rural 

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 | $1-9$ |  |  |  |
| I | 24.8 | 38.8 | 28.0 | 6.4 | 2.2 | 100 |
| III | 7.9 | 29.0 | 34.6 | 22.1 | 6.5 | 100 |
| III | 3.8 | 18.6 | 27.2 | 32.8 | 17.7 | 100 |
| IV | 2.5 | 12.5 | 19.7 | 33.0 | 32.3 | 100 |
| V | 1.8 | 8.2 | 13.5 | 26.3 | 50.2 | 100 |
| VI | 1.1 | 3.7 | 11.4 | 22.6 | 61.3 | 100 |
| VII | 1.0 | 2.3 | 7.9 | 20.6 | 68.3 | 100 |
| VIII | 0.4 | 1.0 | 8.4 | 17.0 | 73.2 | 100 |
| Total | 5.5 | 14.4 | 19.0 | 22.7 | 38.5 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 3.8\% children cannot even recognize numbers 1-9, 18.6\% children can recognize numbers up to 9 but not more, $27.2 \%$ can recognize numbers to 99 but cannot do subtraction, $32.8 \%$ can do subtraction but not division, and $17.7 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto 100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | ---: |
| 2007 | Govt | 5.1 | 5.2 | 7.2 | 7.3 | 9.6 | 7.6 | 6.3 | 10.6 | 7.3 |
|  | Pvt | 11.0 | 11.2 | 14.5 | 14.0 | 17.1 | 16.8 | 16.3 | 19.7 | 14.7 |
| 2009 | Govt | 9.6 | 11.1 | 13.7 | 12.5 | 15.1 | 12.4 | 15.3 | 19.1 | 13.6 |
|  | Pvt | 17.8 | 20.6 | 23.6 | 27.1 | 30.3 | 29.7 | 24.5 | 32.4 | 25.3 |
| 2010 | Govt | 8.0 | 9.9 | 8.8 | 10.3 | 12.8 | 12.2 | 11.9 | 13.0 | 11.0 |
|  | Pvt | 17.9 | 17.6 | 23.3 | 22.1 | 25.0 | 21.7 | 21.9 | 25.1 | 21.6 |
| 2011 | Govt | 4.9 | 7.7 | 6.5 | 10.1 | 9.7 | 8.3 | 7.9 | 7.9 | 8.0 |
|  | Pvt | 16.2 | 18.1 | 23.4 | 23.3 | 21.5 | 20.7 | 19.3 | 19.1 | 20.1 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Haryana rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

|  | Payment of bills (electricity, water, cleaning etc.) | 83.5 | 15.7 | 0.9 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March $2012 .{ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL <br> IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to |  |
| :---: | :---: |
| each school | For what purposes |

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$ Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

[^33]

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 12 OUT OF 12 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6 -14 ALL | 72.8 | 26.6 | 0.1 | 0.6 | 100 |
| Age: 7-16 ALL | 76.0 | 23.2 | 0.0 | 0.8 | 100 |
| Age: 7-10 ALL | 69.2 | 30.5 | 0.0 | 0.3 | 100 |
| Age: 7-10 BOYS | 64.7 | 34.9 | 0.1 | 0.3 | 100 |
| Age: 7-10 GIRLS | 74.7 | 24.9 | 0.0 | 0.4 | 100 |
| Age: 11-14 ALL | 79.2 | 20.0 | 0.1 | 0.8 | 100 |
| Age: 11-14 BOYS | 78.2 | 21.1 | 0.1 | 0.7 | 100 |
| Age: 11-14 GIRLS | 81.0 | 18.0 | 0.1 | 1.0 | 100 |
| Age: 15-16 ALL | 86.7 | 11.5 | 0.0 | 1.9 | 100 |
| Age: 15-16 BOYS | 85.7 | 13.0 | 0.0 | 1.4 | 100 |
| Age: 15-16 GIRLS | 88.7 | 8.8 | 0.0 | 2.5 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS 'мот in SCHool' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 2.7\% in 2006 to $2.2 \%$ in 2007 to $1 \%$ in 2008 to $1.1 \%$ in 2009 to $0.4 \%$ in 2010 to $1.0 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 39.0 | 52.7 | 6.2 | 2.2 |  |  |  |  |  |  |  |  | 100 |
| II | 2.5 | 25.3 | 53.7 | 15.7 | 2.8 |  |  |  |  |  |  |  | 100 |
| III | 1. | . 7 | 21.8 | 59.5 | 14.2 | 2.8 |  |  |  |  |  |  | 100 |
| IV | 2.2 |  |  | 23.5 | 54.6 | 15.7 | 4.1 |  |  |  |  |  | 100 |
| V | 2.0 |  |  |  | 19.7 | 58.4 | 15.6 | 4.3 |  |  |  |  | 100 |
| VI | 1.8 |  |  |  |  | 15.3 | 54.1 | 24.4 | 4.4 |  |  |  | 100 |
| VII | 1.3 |  |  |  |  |  | 19.7 | 54.3 | 20.1 | 4.6 |  |  | 100 |
| VIII | 3.1 |  |  |  |  |  |  | 19.1 | 45.7 | 24.9 | 7. |  | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $59.5 \%$ children are 8 years old but there are also $21.8 \%$ who are $7,14.2 \%$ who are 9 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 12.1 | 51.0 | 27.1 | 5.6 | 4.2 | 100 |
| II | 3.6 | 19.4 | 43.5 | 20.4 | 13.2 | 100 |
| III | 2.1 | 8.5 | 22.6 | 35.5 | 31.3 | 100 |
| IV | 1.1 | 4.7 | 8.0 | 30.2 | 56.0 | 100 |
| V | 0.2 | 2.0 | 5.7 | 18.2 | 73.9 | 100 |
| VI | 0.0 | 1.4 | 1.5 | 10.8 | 86.3 | 100 |
| VII | 0.5 | 0.4 | 1.2 | 6.5 | 91.5 | 100 |
| VIII | 0.1 | 0.4 | 0.4 | 3.4 | 95.8 | 100 |
| Total | 2.4 | 10.5 | 13.6 | 16.5 | 57.0 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $2.1 \%$ children cannot even read letters, $8.5 \%$ can read letters but not more, 22.6\% can read words but not Std 1 text or higher, 35.5\% can read Std 1 text but not Std 2 level text, and 31.3\% can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 4: Trends over time

\% Children in Std III who CANNOT READ Std I LEVEL TEXT
By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 11.4 |
| Home language is different from school language | 88.7 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Himachal Pradesh rural 

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | :---: | ---: | ---: | ---: | ---: | ---: |
|  |  | $1-9$ | $11-99$ |  |  |  |
| I | 7.9 | 46.0 | 38.1 | 6.2 | 1.8 | 100 |
| II | 1.6 | 20.5 | 49.2 | 24.4 | 4.4 | 100 |
| III | 0.7 | 10.0 | 32.3 | 43.5 | 13.4 | 100 |
| IV | 0.6 | 5.2 | 14.4 | 44.0 | 35.8 | 100 |
| V | 0.3 | 2.0 | 9.5 | 28.4 | 59.8 | 100 |
| VI | 0.0 | 1.5 | 6.2 | 20.4 | 71.9 | 100 |
| VII | 0.4 | 0.3 | 7.0 | 13.9 | 78.4 | 100 |
| VIII | 0.5 | 0.4 | 3.3 | 15.7 | 80.1 | 100 |
| Total | 1.4 | 10.3 | 19.7 | 24.9 | 43.6 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, $0.7 \%$ children cannot even recognize numbers 1-9, 10\% children can recognize numbers up to 9 but not more, $32.3 \%$ can recognize numbers to 99 but cannot do subtraction, $43.5 \%$ can do subtraction but not division, and $13.4 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Himachal Pradesh rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | ---: | ---: | ---: | ---: |
| Std I-IV/V: Primary | 224 | 310 | 195 | 224 |
| Std I-VIIINIII: Primary + Upper primary | 26 | 22 | 66 | 50 |
| Total schools visited | 250 | 332 | 261 | 274 |

## Student and teacher attendance

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to |
| :---: | :--- |
| each school | For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$ Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for buying school equipment such as blackboard, sitting mats etc. Also for buying chalk, duster, registers and other office equipment.

The grant amount varies by type of school: whether it is a primary or upper primary school.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

| Age: 15-16 GIRLS | 68.9 | 18.2 | 0.3 | 12.5 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS
'мот in SCHool' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 8.3\% in 2006 to $5.8 \%$ in 2007 to 5\% in 2008 to $3.1 \%$ in 2009 to $3.7 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 19.8 | 36.9 | 27.1 | 10.0 | 6.2 |  |  |  |  |  |  |  | 100 |
| II | 4.0 | 12.3 | 29.8 | 38.4 | 8.1 | 7.4 |  |  |  |  |  |  | 100 |
| III |  | . 4 | 9.7 | 28.9 | 37.8 | 14.7 | 5.4 |  |  |  |  |  | 100 |
| IV | 3.2 |  |  | 13.8 | 24.2 | 42.4 | 8.9 | 7.4 |  |  |  |  | 100 |
| V | 4.0 |  |  |  | 10.9 | 30.3 | 37.5 | 11.3 | 5.9 |  |  |  | 100 |
| VI | 2.3 |  |  |  |  | 11.6 | 25.5 | 44.2 | 10.7 | 5.7 |  |  | 100 |
| VII | 4.7 |  |  |  |  |  | 8.8 | 30.7 | 42.5 | 10.3 | 3.0 |  | 100 |
| VIII | 2.7 |  |  |  |  |  |  | 11.1 | 26.0 | 45.9 | 10.6 | 3.7 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $28.9 \%$ children are 8 years old but there are also $9.7 \%$ who are $7,37.8 \%$ who are 9 , 14.7\% who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 14.2 | 49.9 | 23.3 | 8.8 | 3.7 | 100 |
| II | 6.0 | 33.7 | 33.2 | 17.0 | 10.2 | 100 |
| III | 2.9 | 23.5 | 28.3 | 27.8 | 17.5 | 100 |
| IV | 1.6 | 16.6 | 25.4 | 31.2 | 25.1 | 100 |
| V | 1.4 | 9.7 | 20.0 | 32.8 | 36.2 | 100 |
| VI | 1.2 | 6.6 | 13.4 | 32.0 | 46.8 | 100 |
| VII | 0.9 | 5.4 | 9.3 | 28.5 | 56.0 | 100 |
| VIII | 0.6 | 3.9 | 7.2 | 24.8 | 63.6 | 100 |
| Total | 3.7 | 18.8 | 19.8 | 25.1 | 32.6 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $2.9 \%$ children cannot even read letters, $23.5 \%$ can read letters but not more, 28.3\% can read words but not Std 1 text or higher, $27.8 \%$ can read Std 1 text but not Std 2 level text, and $17.5 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$

## Chart 4: Trends over time

\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language
Table 5: School language and home language

| \% Children who took the reading test in: | \% | Of the \% Children tested in: | \% Children whose home language was: |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Kashmiri | Dogri | Ladakhi | Other* | Total |
| English | 91.6 | English | 52.2 | 24.7 | 1.3 | 21.7 | 100 |
| Urdu | 6.7 | Urdu | 32.0 | 5.4 | 0.0 | 62.6 | 100 |
| Hindi | 1.7 | * 'Other' includes all languages from the list of scheduled and nonscheduled languages except those specified above. Data for home language of children tested in Hindi has not been reported here due to small cell sizes. |  |  |  |  |  |
| Total | 100 |  |  |  |  |  |  |

Note: In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. In Jammu and Kashmir, where the medium of instruction in government schools is English, children were given the choice of reading in English, Urdu or Hindi. Hindi tools were used in only in Jammu division. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | :---: | :---: | ---: | ---: |
|  |  | 1.9 | $11-99$ |  |  |  |
| I | 12.0 | 42.9 | 36.1 | 8.2 | 0.7 | 100 |
| II | 4.8 | 27.0 | 45.2 | 19.8 | 3.2 | 100 |
| III | 3.0 | 17.5 | 40.7 | 33.1 | 5.7 | 100 |
| IV | 1.4 | 9.9 | 38.2 | 37.8 | 12.8 | 100 |
| V | 1.0 | 6.6 | 28.9 | 41.0 | 22.5 | 100 |
| VI | 1.0 | 5.7 | 22.3 | 42.3 | 28.8 | 100 |
| VII | 0.7 | 2.8 | 20.9 | 40.1 | 35.5 | 100 |
| VIII | 0.5 | 1.4 | 17.8 | 40.3 | 40.1 | 100 |
| Total | 3.1 | 14.3 | 31.0 | 32.6 | 18.9 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 3\% children cannot even recognize numbers 1-9, 17.5\% children can recognize numbers up to 9 but not more, $40.7 \%$ can recognize numbers to 99 but cannot do subtraction, $33.1 \%$ can do subtraction but not division, and $5.7 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | ---: |
| 2007 | Govt | 6.0 | 5.4 | 6.5 | 5.9 | 8.0 | 11.8 | 12.6 | 17.9 | 9.2 |
|  | Pvt | 13.0 | 22.4 | 21.0 | 19.2 | 32.5 | 30.3 | 28.1 | 33.9 | 23.7 |
| 2009 | Govt | 3.6 | 8.5 | 11.2 | 14.7 | 19.3 | 14.9 | 20.5 | 22.0 | 14.5 |
|  | Pvt | 12.5 | 13.7 | 18.4 | 25.7 | 33.8 | 25.0 | 32.8 | 27.9 | 23.1 |
| 2010 | Govt |  |  |  |  |  |  |  |  |  |
|  | Pvt |  |  |  |  |  |  |  |  |  |
| 2011 | Govt | 4.1 | 3.8 | 7.1 | 6.9 | 6.4 | 7.5 | 7.2 | 9.6 | 6.7 |
|  | Pvt | 19.3 | 20.5 | 19.2 | 22.7 | 19.1 | 18.8 | 23.6 | 29.8 | 21.4 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

# Jammu and Kashmir rural 

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL <br> IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to | For what purposes |
| :---: | :--- |
| each school |  |

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$
Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for buying school equipment such as blackboard, sitting mats etc. Also for buying chalk, duster, registers and other office equipment.

The grant amount varies by type of school: whether it is a primary or upper primary school.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^36]
## Right to Education indicators

| Table 17: Schools by total enrollment 2011 |  |  |

| V | 2.6 |  |  | 7.2 | 9.1 | 32.0 | 17.8 | 19.5 | 5.8 | 5.9 |  |  | 100 |
| VI | 5.6 |  |  |  | 17.2 | 21.5 | 32.5 | 12.0 | 6.3 | 5.0 |  |  | 100 |
| VII | 7.8 |  |  |  |  |  | 7.9 | 34.9 | 23.4 | 15.7 | 7.8 | 2.5 | 100 |
| VIII | 5.6 |  |  |  |  |  |  | 16.0 | 27.2 | 29.7 | 14.2 | 7.4 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $32.2 \%$ children are 8 years old but there are also $12.8 \%$ who are $7,19.4 \%$ who are 9 , $17.0 \%$ who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 49.2 | 34.7 | 10.7 | 2.9 | 2.4 | 100 |
| II | 22.0 | 39.6 | 23.3 | 8.7 | 6.5 | 100 |
| III | 10.3 | 29.3 | 29.9 | 17.7 | 12.8 | 100 |
| IV | 7.6 | 19.2 | 24.2 | 23.9 | 25.1 | 100 |
| V | 4.4 | 12.6 | 17.1 | 24.9 | 41.0 | 100 |
| VI | 2.0 | 7.6 | 11.0 | 21.8 | 57.5 | 100 |
| VII | 1.0 | 4.0 | 7.1 | 15.1 | 72.9 | 100 |
| VIII | 1.5 | 2.9 | 5.0 | 10.4 | 80.3 | 100 |
| Total | 14.5 | 20.9 | 16.8 | 15.3 | 32.5 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, 10.3\% children cannot even read letters, $29.3 \%$ can read letters but not more, 29.9\% can read words but not Std 1 text or higher, 17.7\% can read Std 1 text but not Std 2 level text, and $12.8 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 38.8 |
| Home language is different from school language | 61.2 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | $1-9$ | $11-99$ |  |  |  |
| I | 49.7 | 37.5 | 9.7 | 2.1 | 1.1 | 100 |
| III | 20.6 | 45.6 | 22.5 | 8.7 | 2.6 | 100 |
| III | 9.1 | 35.4 | 32.3 | 17.5 | 5.8 | 100 |
| IV | 5.1 | 23.8 | 29.0 | 30.0 | 12.0 | 100 |
| V | 2.5 | 16.0 | 23.4 | 34.1 | 24.0 | 100 |
| VI | 1.7 | 9.0 | 19.4 | 32.0 | 37.8 | 100 |
| VII | 1.3 | 4.9 | 14.4 | 28.8 | 50.7 | 100 |
| VIII | 1.3 | 4.8 | 11.1 | 24.1 | 58.7 | 100 |
| Total | 13.6 | 24.5 | 20.5 | 20.8 | 20.6 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, $9.1 \%$ children cannot even recognize numbers 1-9, 35.4\% children can recognize numbers up to 9 but not more, $32.3 \%$ can recognize numbers to 99 but cannot do subtraction, $17.5 \%$ can do subtraction but not division, and $5.8 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 13.4 | 14.5 | 17.3 | 19.6 | 19.8 | 24.6 | 23.3 | 29.7 | 18.9 |
|  | Pvt | 39.9 | 38.7 | 39.5 | 49.4 | 44.9 | 45.8 | 38.9 | 46.7 | 42.5 |
| 2009 | Govt | 15.3 | 20.4 | 22.1 | 25.3 | 26.7 | 32.3 | 33.2 | 38.7 | 25.1 |
|  | Pvt | 38.9 | 39.8 | 35.9 | 40.3 | 38.3 | 32.2 | 30.7 | 42.1 | 37.7 |
| 2010 | Govt | 16.6 | 21.1 | 22.4 | 27.0 | 30.2 | 33.3 | 37.3 | 39.0 | 27.5 |
|  | Pvt | 31.8 | 31.7 | 42.4 | 37.7 | 45.3 | 33.6 | 51.0 | 51.0 | 40.1 |
| 2011 | Govt | 13.9 | 19.2 | 22.9 | 23.8 | 27.4 | 30.1 | 32.8 | 37.9 | 25.1 |
|  | Pvt | 36.5 | 41.0 | 36.6 | 42.1 | 36.4 | 42.6 | 36.0 | 39.1 | 38.6 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Jharkhand rubal

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | :---: | ---: | ---: | ---: |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL <br> IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to |  |
| :---: | :---: |
| each school | For what purposes |

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$ Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for buying school equipment such as blackboard, sitting mats etc. Also for buying chalk, duster, registers and other office equipment.

The grant amount varies by type of school: whether it is a primary or upper primary school.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^38]

' $\operatorname{SCHool'~}=$ dropped out + never enrolled. $}$

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 8\% in 2006 to $6.2 \%$ in 2007 to $5.9 \%$ in 2008 to $6.1 \%$ in 2009 to $5.9 \%$ in 2010 to $5.1 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 10.6 | 61.4 | 23.9 | 4.1 |  |  |  |  |  |  |  |  | 100 |
| II | 6. | . 1 | 41.2 | 48.0 | 4.7 |  |  |  |  |  |  |  | 100 |
| III | 4.9 |  |  | 37.7 | 51.6 | 5.8 |  |  |  |  |  |  | 100 |
| IV | 0.8 |  |  | 6.7 | 34.8 | 52.3 | 5.4 |  |  |  |  |  | 100 |
| V | 5.8 |  |  |  |  | 38.5 | 48.6 | 6.2 | 1.1 |  |  |  | 100 |
| VI | 1.1 |  |  |  |  | 6.1 | 33.0 | 53.3 | 6.5 |  |  |  | 100 |
| VII | 1.6 |  |  |  |  |  | 7.4 | 33.0 | 48.0 | 8.9 | 1.2 |  | 100 |
| VIII | 2.2 |  |  |  |  |  |  | 7.5 | 35.3 | 49.6 | 4.0 | 1.5 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $37.7 \%$ children are 8 years old but there are also $4.9 \%$ who are 7 years old or younger, $51.6 \%$ who are 9 years old, etc.

## Young children in pre-school and school

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | :---: | ---: | ---: | :---: | :---: | :---: |
| I | 21.0 | 52.4 | 20.4 | 3.9 | 2.3 | 100 |
| II | 8.3 | 31.7 | 37.9 | 14.0 | 8.1 | 100 |
| III | 3.8 | 19.9 | 33.0 | 24.6 | 18.7 | 100 |
| IV | 2.1 | 12.1 | 23.5 | 30.0 | 32.2 | 100 |
| V | 3.6 | 9.1 | 15.1 | 28.0 | 44.3 | 100 |
| VI | 2.6 | 6.0 | 10.8 | 23.3 | 57.4 | 100 |
| VII | 0.9 | 4.8 | 8.1 | 20.4 | 65.8 | 100 |
| VIII | 0.9 | 3.5 | 6.7 | 16.9 | 72.0 | 100 |
| Total | 5.4 | 17.3 | 19.4 | 20.3 | 37.6 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $3.8 \%$ children cannot even read letters, 19.9\% can read letters but not more, $33 \%$ can read words but not Std 1 text or higher, $24.6 \%$ can read Std 1 text but not Std 2 level text, and $18.7 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 80.9 |
| Home language is different from school language | 19.1 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

## Table 6: \% Children by class and ARITHM ETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | :---: | :---: | ---: | ---: |
|  |  | 1 1-9 | $11-99$ |  |  |  |
| I | 21.7 | 47.8 | 25.0 | 4.2 | 1.4 | 100 |
| II | 6.8 | 32.3 | 47.3 | 12.8 | 0.8 | 100 |
| III | 3.9 | 17.4 | 46.2 | 29.8 | 2.7 | 100 |
| IV | 2.1 | 10.1 | 40.0 | 38.6 | 9.2 | 100 |
| V | 2.6 | 7.9 | 28.5 | 41.3 | 19.6 | 100 |
| VI | 1.0 | 5.8 | 22.9 | 39.1 | 31.2 | 100 |
| VII | 1.2 | 3.3 | 22.9 | 32.4 | 40.3 | 100 |
| VIII | 1.5 | 2.3 | 17.5 | 32.6 | 46.2 | 100 |
| Total | 5.0 | 15.7 | 31.3 | 29.1 | 18.8 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 3.9\% children cannot even recognize numbers 1-9, 17.4\% children can recognize numbers up to 9 but not more, $46.2 \%$ can recognize numbers to 99 but cannot do subtraction, $29.8 \%$ can do subtraction but not division, and $2.7 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | ---: | ---: |
| 2007 | Govt | 7.1 | 7.0 | 9.5 | 8.3 | 9.9 | 9.1 | 8.4 | 6.7 | 8.4 |
|  | Pvt | 15.6 | 16.7 | 18.7 | 13.4 | 24.2 | 16.5 | 13.7 | 8.8 | 15.5 |
| 2009 | Govt | 5.0 | 7.5 | 7.4 | 9.2 | 9.1 | 7.6 | 8.5 | 6.2 | 7.7 |
|  | Pvt | 20.4 | 21.6 | 26.5 | 20.3 | 20.7 | 26.4 | 21.9 | 14.2 | 21.1 |
| 2010 | Govt | 4.8 | 7.0 | 7.2 | 7.6 | 6.9 | 6.4 | 7.0 | 5.8 | 6.7 |
|  | Pvt | 16.0 | 17.5 | 23.7 | 16.8 | 22.6 | 14.7 | 18.9 | 12.2 | 17.7 |
| 2011 | Govt | 4.6 | 5.8 | 7.7 | 6.7 | 9.6 | 10.5 | 8.6 | 6.6 | 7.7 |
|  | Pvt | 17.5 | 17.6 | 20.5 | 27.0 | 21.0 | 17.3 | 17.2 | 14.6 | 18.9 |
|  |  |  |  |  |  |  |  |  |  |  |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Karnataka rubal

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL <br> IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to |  |
| :---: | :---: |
| each school | For what purposes |

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$ Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for buying school equipment such as blackboard, sitting mats etc. Also for buying chalk, duster, registers and other office equipment.

The grant amount varies by type of school: whether it is a primary or upper primary school.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $3.9 \%$ in 2006 to $0.4 \%$ in 2007 to $0.2 \%$ in 2008 to $0.2 \%$ in 2009 to $0.1 \%$ in 2010 to $0.1 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 18.1 | 61.2 | 17.9 | 2.8 |  |  |  |  |  |  |  |  | 100 |
| II | 0.6 | 13.5 | 63.5 | 19.6 | 2.8 |  |  |  |  |  |  |  | 100 |
| III |  | . 8 | 14.3 | 63.1 | 18.5 | 3.4 |  |  |  |  |  |  | 100 |
| IV | 1.5 |  |  | 12.4 | 62.4 | 19.9 | 3.8 |  |  |  |  |  | 100 |
| V | 1.4 |  |  |  | 11.7 | 67.4 | 17.4 | 2.1 |  |  |  |  | 100 |
| VI | 1.4 |  |  |  |  | 13.3 | 63.6 | 19.3 | 2.5 |  |  |  | 100 |
| VII | 1.4 |  |  |  |  |  | 17.4 | 62.0 | 17.8 | 1.3 |  |  | 100 |
| VIII | 2.4 |  |  |  |  |  |  | 15.7 | 68.1 | 12.0 | 1. | 9 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $63.1 \%$ children are 8 years old but there are also $14.3 \%$ who are $7,18.5 \%$ who are 9 years old, etc.

## Young children in pre-school and school

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | :---: | ---: | ---: | :---: | :---: | :---: |
| I | 3.7 | 38.1 | 45.3 | 7.0 | 5.9 | 100 |
| II | 2.1 | 17.9 | 33.9 | 23.0 | 23.1 | 100 |
| III | 0.7 | 8.7 | 21.5 | 23.6 | 45.5 | 100 |
| IV | 0.5 | 3.2 | 11.8 | 19.4 | 65.1 | 100 |
| V | 0.4 | 1.8 | 6.9 | 17.0 | 73.9 | 100 |
| VI | 0.4 | 1.4 | 4.9 | 13.3 | 80.0 | 100 |
| VII | 0.2 | 1.3 | 3.3 | 9.3 | 85.8 | 100 |
| VIII | 0.4 | 0.9 | 1.3 | 7.3 | 90.1 | 100 |
| Total | 1.0 | 8.4 | 15.1 | 14.8 | 60.8 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $0.7 \%$ children cannot even read letters, $8.7 \%$ can read letters but not more, 21.5\% can read words but not Std 1 text or higher, 23.6\% can read Std 1 text but not Std 2 level text, and $45.5 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 98.5 |
| Home language is different from school language | 1.5 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

## Table 6: \% Children by class and ARITHM ETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | $11-9$ | $11-99$ |  |  |  |
| I | 4.6 | 33.1 | 54.6 | 6.5 | 1.3 | 100 |
| II | 1.6 | 11.8 | 58.9 | 24.6 | 3.1 | 100 |
| III | 1.9 | 5.7 | 40.5 | 44.3 | 7.7 | 100 |
| IV | 0.8 | 2.9 | 25.9 | 48.6 | 21.9 | 100 |
| V | 0.7 | 2.0 | 19.4 | 44.6 | 33.2 | 100 |
| VI | 1.1 | 1.5 | 14.7 | 33.4 | 49.3 | 100 |
| VII | 0.5 | 0.8 | 11.9 | 24.7 | 62.2 | 100 |
| VIII | 0.8 | 1.2 | 6.9 | 17.8 | 73.3 | 100 |
| Total | 1.4 | 6.8 | 27.6 | 30.8 | 33.5 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, $1.9 \%$ children cannot even recognize numbers 1-9, 5.7\% children can recognize numbers up to 9 but not more, $40.5 \%$ can recognize numbers to 99 but cannot do subtraction, $44.3 \%$ can do subtraction but not division, and $7.7 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 28.2 | 32.7 | 30.3 | 39.0 | 36.8 | 39.6 | 42.0 | 42.4 | 36.7 |
|  | Pvt | 20.1 | 28.3 | 29.6 | 35.6 | 39.2 | 38.8 | 35.8 | 41.9 | 33.4 |
| 2009 | Govt | 21.4 | 33.1 | 31.2 | 34.4 | 41.8 | 34.2 | 35.1 | 41.5 | 35.0 |
|  | Pvt | 28.7 | 32.4 | 37.6 | 43.3 | 43.0 | 43.1 | 42.6 | 47.8 | 39.9 |
| 2010 | Govt | 26.3 | 23.7 | 36.2 | 35.0 | 44.3 | 40.7 | 45.2 | 46.1 | 39.0 |
|  | Pvt | 29.4 | 32.1 | 40.2 | 40.7 | 44.1 | 44.5 | 43.3 | 39.9 | 39.5 |
| 2011 | Govt | 18.6 | 23.6 | 31.7 | 32.2 | 40.8 | 33.8 | 42.1 | 36.9 | 33.6 |
|  | Pvt | 24.6 | 26.7 | 32.9 | 31.6 | 36.4 | 35.2 | 35.3 | 41.3 | 33.1 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Kerala rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March $2012 .{ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL <br> IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to |  |
| :---: | :---: |
| each school | For what purposes |

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per primary school

Rs. 7000 per year per upper primary school

Rs $5000+$ Rs $7000=$ Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for buying school equipment such as blackboard, sitting mats etc. Also for buying chalk, duster, registers and other office equipment.

The grant amount varies by type of school: whether it is a primary or upper primary school.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^43]

121-200
> 150
$>200$
2
3
4
5
$5+1$ Headteacher Pupil-Teacher Ratio (excluding Headteacher) shall not exceed 40

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## Madhya Pradesh rural

ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 43 OUT OF 45 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: $6-14$ ALL | 79.7 | 17.2 | 0.9 | 2.2 | 100 |
| Age: 7-16 ALL | 79.0 | 16.3 | 0.7 | 4.0 | 100 |
| Age: 7-10 ALL | 79.1 | 18.2 | 1.2 | 1.5 | 100 |
| Age: 7-10 BOYS | 77.0 | 20.4 | 1.1 | 1.5 | 100 |
| Age: 7-10 GIRLS | 81.5 | 15.6 | 1.4 | 1.5 | 100 |
| Age: 11-14 ALL | 81.5 | 15.1 | 0.3 | 3.2 | 100 |
| Age: 11-14 BOYS | 78.1 | 18.6 | 0.2 | 3.1 | 100 |
| Age: 11-14 GIRLS | 85.2 | 11.2 | 0.3 | 3.3 | 100 |
| Age: 15-16 ALL | 72.3 | 14.4 | 0.1 | 13.3 | 100 |
| Age: 15-16 BOYS | 71.3 | 16.7 | 0.0 | 12.1 | 100 |
| Age: 15-16 GIRLS | 73.4 | 11.6 | 0.1 | 14.9 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS.
'мот in SCHool' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 7.3\% in 2006 to 5\% in 2007 to $3.5 \%$ in 2008 to $3.9 \%$ in 2009 to $3.3 \%$ in 2010 to $3.3 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| । | 32.7 | 45.2 | 13.9 | 8.3 |  |  |  |  |  |  |  |  | 100 |
| II | 5.2 | 18.6 | 40.1 | 25.4 | 4.8 | 6.0 |  |  |  |  |  |  | 100 |
| III | 5 | . 6 | 14.8 | 43.5 | 20.3 | 9.7 | 6.2 |  |  |  |  |  | 100 |
| IV | 5.2 |  |  | 18.0 | 31.7 | 30.8 | 6.3 | 8.0 |  |  |  |  | 100 |
| V | 7.2 |  |  |  | 10.5 | 39.2 | 22.7 | 11.8 | 8.6 |  |  |  | 100 |
| VI | 4.6 |  |  |  |  | 13.8 | 33.2 | 31.7 | 8.5 | 8.1 |  |  | 100 |
| VII | 6.0 |  |  |  |  |  | 11.5 | 38.9 | 26.5 | 10.4 | 6.6 |  | 100 |
| VIII | 5.4 |  |  |  |  |  |  | 13.9 | 31.5 | 31.7 | 10.9 | 6.7 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $43.5 \%$ children are 8 years old but there are also $14.8 \%$ who are $7,20.3 \%$ who are 9 , 9.7\% who are 10 years old, etc.

## Young children in pre-school and school

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 45.3 | 39.3 | 10.1 | 2.9 | 2.4 | 100 |
| II | 23.6 | 41.7 | 21.6 | 7.7 | 5.4 | 100 |
| III | 12.7 | 33.8 | 26.3 | 15.7 | 11.4 | 100 |
| IV | 7.0 | 24.3 | 24.6 | 19.7 | 24.4 | 100 |
| V | 5.7 | 17.0 | 17.5 | 21.8 | 38.0 | 100 |
| VI | 2.8 | 11.0 | 13.4 | 19.7 | 53.2 | 100 |
| VII | 2.3 | 8.5 | 9.9 | 17.5 | 61.8 | 100 |
| VIII | 1.6 | 5.3 | 6.4 | 15.3 | 71.3 | 100 |
| Total | 12.8 | 23.1 | 16.6 | 15.1 | 32.4 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $12.7 \%$ children cannot even read letters, $33.8 \%$ can read letters but not more, $26.3 \%$ can read words but not Std 1 text or higher, $15.7 \%$ can read Std 1 text but not Std 2 level text, and $11.4 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT
By school type 2008-2011

Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 96.7 |
| Home language is different from school language | 3.3 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Madhya Pradesh rural 

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | :---: | :---: | ---: | ---: |
|  |  | 1 | $1-9$ |  |  |  |
| I | 47.8 | 41.3 | 8.0 | 1.8 | 1.1 | 100 |
| II | 24.7 | 47.0 | 21.6 | 4.9 | 1.8 | 100 |
| III | 13.6 | 40.9 | 30.5 | 11.6 | 3.5 | 100 |
| IV | 7.1 | 31.5 | 32.3 | 21.3 | 7.8 | 100 |
| V | 6.0 | 21.3 | 28.1 | 26.9 | 17.7 | 100 |
| VI | 2.8 | 16.2 | 24.0 | 29.1 | 27.9 | 100 |
| VII | 2.8 | 12.0 | 21.2 | 29.7 | 34.3 | 100 |
| VIII | 2.1 | 7.4 | 16.8 | 27.9 | 45.9 | 100 |
| Total | 13.5 | 27.7 | 23.1 | 19.0 | 16.7 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 13.6\% children cannot even recognize numbers 1-9, 40.9\% children can recognize numbers up to 9 but not more, $30.5 \%$ can recognize numbers to 99 but cannot do subtraction, $11.6 \%$ can do subtraction but not division, and $3.5 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 6: Trends over time

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-wise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 2007 | Govt | 3.0 | 4.7 | 5.2 | 5.6 | 8.0 | 7.6 | 9.3 | 11.4 | 6.5 |
|  | Pvt | 12.8 | 13.5 | 17.0 | 19.5 | 20.8 | 23.7 | 23.7 | 30.6 | 19.2 |
| 2009 | Govt | 4.6 | 6.4 | 8.8 | 9.2 | 10.8 | 11.8 | 13.4 | 16.5 | 10.0 |
|  | Pvt | 15.7 | 21.0 | 25.1 | 27.6 | 26.9 | 29.5 | 33.3 | 35.4 | 26.1 |
| 2010 | Govt | 3.1 | 3.4 | 4.1 | 5.6 | 6.8 | 8.9 | 10.0 | 14.7 | 6.9 |
|  | Pvt | 10.7 | 11.9 | 16.1 | 16.0 | 20.2 | 25.3 | 25.6 | 33.7 | 19.0 |
| 2011 | Govt | 4.1 | 4.9 | 5.6 | 5.8 | 7.2 | 6.9 | 8.1 | 8.6 | 6.5 |
|  | Pvt | 12.0 | 12.3 | 14.8 | 11.9 | 17.8 | 21.1 | 19.1 | 17.7 | 15.4 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Madhya Pradesh rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

| Age: 7-10 BOYS | 84.7 | 14.0 | 0.6 | 0.7 | 100 |
| Age: 7-10 GIRLS | 86.7 | 12.2 | 0.5 | 0.6 | 100 |
| Age: 11-14 ALL | 49.5 | 48.7 | 0.3 | 1.5 | 100 |
| Age: 11-14 BOYS | 49.4 | 49.0 | 0.3 | 1.3 | 100 |
| Age: 11-14 GIRLS | 50.0 | 48.0 | 0.3 | 1.8 | 100 |
| Age: 15-16 ALL | 25.1 | 69.6 | 0.4 | 5.0 | 100 |
| Age: 15-16 BOYS | 26.9 | 68.3 | 0.3 | 4.6 | 100 |
| Age: 15-16 GIRLS | 23.4 | 70.7 | 0.6 | 5.4 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS. 'мот in SCHool' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $6.1 \%$ in 2006 to $3 \%$ in 2007 to $2.6 \%$ in 2008 to $2 \%$ in 2009 to $1.7 \%$ in 2010 to $1.8 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 56 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 7.656 .9 | 30.9 | 4.6 |  |  |  |  |  |  |  |  | 100 |
| II | 6.6 | 37.1 | 51.2 | 5.1 |  |  |  |  |  |  |  | 100 |
| III | 4.7 |  | 32.9 | 54.4 | 6.2 | 1.8 |  |  |  |  |  | 100 |
| IV | 4.3 |  |  | 31.4 | 54.9 | 7.4 | 2.0 |  |  |  |  | 100 |
| V | 3.6 |  |  |  | 30.9 | 54.8 | 8.3 | 2.3 |  |  |  | 100 |
| VI | 4.7 |  |  |  |  | 31.1 | 54.3 | 7.7 | 2.2 |  |  | 100 |
| VII | 5.6 |  |  |  |  |  | 35.1 | 48.6 | 8.7 | 2.0 |  | 100 |
| VIII | 2.1 |  |  |  |  |  | 6.0 | 33.8 | 48.7 | 7.7 | 1.7 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $32.9 \%$ children are 8 years old but there are also $4.7 \%$ who are 7 years old or younger, $54.4 \%$ who are $9,6.2 \%$ who are 10 years old, etc.

## Young children in pre-school and school

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 13.1 | 48.6 | 29.7 | 6.3 | 2.4 | 100 |
| II | 4.5 | 21.9 | 42.2 | 22.6 | 8.8 | 100 |
| III | 2.7 | 10.8 | 22.9 | 37.4 | 26.2 | 100 |
| IV | 0.9 | 5.0 | 13.0 | 33.5 | 47.6 | 100 |
| V | 1.1 | 3.4 | 7.2 | 24.8 | 63.5 | 100 |
| VI | 0.8 | 2.3 | 5.0 | 18.1 | 73.8 | 100 |
| VII | 0.9 | 1.5 | 3.0 | 13.1 | 81.6 | 100 |
| VIII | 0.4 | 0.9 | 2.1 | 10.8 | 85.9 | 100 |
| Total | 3.0 | 11.5 | 15.5 | 21.2 | 48.9 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $2.7 \%$ children cannot even read letters, $10.8 \%$ can read letters but not more, 22.9\% can read words but not Std 1 text or higher, 37.4\% can read Std 1 text but not Std 2 level text, and $26.2 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 86.1 |
| Home language is different from school language | 13.9 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Maharashtra rural 

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 1-9 | $11-99$ |  |  |  |
| I | 12.5 | 65.2 | 18.5 | 2.7 | 1.1 | 100 |
| II | 4.4 | 37.2 | 45.6 | 11.6 | 1.1 | 100 |
| III | 2.2 | 18.4 | 43.2 | 32.2 | 4.0 | 100 |
| IV | 0.9 | 9.1 | 31.3 | 43.2 | 15.5 | 100 |
| V | 1.3 | 6.0 | 20.7 | 39.2 | 32.9 | 100 |
| VII | 1.0 | 4.0 | 15.9 | 35.1 | 44.0 | 100 |
| VII | 0.9 | 3.3 | 11.1 | 32.3 | 52.3 | 100 |
| VIII | 0.6 | 2.0 | 9.9 | 26.3 | 61.2 | 100 |
| Total | 2.9 | 17.7 | 24.7 | 28.5 | 26.3 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, $2.2 \%$ children cannot even recognize numbers 1-9, 18.4\% children can recognize numbers up to 9 but not more, $43.2 \%$ can recognize numbers to 99 but cannot do subtraction, $32.2 \%$ can do subtraction but not division, and $4.0 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

|  | Pvt | 23.3 | 22.8 | 25.1 | 23.7 | 17.2 | 13.6 | 17.9 | 13.6 | 16.8 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Maharashtra rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | ---: | ---: | ---: | ---: |
| Std I-IV/N: Primary | 488 | 485 | 435 | 408 |
| Std I-VII/VIII: Primary + Upper primary | 411 | 450 | 467 | 421 |
| Total schools visited | 899 | 935 | 902 | 829 |

## Student and teacher attendance

Table 9: Student attendance 2007, 2009, 2010 and 2011

| Type of school | 2007\|2009 |  | 2010 | 2011 | 2007 | 2009 | 2010 | 2011 |

|  | Payment of bills (electricity, water, cleaning etc.) | 39.7 | 54.8 | 5.5 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 8 OUT OF 9 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: $6-14$ ALL | 27.7 | 71.1 | 0.1 | 1.1 | 100 |
| Age: 7-16 ALL | 26.9 | 71.0 | 0.1 | 2.0 | 100 |
| Age: 7-10 ALL | 29.5 | 69.7 | 0.1 | 0.7 | 100 |
| Age: 7-10 BOYS | 29.4 | 69.8 | 0.0 | 0.8 | 100 |
| Age: 7-10 GIRLS | 29.6 | 69.7 | 0.1 | 0.7 | 100 |
| Age: 11-14 ALL | 24.8 | 73.5 | 0.1 | 1.6 | 100 |
| Age: 11-14 BOYS | 25.3 | 73.1 | 0.2 | 1.4 | 100 |
| Age: 11-14 GIRLS | 24.2 | 74.0 | 0.1 | 1.7 | 100 |
| Age: 15-16 ALL | 23.3 | 67.6 | 0.4 | 8.7 | 100 |
| Age: 15-16 BOYS | 21.0 | 67.1 | 0.6 | 11.3 | 100 |
| Age: 15-16 GIRLS | 25.6 | 68.0 | 0.2 | 6.2 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS. 'мот in SCHool' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $5.9 \%$ in 2006 to $7.1 \%$ in 2007 to $4.6 \%$ in 2008 to $2.3 \%$ in 2009 to $3.3 \%$ in 2010 to $1.7 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 17.0 | 38.5 | 21.8 | 14.4 | 8.3 |  |  |  |  |  |  |  | 100 |
| II | 3.3 | 11.3 | 25.9 | 31.3 | 13.9 | 8.9 | 5.4 |  |  |  |  |  | 100 |
| III |  | . 2 | 11.0 | 31.1 | 19.0 | 19.3 | 5.8 | 6.3 | 3.4 |  |  |  | 100 |
| IV | 5.4 |  |  | 8.6 | 25.5 | 30.1 | 11.9 | 11.4 | 7.1 |  |  |  | 100 |
| V | 5.6 |  |  |  | 6.7 | 34.3 | 19.2 | 14.4 | 10.3 | 7.4 | 2.2 |  | 100 |
| VI | 4.1 |  |  |  |  | 11.8 | 20.4 | 31.2 | 18.3 | 8.1 | 6.2 |  | 100 |
| VII | 8.7 |  |  |  |  |  |  | 37.5 | 29.8 | 16.0 | 8.0 |  | 100 |
| VIII | 3.4 |  |  |  |  |  |  | 11.4 | 31.4 | 31.1 | 16.3 | 6.4 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $31.1 \%$ children are 8 years old but there are also $11.0 \%$ who are $7,19.0 \%$ who are $9,19.3 \%$ who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | In LKG/UKG | In School |  |  |  | $\begin{aligned} & \overline{00} \\ & 0 \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Govt | Pvt | Other |  |  |
| Age 5 | 7.0 | 52.0 | 12.3 | 27.8 | 0.0 | 0.9 | 100 |
| Age 6 | 1.6 | 26.5 | 22.8 | 48.4 | 0.0 | 0.9 | 100 |

Chart 3: Trends over time
Five year olds in pre-school \& school 2007, 2009 \& 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | :---: | ---: | ---: | :---: | :---: | :---: |
| I | 4.0 | 46.7 | 33.2 | 8.6 | 7.4 | 100 |
| II | 1.8 | 16.8 | 43.3 | 21.3 | 16.8 | 100 |
| III | 0.8 | 8.1 | 24.1 | 31.4 | 35.6 | 100 |
| IV | 0.9 | 7.8 | 14.1 | 26.2 | 51.1 | 100 |
| V | 0.2 | 4.9 | 8.4 | 15.2 | 71.3 | 100 |
| VI | 0.6 | 3.1 | 4.8 | 13.4 | 78.1 | 100 |
| VII | 0.8 | 2.0 | 3.6 | 7.8 | 85.9 | 100 |
| VIII | 0.2 | 0.4 | 1.1 | 8.1 | 90.1 | 100 |
| Total | 1.3 | 13.1 | 18.7 | 17.3 | 49.6 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $0.8 \%$ children cannot even read letters, $8.1 \%$ can read letters but not more, $24.1 \%$ can read words but not Std 1 text or higher, $31.4 \%$ can read Std 1 text but not Std 2 level text, and $35.6 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT
By school type 2008-2011

Note: This tool was also available in Metei Mayek and Manipuri.

Chart 5: Trends over time
\% Children in Std V who CANNot READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| \% Children who took the reading test in: | \% | Of the \% Children who tested in: | \% Children whose home language was: |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | M anipuri | Tangkhul | Kuki | Hmar | Kabui | Paite | Anal | Other * | Total |
| English | 98.0 | English | 53.8 | 15.0 | 7.0 | 4.3 | 2.9 | 2.9 | 1.9 | 12.2 | 100 |
| M anipuri | 2.0 | * 'Other' includes all languages from the list of scheduled and non-scheduled languages except those specified above. Data for home language of children tested in Manipuri has not been reported here due to small cell sizes. |  |  |  |  |  |  |  |  |  |
| Total | 100.0 |  |  |  |  |  |  |  |  |  |  |

Note: In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. In Manipur, where the medium of instruction in government schools is English or M anipuri, children were given the choice of reading in English, M anipuri or M eitei Mayek. Figures of M eitei Mayek have not been included due to insufficient data. For home languages, a list of 122 languages was provided to all survey teams. This includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Manipur 

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | $1-9$ | $11-99$ |  |  |  |
| I | 5.2 | 33.1 | 53.3 | 7.1 | 1.4 | 100 |
| II | 2.0 | 10.3 | 57.8 | 24.7 | 5.2 | 100 |
| III | 0.8 | 4.6 | 38.8 | 39.5 | 16.4 | 100 |
| IV | 1.0 | 3.4 | 20.8 | 45.5 | 29.3 | 100 |
| V | 0.2 | 2.3 | 9.7 | 38.2 | 49.6 | 100 |
| VI | 0.5 | 1.2 | 6.9 | 28.5 | 62.9 | 100 |
| VII | 0.8 | 0.5 | 6.1 | 17.0 | 75.7 | 100 |
| VIII | 0.2 | 0.6 | 3.2 | 14.1 | 81.9 | 100 |
| Total | 1.5 | 8.3 | 27.7 | 27.5 | 35.0 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, $0.8 \%$ children cannot even recognize numbers 1-9, 4.6\% children can recognize numbers up to 9 but not more, $38.8 \%$ can recognize numbers to 99 but cannot do subtraction, $39.5 \%$ can do subtraction but not division, and $16.4 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 17.2 | 18.0 | 19.5 | 26.0 | 24.1 | 26.6 | 28.9 | 35.3 | 22.3 |
|  | Pvt | 43.6 | 52.4 | 53.1 | 53.7 | 58.6 | 53.5 | 59.2 | 59.9 | 54.0 |
| 2009 | Govt | 12.0 | 18.8 | 16.0 | 17.1 | 17.6 | 21.6 | 15.2 | 29.7 | 18.2 |
|  | Pvt | 42.4 | 46.0 | 49.5 | 50.7 | 45.7 | 49.9 | 51.8 | 55.2 | 48.5 |
| 2010 | Govt | 9.9 | 13.2 | 11.3 | 14.7 | 16.9 | 16.4 | 15.4 | 27.6 | 15.0 |
|  | Pvt | 38.9 | 41.3 | 49.2 | 51.9 | 48.6 | 52.9 | 59.3 | 61.7 | 49.9 |
| 2011 | Govt | 11.0 | 15.3 | 13.2 | 12.5 | 13.6 | 23.2 | 20.8 | 19.8 | 15.1 |
|  | Pvt | 43.0 | 43.3 | 43.7 | 51.3 | 52.4 | 50.4 | 52.6 | 57.2 | 48.8 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Manipur rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

| Age: 11-14 BOYS | 39.7 | 48.0 | 1.3 | 11.0 | 100 |
| Age: 11-14 GIRLS | 35.7 | 58.1 | 1.5 | 4.7 | 100 |
| Age: 15-16 ALL | 35.3 | 45.0 | 0.7 | 19.0 | 100 |
| Age: 15-16 BOYS | 38.9 | 38.5 | 0.3 | 22.2 | 100 |
| Age: 15-16 GIRLS | 31.7 | 51.6 | 1.0 | 15.7 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS. 'мот in SCHool' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $5.4 \%$ in 2006 to $6.4 \%$ in 2007 to $2.7 \%$ in 2008 to $4.4 \%$ in 2009 to $6.8 \%$ in 2010 to $4.7 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 8.0 | 17.7 | 19.8 | 20.9 | 10.7 | 11.1 | 3.4 | 8.5 |  |  |  |  | 100 |
| II |  | 6. 5 | 13.2 | 21.8 | 17.1 | 17.1 | 7.9 | 8.9 | 7.6 |  |  |  | 100 |
| III | 5.9 |  |  | 13.6 | 19.1 | 18.0 | 14.8 | 12.3 | 7.8 | 8.5 |  |  | 100 |
| IV | 4.8 |  |  |  | 12.7 | 24.4 | 13.7 | 17.4 | 9.6 | 7.6 | 5.7 | 4.2 | 100 |
| V | 4.3 |  |  |  |  | 11.9 | 16.9 | 21.8 | 16.3 | 11.1 | 10.7 | 7.0 | 100 |
| VI | 4.4 |  |  |  |  |  | 10.5 | 20.4 | 21.1 | 20.5 | 15.9 | 7.3 | 100 |
| VII | 4.4 |  |  |  |  |  |  | 17.5 | 21.5 | 27.7 | 16.9 | 12.1 | 100 |
| VIII | 7.0 |  |  |  |  |  |  |  | 19.1 | 30.4 | 25.3 | 18.2 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $13.6 \%$ children are 8 years old but there are also $5.9 \%$ who are 7 years old or younger, $19.1 \%$ who are $9,18.0 \%$ who are 10 years old, etc.

## Young children in pre-school and school

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 17.5 | 33.5 | 36.8 | 8.0 | 4.2 | 100 |
| II | 9.4 | 18.7 | 39.2 | 19.6 | 13.1 | 100 |
| III | 6.2 | 7.2 | 38.3 | 20.7 | 27.5 | 100 |
| IV | 4.1 | 5.4 | 24.9 | 29.2 | 36.4 | 100 |
| V | 4.8 | 3.4 | 14.9 | 23.5 | 53.5 | 100 |
| VI | 4.2 | 5.4 | 10.2 | 24.2 | 56.0 | 100 |
| VII | 4.2 | 2.2 | 4.5 | 17.2 | 71.9 | 100 |
| VIII | 2.2 | 6.2 | 2.5 | 6.0 | 83.2 | 100 |
| Total | 8.1 | 13.3 | 26.7 | 18.7 | 33.3 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $6.2 \%$ children cannot even read letters, $7.2 \%$ can read letters but not more, 38.3\% can read words but not Std 1 text or higher, 20.7\% can read Std 1 text but not Std 2 level text, and 27.5\% can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

Reading Tool

Note: This tool was also available in Garo and English.

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| Of Children whose school language was Garo or Khasi: |  | \% Children who took the reading test in: | \% | Of the \% Children who tested in: | \% Children whose home language was: |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| \% Children whose | \% |  |  |  | Garo | Khasi | M aram | Other * | Total |
| Home language is the same as school language | 51.7 | Garo / Khasi | 52.7 | Garo / Khasi | 31.5 | 21.6 | 9.8 | 37.2 | 100 |
| Home language is different from school language | 48.3 | English | 47.3 | English | 16.3 | 51.4 | 4.9 | 27.4 | 100 |
| Total | 100 | Total | 100 | * 'Other' includes all languages from the list of scheduled and non-scheduled languages except those specified above. |  |  |  |  |  |

Note: In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. In Meghalaya, where the medium of instruction in government schools is Garo, Khasi or English, children were given the choice of reading in any one of these languages. Figures for Garo and Khasi have been combined. For home languages, a list of 122 languages was provided to all survey teams. This included 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 1-9 | $11-99$ |  |  |  |
| I | 13.5 | 43.4 | 39.0 | 3.8 | 0.4 | 100 |
| II | 6.7 | 32.9 | 47.7 | 11.1 | 1.6 | 100 |
| III | 6.5 | 20.6 | 41.5 | 28.4 | 3.1 | 100 |
| IV | 5.1 | 14.3 | 38.3 | 32.7 | 9.6 | 100 |
| V | 4.8 | 10.9 | 20.5 | 42.5 | 21.3 | 100 |
| VII | 4.7 | 12.1 | 18.0 | 36.6 | 28.7 | 100 |
| VII | 4.4 | 4.7 | 16.4 | 27.5 | 47.1 | 100 |
| VIII | 2.2 | 8.4 | 6.4 | 19.1 | 64.0 | 100 |
| Total | 7.0 | 22.8 | 33.4 | 22.8 | 14.1 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, $6.5 \%$ children cannot even recognize numbers 1-9, 20.6\% children can recognize numbers up to 9 but not more, $41.5 \%$ can recognize numbers to 99 but cannot do subtraction, $28.4 \%$ can do subtraction but not division, and $3.1 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | ---: |
| 2007 | Govt | 2.7 | 5.7 | 4.3 | 3.9 | 8.4 | 14.9 | 15.7 | 11.0 | 5.8 |
|  | Pvt | 23.7 | 28.0 | 25.8 | 29.9 | 24.7 | 29.9 | 37.3 | 34.6 | 28.3 |
| 2009 | Govt | 4.8 | 7.5 | 10.9 | 7.6 | 9.2 | 13.8 | 22.6 | 27.4 | 9.8 |
|  | Pvt | 22.8 | 17.2 | 16.0 | 23.4 | 20.4 | 20.7 | 19.3 | 35.5 | 21.2 |
| 2010 | Govt | 4.7 | 5.7 | 7.9 | 10.4 | 13.9 | 13.1 | 21.8 | 14.7 | 9.8 |
|  | Pvt | 21.1 | 20.6 | 20.6 | 19.2 | 14.8 | 14.7 | 18.8 | 22.3 | 18.9 |
| 2011 | Govt | 7.0 | 7.3 | 8.6 | 10.9 | 10.9 | 31.4 | 22.2 | 26.7 | 11.8 |
|  | Pvt | 19.0 | 21.0 | 25.0 | 23.3 | 20.2 | 22.8 | 23.7 | 26.6 | 22.3 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Meghalaya fural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to <br> each school | For what purposes |
| :---: | :--- |

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

| Rs. 5000 per year per | This grant can be used for |
| :--- | :--- | primary school

Rs. 7000 per year per upper primary school

Rs $5000+$ Rs $7000=$ Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^48]

Note: 'отнеR' includes children going to madarssa and EGS
'лот in Sснооl' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 4.4\% in 2006 to $5.4 \%$ in 2008 to1.8\% in 2009 to $4.4 \%$ in 2010 to 1.1\% in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 22.9 | 45.5 | 26.0 | 5.5 |  |  |  |  |  |  |  |  | 100 |
| II | 2.4 | 10.7 | 43.3 | 29.6 | 11.0 | 3.0 |  |  |  |  |  |  | 100 |
| III |  | 1.8 | 10.2 | 28.2 | 39.9 | 13.1 | 6.7 |  |  |  |  |  | 100 |
| IV | 2.3 |  |  | 9.7 | 25.5 | 34.2 | 10.9 | 9.6 | 6.3 | 1.4 |  |  | 100 |
| V | 6.9 |  |  |  |  | 26.7 | 34.3 | 13.4 | 9.0 | 6.2 | 3.5 |  | 100 |
| VI | 7.6 |  |  |  |  |  | 22.0 | 34.4 | 18.0 | 7.4 | 6.7 | 4.0 | 100 |
| VII | 8.0 |  |  |  |  |  |  | 23.6 | 31.5 | 20.9 | 10.2 | 5.8 | 100 |
| VIII | 2.3 |  |  |  |  |  |  | 6.4 | 23.0 | 38.4 | 17.4 | 12.6 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $28.2 \%$ children are 8 years old but there are also $10.2 \%$ who are $7,39.9 \%$ who are $9,13.1 \%$ who are 10 years old, etc

## Young children in pre-school and school

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | :---: | ---: | ---: | :---: | :---: | :---: |
| I | 5.3 | 46.4 | 39.6 | 5.9 | 2.8 | 100 |
| II | 2.3 | 11.3 | 38.6 | 35.0 | 12.8 | 100 |
| III | 1.4 | 3.9 | 14.7 | 40.4 | 39.6 | 100 |
| IV | 1.0 | 2.7 | 11.0 | 18.9 | 66.4 | 100 |
| V | 0.0 | 2.8 | 4.8 | 14.1 | 78.4 | 100 |
| VI | 0.2 | 1.9 | 2.8 | 7.2 | 87.9 | 100 |
| VII | 0.0 | 1.7 | 1.7 | 3.3 | 93.3 | 100 |
| VIII | 0.4 | 2.4 | 1.1 | 6.2 | 89.9 | 100 |
| Total | 1.6 | 10.8 | 17.1 | 18.6 | 52.0 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $1.4 \%$ children cannot even read letters, $3.9 \%$ can read letters but not more, $14.7 \%$ can read words but not Std 1 text or higher, $40.4 \%$ can read Std 1 text but not Std 2 level text, and $39.6 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

Reading Tool

Note: This tool was also available in English and Mara.

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| \% Children who took the reading test in: | \% | Of the \% Children who tested in: | \% Children whose home language was: |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Lushai/M izo | Bengali | Lakher | Pawi | Other * | Total |
| Mizo or Mara | 69.6 | Mizo or Mara | 87.0 | 1.2 | 6.1 | 2.8 | 3.0 | 100 |
| English | 30.4 | English | 45.7 | 53.0 | 0.1 | 0.1 | 1.1 | 100 |

* 'Other' includes all languages from the list of scheduled and non-scheduled languages except those specified above.

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

| Age: 11-14 GIRLS | 57.3 | 40.2 | 0.1 | 2.5 | 100 |
| Age: 15-16 ALL | 49.1 | 39.4 | 0.0 | 11.5 | 100 |
| Age: 15-16 BOYS | 48.4 | 39.2 | 0.1 | 12.3 | 100 |
| Age: 15-16 GIRLS | 49.9 | 39.5 | 0.0 | 10.6 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS
'мот in school' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $6.4 \%$ in 2006 to $4.5 \%$ in 2007 to $5.8 \%$ in 2008 to $3.7 \%$ in 2009 to $3.2 \%$ in 2010 to $2.5 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 8.6 | 36.3 | 34.4 | 10.5 | 5.2 | 5.0 |  |  |  |  |  |  | 100 |
| II |  | 7.5 | 23.6 | 36.3 | 17.8 | 7.6 | 7.2 |  |  |  |  |  | 100 |
| III | 9.3 |  |  | 26.0 | 29.5 | 16.9 | 8.9 | 5.2 | 4.2 |  |  |  | 100 |
| IV | 2.5 |  |  | 6.5 | 21.3 | 30.1 | 15.9 | 13.1 | 7.0 | 3.7 |  |  | 100 |
| V | 8.3 |  |  |  |  | 25.2 | 24.1 | 22.6 | 12.0 | 7.9 |  |  | 100 |
| VI | 1.9 |  |  |  |  | 7.8 | 16.5 | 32.4 | 21.8 | 11.3 | 8.4 |  | 100 |
| VII | 7.2 |  |  |  |  |  |  | 21.9 | 29.6 | 24.2 | 11.2 | 5.9 | 100 |
| VIII | 6.3 |  |  |  |  |  |  |  | 20.8 | 40.1 | 21.9 | 10.8 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $26.0 \%$ children are 8 years old but there are also $9.3 \%$ who are 7 years old or younger, 29.5\% who are $9,16.9 \%$ who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | In LKG/ UKG | In School |  |  |  | $\begin{aligned} & \overline{\mathbb{O}} \\ & \stackrel{0}{0} \end{aligned}$ |

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | :---: | ---: | ---: | :---: | :---: | :---: |
| I | 5.1 | 42.9 | 42.4 | 6.8 | 2.8 | 100 |
| II | 1.7 | 20.3 | 49.8 | 22.5 | 5.7 | 100 |
| III | 0.9 | 11.7 | 29.8 | 38.1 | 19.6 | 100 |
| IV | 0.3 | 7.7 | 17.9 | 36.4 | 37.7 | 100 |
| V | 0.4 | 3.0 | 10.7 | 27.0 | 59.0 | 100 |
| VI | 0.2 | 2.5 | 5.1 | 20.6 | 71.6 | 100 |
| VII | 0.0 | 2.9 | 2.5 | 11.3 | 83.3 | 100 |
| VIII | 0.5 | 1.4 | 2.5 | 5.6 | 90.0 | 100 |
| Total | 1.5 | 14.9 | 25.3 | 22.4 | 35.9 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $0.9 \%$ children cannot even read letters, $11.7 \%$ can read letters but not more, 29.8\% can read words but not Std 1 text or higher, 38.1\% can read Std 1 text but not Std 2 level text, and $19.6 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 2007 | Govt | 15.4 | 14.6 | 19.1 | 19.6 | 27.1 | 12.7 | 16.3 | 23.7 | 18.5 |
|  | Pvt | 28.5 | 34.3 | 40.2 | 40.1 | 38.5 | 49.9 | 48.5 | 57.7 | 42.0 |
| 2009 | Govt | 12.9 | 10.8 | 9.3 | 8.4 | 14.6 | 13.2 | 14.8 | 21.7 | 12.3 |
|  | Pvt | 36.4 | 36.8 | 41.1 | 40.0 | 40.8 | 45.9 | 52.1 | 54.5 | 43.1 |
| 2010 | Govt | 7.6 | 7.2 | 7.1 | 8.7 | 7.8 | 5.8 | 6.8 | 10.3 | 7.7 |
|  | Pvt | 26.5 | 31.9 | 34.7 | 32.2 | 32.2 | 30.0 | 40.0 | 39.8 | 33.3 |
| 2011 | Govt | 11.7 | 11.4 | 12.0 | 13.0 | 11.1 | 15.0 | 15.6 | 14.5 | 12.6 |
|  | Pvt | 32.2 | 36.3 | 40.4 | 39.0 | 42.2 | 43.1 | 45.0 | 52.8 | 40.4 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Nagaland rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March $2012 .{ }^{1}$

| EVERY RURAL GOVERNM ENT PRIMARY SCHOOL <br> IS ENTITLED TO EACH OF THESE SSA GRANTS <br> EVERY YEAR. <br> How much goes to <br> each school |
| :--- |
| For what purposes |
| SCHOOL DEVELOPM ENT GRANT / SCHOOL GRANT |
| Rs. 5000 per year per <br> primary school |
| This grant can be used for <br> buying school equipment <br> such as blackboard, sitting |
| Rs. 7000 per year per upper <br> primary school |
| mats etc. Also for buying <br> chalk, duster, registers and <br> other office equipment. |
| Rs 5000 + Rs 7000 $=$ <br> Rs 1200 if the school is <br> Std I-VIIINIII. |
| Note: Primary and Upper <br> Primary schools are treated <br> as separate schools even if <br> they are in the same pre- <br> mises. |
| The grant amount varies by <br> type of school: whether it is <br> a primary or upper primary <br> school. |

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: $6-14$ ALL | 91.2 | 5.0 | 0.1 | 3.7 | 100 |
| Age: 7-16 ALL | 86.8 | 5.5 | 0.1 | 7.6 | 100 |
| Age: 7-10 ALL | 93.3 | 4.5 | 0.1 | 2.1 | 100 |
| Age: 7-10 BOYS | 93.8 | 4.4 | 0.1 | 1.7 | 100 |
| Age: 7-10 GIRLS | 92.8 | 4.6 | 0.1 | 2.5 | 100 |
| Age: 11-14 ALL | 89.2 | 4.9 | 0.1 | 5.8 | 100 |
| Age: 11-14 BOYS | 89.1 | 5.5 | 0.1 | 5.4 | 100 |
| Age: 11-14 GIRLS | 89.2 | 4.3 | 0.1 | 6.4 | 100 |
| Age: 15-16 ALL | 66.8 | 9.1 | 0.0 | 24.1 | 100 |
| Age: 15-16 BOYS | 68.7 | 9.4 | 0.0 | 22.0 | 100 |
| Age: 15-16 GIRLS | 64.7 | 8.8 | 0.0 | 26.4 | 100 |

Note: 'оTHER' includes children going to madarssa and EGS
'мот IN SCHool' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 13.7\% in 2006 to $12.4 \%$ in 2007 to $12 \%$ in 2008 to $9.9 \%$ in 2009 to $7.2 \%$ in 2010 to $6.4 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 40.5 | 46.8 | 7.7 | 5.1 |  |  |  |  |  |  |  |  | 100 |
| II | 3.1 | 15.9 | 61.3 | 14.4 | 5.4 |  |  |  |  |  |  |  | 100 |
| III |  | 3.7 | 11.7 | 65.6 | 12.8 | 6.3 |  |  |  |  |  |  | 100 |
| IV | 3.4 |  |  | 13.2 | 60.5 | 16.3 | 6.6 |  |  |  |  |  | 100 |
| V | 2.6 |  |  |  | 7.0 | 69.0 | 12.6 | 8.9 |  |  |  |  | 100 |
| VI | 2.4 |  |  |  |  | 11.3 | 57.6 | 21.7 | 7.1 |  |  |  | 100 |
| VII | 4.5 |  |  |  |  |  | 8.2 | 66.7 | 13.5 | 7.1 |  |  | 100 |
| VIII | 4.0 |  |  |  |  |  |  | 14.2 | 59.5 | 16.2 | 6.1 |  | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $65.6 \%$ children are 8 years old but there are also $11.7 \%$ who are $7,12.8 \%$ who are 9 years old, etc.

## Young children in pre-school and school

| :--- |
| types of pre-school \& school 2011 |

Chart 3: Trends over time
Five year olds in pre-school \& school 2007, 2009 \& 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 44.9 | 34.5 | 13.2 | 3.5 | 3.8 | 100 |
| II | 16.9 | 34.8 | 29.0 | 11.2 | 8.1 | 100 |
| III | 8.0 | 22.6 | 29.1 | 23.4 | 16.9 | 100 |
| IV | 4.5 | 13.3 | 24.2 | 29.6 | 28.5 | 100 |
| V | 3.1 | 8.3 | 19.3 | 30.3 | 39.1 | 100 |
| VI | 0.9 | 4.8 | 12.8 | 26.3 | 55.2 | 100 |
| VII | 1.3 | 3.9 | 9.2 | 21.5 | 64.1 | 100 |
| VIII | 0.9 | 2.1 | 5.6 | 15.5 | 75.9 | 100 |
| Total | 11.1 | 16.3 | 18.0 | 19.9 | 34.7 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $8 \%$ children cannot even read letters, $22.6 \%$ can read letters but not more, 29.1\% can read words but not Std 1 text or higher, 23.4\% can read Std 1 text but not Std 2 level text, and $16.9 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 91.9 |
| Home language is different from school language | 8.1 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | :---: | :---: | ---: | ---: |
|  |  | $1-9$ | $11-99$ |  |  |  |
| I | 47.0 | 35.8 | 12.8 | 3.2 | 1.3 | 100 |
| II | 18.1 | 39.5 | 29.1 | 10.8 | 2.4 | 100 |
| III | 8.2 | 28.9 | 34.9 | 21.2 | 6.8 | 100 |
| IV | 4.3 | 18.7 | 32.5 | 29.5 | 15.1 | 100 |
| V | 3.0 | 14.4 | 26.7 | 33.7 | 22.2 | 100 |
| VI | 1.4 | 8.9 | 20.9 | 33.7 | 35.1 | 100 |
| VII | 1.7 | 6.8 | 18.0 | 31.4 | 42.1 | 100 |
| VIII | 1.3 | 5.3 | 11.3 | 29.3 | 52.9 | 100 |
| Total | 11.6 | 20.4 | 23.3 | 23.6 | 21.1 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 8.2\% children cannot even recognize numbers 1-9, 28.9\% children can recognize numbers up to 9 but not more, $34.9 \%$ can recognize numbers to 99 but cannot do subtraction, $21.2 \%$ can do subtraction but not division, and $6.8 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Tuition

Table 7: Class-wise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 32.9 | 45.5 | 43.7 | 50.3 | 50.8 | 51.5 | 51.0 | 52.1 | 46.7 |
|  | Pvt | 57.0 | 60.8 | 40.1 | 52.6 | 62.3 | 42.3 | 55.3 | 36.8 | 50.5 |
| 2009 | Govt | 35.6 | 44.5 | 51.6 | 50.2 | 52.2 | 55.3 | 55.8 | 56.0 | 49.7 |
|  | Pvt | 64.9 | 68.7 | 81.9 | 67.9 | 81.2 | 66.1 | 68.1 | 60.9 | 69.1 |
| 2010 | Govt | 36.2 | 41.2 | 49.1 | 48.8 | 49.9 | 54.7 | 52.0 | 55.2 | 48.1 |
|  | Pvt | 54.4 | 65.7 | 81.1 | 68.7 | 78.3 | 72.9 | 67.5 | 48.4 | 64.9 |
| 2011 | Govt | 29.6 | 39.9 | 43.6 | 48.6 | 45.9 | 50.4 | 51.8 | 50.8 | 44.8 |
|  | Pvt | 62.0 | 55.5 | 63.7 | 61.2 | 75.2 | 75.0 | 69.5 | 55.4 | 63.2 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Odisha rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to <br> each school | For what purposes |
| :--- | :--- |
| SCHOOL DEVELOPM ENT GRANT / SCHOOL GRANT |  |

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS 19 OUT OF 19 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6 -14 ALL | 58.4 | 39.6 | 0.4 | 1.6 | 100 |
| Age: 7-16 ALL | 59.7 | 37.0 | 0.4 | 2.9 | 100 |
| Age: 7-10 ALL | 56.8 | 42.4 | 0.3 | 0.5 | 100 |
| Age: 7-10 BOYS | 52.9 | 46.1 | 0.4 | 0.6 | 100 |
| Age: 7-10 GIRLS | 61.6 | 37.8 | 0.2 | 0.4 | 100 |
| Age: 11-14 ALL | 62.4 | 34.3 | 0.5 | 2.8 | 100 |
| Age: 11-14 BOYS | 60.7 | 36.1 | 0.3 | 2.9 | 100 |
| Age: 11-14 GIRLS | 64.6 | 32.0 | 0.8 | 2.6 | 100 |
| Age: 15-16 ALL | 60.7 | 28.6 | 0.4 | 10.3 | 100 |
| Age: 15-16 BOYS | 61.1 | 28.9 | 0.4 | 9.6 | 100 |
| Age: 15-16 GIRLS | 60.2 | 28.2 | 0.5 | 11.2 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS 'мот in school' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 5\% in 2006 to $4.9 \%$ in 2007 to $4.9 \%$ in 2008 to $6.2 \%$ in 2009 to 2.7\% in 2010 to $2.6 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 29.0 | 37.6 | 20.5 | 8.8 | 4.0 |  |  |  |  |  |  |  | 100 |
| II | 4.6 | 15.6 | 34.6 | 30.9 | 9.2 | 5.0 |  |  |  |  |  |  | 100 |
| III |  | 4.0 | 15.8 | 35.9 | 25.7 | 12.9 | 5.7 |  |  |  |  |  | 100 |
| IV | 2.9 |  |  | 13.7 | 30.0 | 33.1 | 13.4 | 6.9 |  |  |  |  | 100 |
| V | 3.6 |  |  |  | 11.3 | 38.9 | 27.2 | 13.1 | 5.9 |  |  |  | 100 |
| VI | 3.4 |  |  |  |  | 12.5 | 29.9 | 36.4 | 12.2 | 5.4 |  |  | 100 |
| VII | 3.3 |  |  |  |  |  | 10.5 | 31.5 | 34.8 | 14.4 | 5.6 |  | 100 |
| VIII | 2.6 |  |  |  |  |  |  | 11.4 | 31.3 | 34.0 | 16.4 | 4.3 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $35.9 \%$ children are 8 years old but there are also $15.8 \%$ who are $7,25.7 \%$ who are 9 , 12.9\% who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | $\begin{aligned} & \text { In LKG/ } \\ & \text { UKG } \end{aligned}$ | In School |  |  |  | ¢ |

|  |  |  | Govt | Pvt | Other |  |  |
| Age 5 | 10.0 | 10.8 | 30.1 | 47.2 | 0.2 | 1.7 | 100 |
| Age 6 | 2.0 | 5.8 | 44.8 | 45.8 | 0.5 | 1.2 | 100 |

Chart 3: Trends over time
Five year olds in pre-school \& school 2007, 2009 \& 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | :---: | ---: | ---: | :---: | :---: | :---: |
| I | 21.9 | 50.6 | 19.9 | 3.8 | 3.9 | 100 |
| II | 4.8 | 29.1 | 39.8 | 15.4 | 10.9 | 100 |
| III | 1.7 | 12.3 | 27.5 | 29.9 | 28.7 | 100 |
| IV | 1.0 | 6.7 | 11.8 | 26.1 | 54.4 | 100 |
| V | 0.8 | 4.7 | 7.6 | 15.1 | 71.9 | 100 |
| VI | 0.9 | 2.9 | 5.4 | 11.5 | 79.3 | 100 |
| VII | 0.8 | 2.0 | 2.7 | 8.8 | 85.7 | 100 |
| VIII | 0.8 | 1.8 | 2.6 | 6.1 | 88.7 | 100 |
| Total | 4.2 | 14.6 | 15.8 | 15.2 | 50.2 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $1.7 \%$ children cannot even read letters, $12.3 \%$ can read letters but not more, 27.5\% can read words but not Std 1 text or higher, 30.0\% can read Std 1 text but not Std 2 level text, and $28.7 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 81.4 |
| Home language is different from school language | 18.6 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1.9 | $11-99$ |  |  |  |
| I | 17.2 | 41.4 | 31.0 | 7.3 | 3.1 | 100 |
| II | 2.8 | 22.0 | 41.0 | 30.9 | 3.3 | 100 |
| III | 1.8 | 11.3 | 25.4 | 45.1 | 16.4 | 100 |
| IV | 1.1 | 5.9 | 16.4 | 33.1 | 43.5 | 100 |
| V | 0.7 | 5.1 | 10.4 | 22.5 | 61.3 | 100 |
| VI | 0.6 | 2.6 | 10.4 | 20.3 | 66.1 | 100 |
| VII | 0.6 | 1.2 | 8.9 | 19.7 | 69.6 | 100 |
| VIII | 0.9 | 1.2 | 8.8 | 15.6 | 73.5 | 100 |
| Total | 3.3 | 12.0 | 20.0 | 25.1 | 39.7 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 1.8\% children cannot even recognize numbers 1-9, 11.3\% children can recognize numbers up to 9 but not more, $25.4 \%$ can recognize numbers to 99 but cannot do subtraction, $45.1 \%$ can do subtraction but not division, and $16.4 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 6: Trends over time

## Tuition

Table 7: Class-wise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 9.1 | 11.7 | 13.8 | 13.6 | 16.2 | 14.6 | 12.6 | 20.4 | 14.4 |
|  | Pvt | 22.8 | 20.9 | 23.0 | 30.9 | 28.7 | 20.7 | 26.2 | 29.6 | 25.1 |
| 2009 | Govt | 13.3 | 15.1 | 23.8 | 19.7 | 23.1 | 17.6 | 21.4 | 28.1 | 20.8 |
|  | Pvt | 29.3 | 30.4 | 37.6 | 30.8 | 41.5 | 31.5 | 35.6 | 43.9 | 35.0 |
| 2010 | Govt | 8.5 | 9.1 | 11.5 | 9.4 | 10.5 | 10.8 | 9.2 | 11.6 | 10.1 |
|  | Pvt | 25.4 | 26.5 | 29.4 | 32.0 | 31.0 | 32.9 | 29.8 | 24.3 | 28.7 |
| 2011 | Govt | 6.2 | 8.5 | 8.7 | 9.0 | 9.9 | 10.4 | 7.3 | 7.0 | 8.5 |
|  | Pvt | 19.4 | 23.8 | 25.7 | 26.4 | 22.5 | 25.7 | 23.5 | 23.5 | 23.7 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Punjab rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

|  | Purchase of charts, globes \& other teaching material | 66.5 | 26.7 | 6.9 |
| Other | Expenditure on school events | 46.3 | 42.9 | 10.8 |
|  | Payment of bills (electricity, water, cleaning etc.) | 50.4 | 38.5 | 11.1 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to <br> each school | For what purposes |
| :--- | :--- |
| SCHOOL DEVELOPM ENT GRANT / SCHOOL GRANT |  |

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^55]

3
4
5
$5+1$ Headteacher
Pupil-Teacher Ratio (excluding Headteacher) shall not exceed 40

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## Rajasthan rural

ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 31 OUT OF 32 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: $6-14$ ALL | 60.2 | 35.1 | 0.2 | 4.5 | 100 |
| Age: 7-16 ALL | 59.7 | 33.4 | 0.2 | 6.7 | 100 |
| Age: 7-10 ALL | 59.8 | 36.9 | 0.3 | 3.0 | 100 |
| Age: 7-10 BOYS | 56.7 | 41.0 | 0.3 | 2.0 | 100 |
| Age: 7-10 GIRLS | 63.9 | 31.5 | 0.3 | 4.3 | 100 |
| Age: 11-14 ALL | 61.6 | 32.0 | 0.1 | 6.3 | 100 |
| Age: 11-14 BOYS | 59.6 | 36.2 | 0.1 | 4.2 | 100 |
| Age: 11-14 GIRLS | 64.3 | 26.7 | 0.1 | 8.9 | 100 |
| Age: 15-16 ALL | 55.4 | 27.6 | 0.1 | 16.8 | 100 |
| Age: 15-16 BOYS | 56.4 | 30.3 | 0.1 | 13.2 | 100 |
| Age: 15-16 GIRLS | 54.1 | 23.5 | 0.1 | 22.3 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS. 'мот in SCHool' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $19.6 \%$ in 2006 to $14.4 \%$ in 2007 to $14.8 \%$ in 2008 to $12.2 \%$ in 2009 to $12.1 \%$ in 2010 to $8.9 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 38.6 | 34.8 | 15.1 | 6.8 | 4.8 |  |  |  |  |  |  |  | 100 |
| II | 11.3 | 22.7 | 30.7 | 23.2 | 5.3 | 6.9 |  |  |  |  |  |  | 100 |
| III | 2.7 | 7.7 | 18.2 | 36.5 | 16.6 | 11.2 | 7.1 |  |  |  |  |  | 100 |
| IV |  | . 7 | 8.1 | 22.2 | 24.9 | 26.6 | 6.1 | 6.2 | 3.2 |  |  |  | 100 |
| V | 3.0 |  |  | 9.4 | 12.9 | 38.8 | 17.0 | 11.9 | 7.1 |  |  |  | 100 |
| VI | 9.1 |  |  |  |  | 22.0 | 24.7 | 27.2 | 10.0 | 7.0 |  |  | 100 |
| VII | 2.8 |  |  |  |  | 8.7 | 13.5 | 37.2 | 22.4 | 9.4 | 6.2 |  | 100 |
| VIII | 9.4 |  |  |  |  |  |  | 22.2 | 29.4 | 22.4 | 10.9 | 5.7 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $36.5 \%$ children are 8 years old but there are also $18.2 \%$ who are $7,16.6 \%$ who are $9,11.2$ \% who are 10 years old, etc.

## Young children in pre-school and school

| Table 3: \% Children age 5-6 who are enrolled in different |

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 51.3 | 34.8 | 9.1 | 2.2 | 2.7 | 100 |
| II | 19.6 | 41.6 | 24.1 | 8.7 | 6.0 | 100 |
| III | 8.1 | 28.7 | 31.5 | 18.0 | 13.8 | 100 |
| IV | 3.8 | 15.5 | 24.4 | 26.3 | 30.1 | 100 |
| V | 2.4 | 9.7 | 18.2 | 27.0 | 42.7 | 100 |
| VI | 1.0 | 4.1 | 8.8 | 22.3 | 63.9 | 100 |
| VII | 0.5 | 2.9 | 4.7 | 16.0 | 75.9 | 100 |
| VIII | 0.8 | 1.9 | 3.1 | 11.9 | 82.3 | 100 |
| Total | 11.3 | 18.3 | 16.1 | 16.5 | 37.9 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $8.1 \%$ children cannot even read letters, $28.7 \%$ can read letters but not more, $31.5 \%$ can read words but not Std 1 text or higher, 18\% can read Std 1 text but not Std 2 level text, and $13.8 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

## Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 23.1 |
| Home language is different from school language | 76.9 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Rajasthan rural 

## Arithmetic

Table 6: \% Children by class and ARITHM ETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 -9 | $11-99$ |  |  |  |
| I | 50.3 | 37.3 | 9.3 | 1.9 | 1.1 | 100 |
| II | 18.7 | 46.9 | 25.6 | 6.6 | 2.2 | 100 |
| III | 7.7 | 35.8 | 34.9 | 16.1 | 5.5 | 100 |
| IV | 3.0 | 21.3 | 33.3 | 28.3 | 14.2 | 100 |
| V | 2.3 | 13.2 | 27.7 | 33.2 | 23.7 | 100 |
| VII | 1.0 | 6.5 | 18.5 | 31.9 | 42.2 | 100 |
| VII | 0.5 | 4.0 | 12.3 | 31.0 | 52.3 | 100 |
| VIII | 0.8 | 2.7 | 8.7 | 25.2 | 62.7 | 100 |
| Total | 10.8 | 21.9 | 21.8 | 21.4 | 24.1 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 7.7\% children cannot even recognize numbers 1-9, 35.8\% children can recognize numbers up to 9 but not more, $34.9 \%$ can recognize numbers to 99 but cannot do subtraction, $16.1 \%$ can do subtraction but not division, and $5.5 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-wise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 2007 | Govt | 1.5 | 2.1 | 2.5 | 3.0 | 3.6 | 3.9 | 5.8 | 8.9 | 3.8 |
|  | Pvt | 6.8 | 8.8 | 9.2 | 11.2 | 11.1 | 13.6 | 13.1 | 19.6 | 11.2 |
| 2009 | Govt | 3.3 | 3.6 | 4.7 | 4.8 | 5.8 | 7.4 | 7.5 | 12.0 | 6.1 |
|  | Pvt | 12.0 | 11.4 | 13.1 | 11.5 | 16.1 | 14.0 | 13.8 | 26.5 | 14.7 |
| 2010 | Govt | 1.5 | 2.6 | 3.3 | 4.0 | 4.6 | 4.8 | 5.3 | 7.9 | 4.3 |
|  | Pvt | 7.6 | 9.3 | 10.5 | 12.4 | 12.9 | 15.9 | 15.3 | 18.9 | 12.6 |
| 2011 | Govt | 0.9 | 1.4 | 1.1 | 1.5 | 1.7 | 2.4 | 2.9 | 3.1 | 1.9 |
|  | Pvt | 7.1 | 6.9 | 9.1 | 8.6 | 8.9 | 8.7 | 9.8 | 9.7 | 8.5 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Rajasthan rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | ---: | ---: | ---: | ---: |
| Std I-IV/V: Primary | 393 | 276 | 290 | 273 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to <br> each school | For what purposes |
| :--- | :--- |
| SCHOOL DEVELOPM ENT GRANT / SCHOOL GRANT |  |
| Rs.5000 per year per <br> primary school | This grant can be used for <br> buying school equipment <br> such as blackboard, sitting <br> mats etc. Also for buying <br> chalk, duster, registers and <br> other office equipment. |
| Rs.7000 per year per upper <br> primary school | R |
| Rs 5000 + Rs 7000 $=$ <br> Rs 12000 if the school is <br> Std I-VIINIII. | The grant amount varies by <br> type of school: whether it is |
| Note: Primary and Upper <br> Primary schools are treated <br> as separate schools even if <br> they are in the same pre- <br> mises. | primary or upper primary <br> school. |

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

$5+1$ Headteacher Pupil-Teacher Ratio (excluding Headteacher) shall not exceed 40

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## Tamil Nadu rural

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 29 OUT OF 29 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6 -14 ALL | 71.5 | 27.0 | 0.6 | 0.9 | 100 |
| Age: 7-16 ALL | 72.7 | 24.8 | 0.6 | 2.0 | 100 |
| Age: 7-10 ALL | 68.6 | 30.6 | 0.6 | 0.2 | 100 |
| Age: 7-10 BOYS | 66.3 | 32.9 | 0.6 | 0.2 | 100 |
| Age: 7-10 GIRLS | 71.0 | 28.2 | 0.6 | 0.2 | 100 |
| Age: 11-14 ALL | 76.1 | 21.8 | 0.6 | 1.6 | 100 |
| Age: 11-14 BOYS | 73.8 | 23.8 | 0.6 | 1.9 | 100 |
| Age: 11-14 GIRLS | 78.3 | 19.9 | 0.5 | 1.3 | 100 |
| Age: 15-16 ALL | 73.8 | 19.2 | 0.6 | 6.4 | 100 |
| Age: 15-16 BOYS | 73.0 | 19.5 | 0.9 | 6.7 | 100 |
| Age: $15-16$ GIRLS | 74.5 | 18.9 | 0.4 | 6.2 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS
'мот in school' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 3.9\% in 2006 to $2.3 \%$ in 2007 to $1.2 \%$ in 2008 to $1.1 \%$ in 2009 to $1.8 \%$ in 2010 to $1.3 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 44.4 | 49.7 | 5.9 |  |  |  |  |  |  |  |  |  | 100 |
| II | 1.1 | 21.6 | 67.0 | 8.3 | 2.0 |  |  |  |  |  |  |  | 100 |
| III |  | 1.9 | 17.8 | 71.0 | 8.3 | 1.0 |  |  |  |  |  |  | 100 |
| IV | 2.5 |  |  | 18.2 | 67.4 | 10.3 | 1.7 |  |  |  |  |  | 100 |
| V | 2.8 |  |  |  | 8.0 | 78.0 | 9.0 | 2.4 |  |  |  |  | 100 |
| VI | 2.2 |  |  |  |  | 10.4 | 68.8 | 16.7 | 1.9 |  |  |  | 100 |
| VII | 2.2 |  |  |  |  |  | 10.7 | 69.0 | 14.3 | 3.8 |  |  | 100 |
| VIII | 3.1 |  |  |  |  |  |  | 14.2 | 67.9 | 11.7 | 3.1 |  | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $71.0 \%$ children are 8 years old but there are also $17.8 \%$ who are $7,8.3 \%$ who are 9 years old, etc.

## Young children in pre-school and school

| Table 3: \% Children age 5-6 who are enrolled in different |
| :--- |
| types of pre-school \& school 2011 |

Chart 3: Trends over time
Five year olds in pre-school \& school 2007, 2009 \& 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 54.2 | 31.3 | 10.5 | 3.0 | 1.1 | 100 |
| II | 20.3 | 35.6 | 30.4 | 9.4 | 4.3 | 100 |
| III | 9.7 | 21.9 | 40.9 | 20.5 | 7.1 | 100 |
| IV | 5.3 | 11.9 | 32.2 | 31.5 | 19.0 | 100 |
| V | 3.5 | 7.7 | 20.8 | 35.7 | 32.3 | 100 |
| VI | 1.4 | 3.8 | 14.8 | 31.3 | 48.8 | 100 |
| VII | 1.2 | 2.5 | 9.5 | 26.0 | 60.8 | 100 |
| VIII | 0.6 | 1.5 | 8.5 | 22.7 | 66.8 | 100 |
| Total | 11.0 | 13.6 | 20.7 | 23.3 | 31.4 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $9.7 \%$ children cannot even read letters, $21.9 \%$ can read letters but not more, 40.9\% can read words but not Std 1 text or higher, 20.5\% can read Std 1 text but not Std 2 level text, and $7.1 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Reading Tool

saxilipd imporphement-1

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 92.2 |
| Home language is different from school language | 7.8 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 1-9 | $11-99$ |  |  |  |
| I | 45.9 | 33.8 | 17.1 | 2.5 | 0.8 | 100 |
| II | 15.7 | 28.6 | 46.2 | 7.6 | 1.9 | 100 |
| III | 7.8 | 18.5 | 51.7 | 20.2 | 1.8 | 100 |
| IV | 4.9 | 9.6 | 45.0 | 34.2 | 6.4 | 100 |
| V | 3.7 | 5.5 | 31.6 | 44.9 | 14.2 | 100 |
| VI | 1.7 | 3.1 | 24.0 | 46.4 | 24.8 | 100 |
| VII | 1.1 | 1.8 | 16.8 | 45.4 | 34.9 | 100 |
| VIII | 0.5 | 0.9 | 14.6 | 38.8 | 45.1 | 100 |
| Total | 9.3 | 11.8 | 30.5 | 31.3 | 17.0 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, $7.8 \%$ children cannot even recognize numbers 1-9, 18.5\% children can recognize numbers up to 9 but not more, $51.7 \%$ can recognize numbers to 99 but cannot do subtraction, $20.2 \%$ can do subtraction but not division, and $1.8 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 10.8 | 12.9 | 13.8 | 16.0 | 16.7 | 18.3 | 17.5 | 17.1 | 15.7 |
|  | Pvt | 26.5 | 29.5 | 33.5 | 37.5 | 39.9 | 30.9 | 29.5 | 30.8 | 32.1 |
| 2009 | Govt | 16.3 | 20.9 | 19.5 | 22.3 | 24.1 | 22.5 | 19.6 | 20.0 | 20.9 |
|  | Pvt | 28.6 | 31.9 | 37.2 | 41.4 | 36.1 | 29.4 | 33.1 | 35.2 | 33.9 |
| 2010 | Govt | 12.7 | 13.6 | 16.0 | 14.8 | 19.8 | 17.6 | 16.7 | 17.1 | 16.4 |
|  | Pvt | 22.4 | 26.4 | 29.9 | 31.3 | 30.3 | 29.4 | 25.9 | 28.0 | 27.8 |
| 2011 | Govt | 11.6 | 12.8 | 14.6 | 16.3 | 17.5 | 15.2 | 16.4 | 14.5 | 15.1 |
|  | Pvt | 19.4 | 24.6 | 30.7 | 24.4 | 25.3 | 29.5 | 20.5 | 24.7 | 24.9 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Tamil Nadu rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |
| :--- | :---: | ---: | ---: | ---: |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to <br> each school | For what purposes |
| :--- | :--- |
| SCHOOL DEVELOPM ENT GRANT / SCHOOL GRANT |  |
| Rs.5000 per year per <br> primary school | This grant can be used for <br> buying school equipment <br> such as blackboard, sitting <br> mats etc. Also for buying <br> chalk, duster, registers and <br> other office equipment. |
| Rs.7000 per year per upper <br> primary school | R |
| Rs 5000 + Rs 7000 $=$ <br> Rs 12000 if the school is <br> Std I-VIINIII. | The grant amount varies by <br> type of school: whether it is |
| Note: Primary and Upper <br> Primary schools are treated <br> as separate schools even if <br> they are in the same pre- <br> mises. | primary or upper primary <br> school. |

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

| Age: 7-10 BOYS | 92.6 | 6.0 | 1.1 | 0.3 | 100 |
| Age: 7-10 GIRLS | 92.7 | 6.0 | 0.7 | 0.6 | 100 |
| Age: 11-14 ALL | 94.0 | 3.1 | 0.9 | 2.0 | 100 |
| Age: 11-14 BOYS | 93.9 | 3.2 | 0.8 | 2.1 | 100 |
| Age: 11-14 GIRLS | 94.0 | 3.0 | 1.0 | 2.0 | 100 |
| Age: 15-16 ALL | 92.1 | 2.6 | 0.6 | 4.7 | 100 |
| Age: 15-16 BOYS | 91.5 | 3.3 | 0.5 | 4.7 | 100 |
| Age: 15-16 GIRLS | 93.0 | 1.7 | 0.7 | 4.7 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS.
'мот in SCHool' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $7.3 \%$ in 2006 to $5.8 \%$ in 2007 to $3.8 \%$ in 2008 to $3.4 \%$ in 2009 to $3.4 \%$ in 2010 to $2.0 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 8.3 | 34.1 | 43.8 | 7.9 | 5.9 |  |  |  |  |  |  |  | 100 |
| II |  | . 3 | 22.3 | 55.9 | 8.4 | 8.1 |  |  |  |  |  |  | 100 |
| III |  | . 3 | 7.3 | 15.4 | 54.2 | 14.1 | 7.8 |  |  |  |  |  | 100 |
| IV | 3.4 |  |  |  | 12.0 | 58.9 | 14.2 | 8.2 | 3.4 |  |  |  | 100 |
| V | 4.9 |  |  |  |  | 21.0 | 45.8 | 21.5 | 6.8 |  |  |  | 100 |
| VI | 6.4 |  |  |  |  |  | 12.0 | 64.8 | 9.0 | 7.8 |  |  | 100 |
| VII | 4.8 |  |  |  |  |  |  | 17.5 | 47.0 | 21.4 | 9.3 |  | 100 |
| VIII | 6.4 |  |  |  |  |  |  |  | 15.9 | 48.2 | 22.7 | 6.7 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III,
$15.4 \%$ children are 8 years old but there are also $7.3 \%$ who are $7,54.2 \%$ who are 9 ,
$14.1 \%$ who are 10 years old, etc.

## Young children in pre-school and school

Chart 3: Trends over time
Five year olds in pre-school \& school 2007, 2009 \& 2011

## Reading

Table 4：\％Children by class and READING level All schools 2011

| Std． | Nothing | Letter | Word | Level 1 <br> （Std 1 Text） | Level 2 <br> （Std 2 Text） | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 16.0 | 39.3 | 25.5 | 11.3 | 7.9 | 100 |
| II | 7.0 | 27.8 | 36.2 | 18.2 | 10.8 | 100 |
| III | 3.5 | 12.3 | 27.0 | 35.6 | 21.6 | 100 |
| IV | 1.8 | 4.3 | 18.0 | 38.4 | 37.5 | 100 |
| V | 2.4 | 5.3 | 10.9 | 26.2 | 55.3 | 100 |
| VI | 1.9 | 4.2 | 8.2 | 13.1 | 72.7 | 100 |
| VII | 0.6 | 2.2 | 5.9 | 6.6 | 84.8 | 100 |
| VIII | 0.0 | 1.4 | 4.9 | 9.9 | 83.8 | 100 |
| Total | 4.0 | 11.9 | 17.5 | 20.8 | 45.9 | 100 |

How to read this table：Each cell shows the highest level of reading achieved by a child． For example，in Std III，3．5\％children cannot even read letters， $12.3 \%$ can read letters but not more， $27 \%$ can read words but not Std 1 text or higher， $35.6 \%$ can read Std 1 text but not Std 2 level text，and $21.6 \%$ can read Std 2 level text．In sum，for each class，the total of all these exclusive categories is $100 \%$ ．

## Chart 4：Trends over time

\％Children in Std III who CANNOT READ Std I LEVEL TEXT
By school type 2008－2011

## Reading Tool

（बादा मून्वाश्रन－）

Note：This tool was also available in Kok Borok and English．

Chart 5：Trends over time
\％Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008－2011

## Home language and school language

Table 5：School language and home language

| Of children who tested in Bengali |  |
| :--- | :---: |
| \％Children whose home language was： | $\%$ |
| Bengali | 66.1 |
| Other＊ | 33.9 |
| Total | 100.0 |
| ＊＇Other＇includes all languages from the list of scheduled and non－scheduled <br> languages except those specified above． |  |

Note：In ASER 2011 for every state，reading tools were provided in the main medium of instruction in government schools．In Tripura，where the medium of instruction in government schools is Bengali or Kok Borok，children were given the choice of reading in Bengali，Kok Borok or English．Figures for Kok Borok and English have not been included due to insufficient data．For home languages，a list of 122 languages was provided to all survey teams．This included 22 Scheduled languages and 100 Non－ Scheduled languages．The data in this table is for children for whom we have information for both school language and home language．

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | :---: | ---: | :---: | :---: | ---: | ---: |
|  |  | $1-9$ | $11-99$ |  |  |  |
| I | 9.0 | 39.5 | 33.5 | 16.1 | 2.0 | 100 |
| II | 5.7 | 25.7 | 39.0 | 25.7 | 4.0 | 100 |
| III | 3.2 | 10.9 | 31.2 | 40.9 | 13.8 | 100 |
| IV | 0.4 | 6.9 | 19.3 | 47.1 | 26.3 | 100 |
| V | 2.5 | 5.2 | 17.3 | 37.2 | 37.7 | 100 |
| VI | 2.3 | 4.2 | 13.0 | 33.9 | 46.6 | 100 |
| VII | 1.0 | 3.1 | 8.2 | 33.4 | 54.4 | 100 |
| VIII | 0.8 | 0.8 | 7.2 | 24.8 | 66.5 | 100 |
| Total | 3.0 | 11.7 | 21.3 | 33.1 | 30.8 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 3.2\% children cannot even recognize numbers 1-9, 10.9\% children can recognize numbers up to 9 but not more, $31.2 \%$ can recognize numbers to 99 but cannot do subtraction, $40.9 \%$ can do subtraction but not division, and $13.8 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 6: Trends over time

100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION
By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 57.4 | 62.8 | 64.8 | 67.2 | 73.7 | 75.0 | 73.2 | 80.0 | 69.3 |
|  | Pvt | 45.8 | 31.4 | 48.9 | 13.7 | 33.3 | 100.0100 .0 | 0.0 | 45.6 |  |
| 2009 | Govt | 65.3 | 64.2 | 71.2 | 74.1 | 65.0 | 72.7 | 83.2 | 85.6 | 72.5 |
|  | Pvt | 96.0 | 42.6 | 65.3100 .0 | 74.1 | 100.0100 .0100 .0 | 77.5 |  |  |  |
| 2010 | Govt | 56.9 | 67.7 | 70.2 | 69.8 | 73.4 | 77.9 | 80.2 | 84.2 | 72.7 |
|  | Pvt | 75.2100 .0 | 100.0100 .0 | 88.7 | 100.0100 .0100 .0 | 93.6 |  |  |  |  |
| 2011 | Govt | 61.0 | 62.7 | 69.2 | 73.9 | 72.0 | 75.0 | 79.7 | 82.5 | 72.1 |
|  | Pvt | 79.5 | 89.4 | 66.3 | 45.5 | 00.0100 .0 | 73.8 | 58.5 | 78.6 |  |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

# Tripura rural 

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to |
| :---: | :--- |
| each school |$\quad$ For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per $\quad$ This grant can be used for primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$ Rs 12000 if the school is Std I-VIIIVIII.

Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

[^61]
## Right to Education indicators

| Age: 15-16 BOYS | 74.2 | 20.5 | 0.6 | 4.7 | 100 |
| Age: 15-16 GIRLS | 79.8 | 12.9 | 1.2 | 6.2 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS
'мот in school' = dropped out + never enrolled.

Chart 2: Trends over time
\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 3.4\% in 2006 to $4.1 \%$ in 2007 to $2.7 \%$ in 2008 to $3 \%$ in 2009 to 4\% in 2010 to 1.2\% in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 31.2 | 37.8 | 19.5 | 7.6 | 3.9 |  |  |  |  |  |  |  | 100 |
| II | 5.6 | 19.2 | 36.8 | 24.2 | 8.4 | 5.8 |  |  |  |  |  |  | 100 |
| III | 6 | . 7 | 15.3 | 37.2 | 23.0 | 10.6 | 7.1 |  |  |  |  |  | 100 |
| IV | 5.2 |  |  | 18.6 | 33.7 | 26.3 | 8.7 | 7.4 |  |  |  |  | 100 |
| V | 7.3 |  |  |  | 9.5 | 37.4 | 25.7 | 11.9 | 8.2 |  |  |  | 100 |
| VI | 6.8 |  |  |  |  | 13.0 | 34.4 | 30.9 | 8.6 | 6.3 |  |  | 100 |
| VII | 5.3 |  |  |  |  |  | 12.0 | 37.1 | 27.7 | 12.0 | 5.8 |  | 100 |
| VIII | 4.4 |  |  |  |  |  |  | 14.6 | 36.0 | 25.6 | 12.6 | 6.9 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $37.2 \%$ children are 8 years old but there are also $15.3 \%$ who are $7,23.0 \%$ who are $9,10.6 \%$ who are 10 years old, etc.

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 29.7 | 40.8 | 19.0 | 4.9 | 5.6 | 100 |
| II | 12.5 | 34.5 | 28.6 | 10.7 | 13.6 | 100 |
| III | 5.7 | 18.0 | 28.9 | 21.4 | 26.1 | 100 |
| IV | 3.5 | 12.0 | 18.8 | 23.1 | 42.7 | 100 |
| V | 2.4 | 5.9 | 11.5 | 22.2 | 58.0 | 100 |
| VI | 1.0 | 3.4 | 4.6 | 17.7 | 73.3 | 100 |
| VII | 0.2 | 3.2 | 2.9 | 10.6 | 83.1 | 100 |
| VIII | 0.3 | 0.8 | 2.7 | 8.3 | 87.9 | 100 |
| Total | 7.4 | 15.7 | 15.4 | 15.1 | 46.4 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $5.7 \%$ children cannot even read letters, $18 \%$ can read letters but not more, 28.9\% can read words but not Std 1 text or higher, 21.4\% can read Std 1 text but not Std 2 level text, and $26.1 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 4: Trends over time

\% Children in Std III who CANNOT READ Std I LEVEL TEXT
By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 33.5 |
| Home language is different from school language | 66.6 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

## Uttarakhand rupal

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 | $1-9$ |  |  |  |
| I | 31.6 | 40.3 | 22.4 | 4.8 | 1.0 | 100 |
| III | 12.6 | 37.7 | 33.8 | 12.4 | 3.7 | 100 |
| III | 5.3 | 23.7 | 40.0 | 21.6 | 9.4 | 100 |
| IV | 2.6 | 15.7 | 28.6 | 32.5 | 20.6 | 100 |
| V | 2.0 | 8.3 | 20.6 | 35.4 | 33.9 | 100 |
| VII | 1.1 | 5.0 | 16.7 | 32.0 | 45.2 | 100 |
| VII | 0.4 | 3.3 | 14.1 | 21.5 | 60.7 | 100 |
| VIII | 0.4 | 1.7 | 9.7 | 22.5 | 65.7 | 100 |
| Total | 7.5 | 17.8 | 23.9 | 22.7 | 28.1 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 5.3\% children cannot even recognize numbers 1-9, 23.7\% children can recognize numbers up to 9 but not more, $40 \%$ can recognize numbers to 99 but cannot do subtraction, $21.6 \%$ can do subtraction but not division, and $9.4 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 6: Trends over time

## Tuition

Table 7: Class-wise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 2007 | Govt | 3.6 | 4.8 | 3.7 | 4.8 | 4.2 | 5.1 | 3.5 | 8.8 | 4.6 |
|  | Pvt | 13.2 | 17.9 | 21.3 | 18.5 | 19.3 | 20.7 | 26.4 | 24.6 | 18.9 |
| 2009 | Govt | 4.8 | 2.8 | 5.5 | 5.2 | 6.5 | 7.3 | 7.5 | 8.4 | 6.0 |
|  | Pvt | 17.5 | 22.4 | 28.0 | 36.4 | 35.0 | 41.5 | 28.4 | 42.7 | 29.5 |
| 2010 | Govt | 3.9 | 6.1 | 5.7 | 6.9 | 7.5 | 5.3 | 8.2 | 8.8 | 6.6 |
|  | Pvt | 19.1 | 24.8 | 26.0 | 27.7 | 26.1 | 35.0 | 26.5 | 30.9 | 26.2 |
| 2011 | Govt | 4.8 | 4.8 | 5.3 | 5.9 | 6.7 | 7.5 | 6.9 | 10.5 | 6.6 |
|  | Pvt | 25.5 | 22.4 | 31.1 | 36.3 | 37.9 | 31.0 | 44.7 | 38.4 | 32.3 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Uttarakhand rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

|  | Payment of bills (electricity, water, cleaning etc.) | 24.1 | 69.7 | 6.1 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012. ${ }^{1}$

EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to <br> each school | For what purposes |
| :--- | :--- |
| SCHOOL DEVELOPM ENT GRANT / SCHOOL GRANT |  |
| Rs.5000 per year per <br> primary school | This grant can be used for <br> buying school equipment <br> such as blackboard, sitting <br> mats etc. Also for buying <br> chalk, duster, registers and <br> other office equipment. |
| Rs.7000 per year per upper <br> primary school | R |
| Rs 5000 + Rs 7000 $=$ <br> Rs 12000 if the school is <br> Std I-VIINIII. | The grant amount varies by <br> type of school: whether it is |
| Note: Primary and Upper <br> Primary schools are treated <br> as separate schools even if <br> they are in the same pre- <br> mises. | primary or upper primary <br> school. |

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for maintenance of school building, including whitewashing;
beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from 11.1\% in 2006 to $8.4 \%$ in 2007 to 10.2\% in 2008 to $9.5 \%$ in 2009 to $9.7 \%$ in 2010 to $9.7 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 27.0 | 35.0 | 17.7 | 11.1 | 9.2 |  |  |  |  |  |  |  | 100 |
| II | 4.3 | 13.7 | 30.9 | 26.4 | 9.2 | 9.6 | 6.0 |  |  |  |  |  | 100 |
| III | 5. | . 4 | 11.6 | 35.0 | 18.7 | 16.0 | 5.0 | 5.5 | 2.9 |  |  |  | 100 |
| IV | 6.0 |  |  | 15.0 | 26.7 | 27.4 | 9.8 | 9.7 | 5.5 |  |  |  | 100 |
| V | 1.7 |  |  | 6.2 | 9.3 | 35.1 | 19.7 | 16.6 | 5.3 | 6.1 |  |  | 100 |
| VI | 5.6 |  |  |  |  | 15.7 | 27.9 | 30.4 | 10.3 | 6.3 | 3.9 |  | 100 |
| VII | 1.8 |  |  |  |  | 6.5 | 10.3 | 38.5 | 22.2 | 13.4 | 5.4 | 1.8 | 100 |
| VIII | 6.1 |  |  |  |  |  |  | 17.3 | 33.3 | 25.5 | 13.0 | 4.9 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $35 \%$ children are 8 years old but there are also $11.6 \%$ who are $7,18.7 \%$ who are $9,16.0 \%$ who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | In LKG/ UKG | In School |  |  |  | $\begin{aligned} & \overline{\mathrm{O}} \\ & \stackrel{0}{0} \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Govt | Pvt | Other |  |  |

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 47.4 | 37.3 | 9.4 | 3.3 | 2.7 | 100 |
| II | 22.5 | 39.7 | 20.0 | 8.7 | 9.1 | 100 |
| III | 13.7 | 30.6 | 22.4 | 15.1 | 18.3 | 100 |
| IV | 8.3 | 22.7 | 19.9 | 17.9 | 31.2 | 100 |
| V | 6.3 | 16.1 | 15.2 | 19.2 | 43.3 | 100 |
| VI | 2.8 | 11.1 | 10.1 | 17.5 | 58.5 | 100 |
| VII | 2.3 | 8.2 | 7.2 | 15.2 | 67.1 | 100 |
| VIII | 1.8 | 5.6 | 5.0 | 11.3 | 76.4 | 100 |
| Total | 16.5 | 24.1 | 14.1 | 12.7 | 32.6 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $13.7 \%$ children cannot even read letters, $30.6 \%$ can read letters but not more, $22.4 \%$ can read words but not Std 1 text or higher, $15.1 \%$ can read Std 1 text but not Std 2 level text, and $18.3 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

Chart 4: Trends over time
\% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Reading Tool

Chart 5: Trends over time
\% Children in Std V who CANNOT READ Std II LEVEL TEXT By school type 2008-2011

Home language and school language

Table 5: School language and home language

| \% Children whose : | $\%$ |
| :--- | :---: |
| Home language is the same as school language | 93.9 |
| Home language is different from school language | 6.1 |
| Total | 100.0 |

Note : In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. Children and their families were also asked about the language they speak at home. For home languages, a list of 122 languages was provided to all survey teams. This list includes 22 Scheduled languages and 100 Non-Scheduled languages. The data in this table is for children for whom we have information for both school language and home language.

# Uttar Pradesh rural 

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 -9 | $11-99$ |  |  |  |
| I | 45.0 | 40.9 | 11.1 | 2.3 | 0.7 | 100 |
| II | 20.1 | 45.2 | 24.2 | 8.5 | 2.0 | 100 |
| III | 11.5 | 36.8 | 29.8 | 15.5 | 6.4 | 100 |
| IV | 6.5 | 28.5 | 30.1 | 21.8 | 13.2 | 100 |
| V | 4.3 | 21.1 | 27.0 | 26.3 | 21.4 | 100 |
| VI | 2.3 | 14.2 | 24.1 | 29.6 | 29.8 | 100 |
| VII | 1.9 | 10.3 | 21.2 | 29.7 | 36.8 | 100 |
| VIII | 1.4 | 7.1 | 19.0 | 27.5 | 45.0 | 100 |
| Total | 14.8 | 28.4 | 22.8 | 17.9 | 16.1 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, $11.5 \%$ children cannot even recognize numbers 1-9, 36.8\% children can recognize numbers up to 9 but not more, $29.8 \%$ can recognize numbers to 99 but cannot do subtraction, $15.5 \%$ can do subtraction but not division, and $6.4 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto 100. By school type 2008-2011

Math Tool

Chart 7: Trends over time
\% Children in Std V who CANNOT DO DIVISION By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 2007 | Govt | 3.8 | 4.1 | 4.6 | 5.8 | 6.4 | 7.3 | 9.0 | 11.5 | 5.8 |
|  | Pvt | 11.6 | 15.1 | 17.0 | 17.3 | 19.5 | 20.1 | 21.9 | 24.5 | 18.0 |
| 2009 | Govt | 5.2 | 5.9 | 5.9 | 6.4 | 7.3 | 8.4 | 9.4 | 11.8 | 7.0 |
|  | Pvt | 12.8 | 15.4 | 18.6 | 19.6 | 21.0 | 19.2 | 20.7 | 24.8 | 18.5 |
| 2010 | Govt | 3.8 | 4.5 | 5.1 | 5.0 | 7.6 | 7.3 | 8.4 | 9.0 | 5.9 |
|  | Pvt | 10.1 | 12.4 | 14.5 | 16.2 | 16.8 | 16.4 | 17.9 | 18.9 | 15.0 |
| 2011 | Govt | 3.7 | 4.6 | 4.8 | 5.8 | 6.2 | 8.1 | 9.2 | 10.1 | 6.1 |
|  | Pvt | 11.5 | 13.0 | 13.5 | 14.8 | 16.1 | 15.4 | 15.6 | 19.2 | 14.5 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: " Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## Uttar Pradesh rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

Table 16: \% Schools carrying out different activities since April 2010

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March $2012 .{ }^{1}$

|  | Toilet locked | 25.3 | 19.1 |
|  | Toilet not useable | 15.9 | 16.9 |
|  | Toilet useable | 33.9 | 47.4 |
| TLM | Teaching learning material in Std 2 | 73.5 | 79.0 |
|  | Teaching learning material in Std 4 | 69.6 | 74.2 |
| Library | No library | 51.4 | 22.9 |
|  | Library but no books being used by children on day of visit | 25.8 | 39.9 |
|  | Library being used by children on day of visit | 22.9 | 37.2 |
| M DM | Kitchen shed for cooking midday meal | 89.3 | 94.7 |
|  | Midday meal served in school on the day of visit | 71.2 | 95.0 |

As part of ASER 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. During this school visit, RTE indicators were observed and are reported here.

Extracts from the Schedule of The Right of Children to Free and Compulsory Education Act 2009 Norms and standards for a School (Sections 19 and 25)

## Number of teachers in Std 1-5:

- Admitted children <= 60
61-90
91-120
121-200
> 150
$>200$
No. of teachers
2
3
4
5
$5+1$ Headteacher
Pupil-Teacher Ratio (excluding Headteacher) shall not exceed 40

## School facilities:

All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

## West Bengal rubal

## ALL ANALYSIS BASED ON DATA FROM HOUSEHOLDS. 17 OUT OF 17 DISTRICTS

## School enrollment and out of school children

Table 1: \% Children in different types of schools 2011

| Age group | Govt. | Pvt. | Other | Not in <br> School | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Age: 6-14 ALL | 87.8 | 6.3 | 1.6 | 4.3 | 100 |
| Age: 7-16 ALL | 86.8 | 5.0 | 1.6 | 6.6 | 100 |
| Age: 7-10 ALL | 87.3 | 9.0 | 1.5 | 2.2 | 100 |
| Age: 7-10 BOYS | 86.3 | 9.8 | 1.6 | 2.4 | 100 |
| Age: 7-10 GIRLS | 88.3 | 8.3 | 1.4 | 2.0 | 100 |
| Age: 11-14 ALL | 89.6 | 2.4 | 1.7 | 6.3 | 100 |
| Age: 11-14 BOYS | 87.3 | 2.4 | 1.9 | 8.4 | 100 |
| Age: 11-14 GIRLS | 91.9 | 2.4 | 1.5 | 4.3 | 100 |
| Age: 15-16 ALL | 79.4 | 2.0 | 1.6 | 17.0 | 100 |
| Age: 15-16 BOYS | 76.5 | 2.0 | 1.8 | 19.7 | 100 |
| Age: 15-16 GIRLS | 82.6 | 2.0 | 1.3 | 14.2 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS.
'мот IN SCHool' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $12.1 \%$ in 2006 to $8.3 \%$ in 2007 to $7.7 \%$ in 2008 to $8.5 \%$ in 2009 to $5.5 \%$ in 2010 to $4.3 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 30.0 | 37.4 | 19.0 | 7.4 | 6.3 |  |  |  |  |  |  |  | 100 |
| II | 4.2 | 17.2 | 40.5 | 24.2 | 6.1 | 7.9 |  |  |  |  |  |  | 100 |
| III | 3.9 |  | 15.6 | 39.3 | 24.6 | 10.9 | 5.7 |  |  |  |  |  | 100 |
| IV | 3.8 |  |  | 13.6 | 32.6 | 29.7 | 8.3 | 6.8 | 5.2 |  |  |  | 100 |
| V | 14.2 |  |  |  |  | 35.7 | 27.7 | 13.8 | 8.6 |  |  |  | 100 |
| VI | 3.8 |  |  |  |  | 11.4 | 27.7 | 31.9 | 13.9 | 6.8 | 4.5 |  | 100 |
| VII | 2.6 |  |  |  |  |  | 9.8 | 32.0 | 31.3 | 15.1 | 9.2 |  | 100 |
| VIII | 2.6 |  |  |  |  |  |  | 11.8 | 33.4 | 32.5 | 14.6 | 5.1 | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in
Std 3. This table shows the age distribution for each class. For example, in Std III, $39.3 \%$ children are 8 years old but there are also $15.6 \%$ who are $7,24.6 \%$ who are 9 , $10.9 \%$ who are 10 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

|  | In balwadi or anganwadi | $\begin{gathered} \text { In LKG/ } \\ \text { UKG } \end{gathered}$ | In School |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | :---: | :---: | ---: | :---: |
|  |  | 1 -9 | $11-99$ |  |  |  |
| I | 15.9 | 48.2 | 27.7 | 5.7 | 2.6 | 100 |
| II | 7.0 | 35.3 | 35.3 | 16.4 | 6.0 | 100 |
| III | 4.1 | 22.0 | 33.2 | 27.0 | 13.7 | 100 |
| IV | 2.3 | 16.6 | 24.7 | 36.4 | 20.2 | 100 |
| V | 1.5 | 10.2 | 24.8 | 32.1 | 31.4 | 100 |
| VII | 1.7 | 6.3 | 20.9 | 32.1 | 39.0 | 100 |
| VII | 0.5 | 3.9 | 15.7 | 26.0 | 53.8 | 100 |
| VIII | 0.4 | 1.0 | 13.4 | 25.9 | 59.2 | 100 |
| Total | 4.3 | 18.4 | 24.6 | 25.1 | 27.5 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 4.1\% children cannot even recognize numbers 1-9, 22\% children can recognize numbers up to 9 but not more, $33.2 \%$ can recognize numbers to 99 but cannot do subtraction, $27 \%$ can do subtraction but not division, and $13.7 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 30.6 | 45.6 | 63.0 | 74.0 | 83.3 | 84.9 | 83.7 | 88.5 | 66.9 |
|  | Pvt | 40.5 | 54.9 | 59.5 | 67.0 | 62.7 | 68.6 | 75.6 | 89.7 | 55.4 |
| 2009 | Govt | 51.5 | 63.9 | 68.7 | 74.2 | 75.6 | 80.8 | 85.7 | 86.6 | 73.2 |
|  | Pvt | 63.9 | 71.4 | 74.4 | 83.6 | 87.7 | 79.2 | 78.9 | 71.2 | 73.2 |
| 2010 | Govt | 50.6 | 63.9 | 69.8 | 68.6 | 75.6 | 76.1 | 80.1 | 83.1 | 70.8 |
|  | Pvt | 60.7 | 73.1 | 65.0 | 65.1 | 65.4 | 61.3 | 75.4 | 72.9 | 66.1 |
| 2011 | Govt | 56.6 | 65.3 | 67.4 | 72.7 | 76.9 | 77.5 | 82.4 | 81.7 | 72.9 |
|  | Pvt | 54.0 | 69.9 | 69.9 | 79.4 | 45.8 | 52.4 | 60.6 | 65.4 | 63.9 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

## West Bengal rural

As part of ASER 2007, 2009, 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. Information about schools in this report is based on these visits.

## School observations

Table 8: Total schools visited 2007, 2009, 2010 and 2011

| Type of school | 2007 | 2009 | 2010 | 2011 |

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March $2012 .{ }^{1}$

## EVERY RURAL GOVERNMENT PRIMARY SCHOOL IS ENTITLED TO EACH OF THESE SSA GRANTS EVERY YEAR.

| How much goes to |
| :---: | :--- |
| each school |$\quad$ For what purposes

## SCHOOL DEVELOPMENT GRANT / SCHOOL GRANT

Rs. 5000 per year per primary school

Rs. 7000 per year per upper primary school

Rs 5000 + Rs $7000=$
Rs 12000 if the school is Std I-VIIIVIII.
Note: Primary and Upper Primary schools are treated as separate schools even if they are in the same premises.

## SCHOOL MAINTENANCE GRANT

Rs. 5000 - Rs 7500 per school per year if the school has upto 3 classrooms.

Rs 7500 - Rs. 10000 per year if the school has more than 3 classrooms.

Primary and Upper Primary schools are treated as separate schools even if they are in the same building.

This grant can be used for buying school equipment such as blackboard, sitting mats etc. Also for buying chalk, duster, registers and other office equipment.

The grant amount varies by type of school: whether it is a primary or upper primary school.

This grant can be used for maintenance of school building, including whitewashing; beautification; and repair of toilets, hand pump, boundary wall, playground etc.

The grant amount depends on number of classrooms (excluding Headmaster room and office room)

## TLM GRANT

Rs. 500 per teacher per year in primary and upper primary schools.

This grant can be used by teachers to buy teaching aids, such as charts, globes, posters, models etc.

|  | Of schools with separate girls toilets, \% schools where |  |  |
|  | Toilet locked | 14.5 | 19.2 |
|  | Toilet not useable | 17.4 | 13.4 |
|  | Toilet useable | 23.7 | 41.2 |
| TLM | Teaching learning material in Std 2 | 71.7 | 78.0 |
|  | Teaching learning material in Std 4 | 65.3 | 71.6 |
| Library | No library | 50.5 | 39.2 |
|  | Library but no books being used by children on day of visit | 17.8 | 18.8 |
|  | Library being used by children on day of visit | 31.8 | 42.0 |
| M DM | Kitchen shed for cooking midday meal | 86.0 | 87.0 |
|  | Midday meal served in school on the day of visit | 63.0 | 55.6 |

[^66]As part of ASER 2010 and 2011, in each sampled village, one government school with primary sections was visited on the day of the survey. During this school visit, RTE indicators were observed and are reported here.

Extracts from the Schedule of The Right of Children to Free and Compulsory Education Act 2009 Norms and standards for a School (Sections 19 and 25)

## Number of teachers in Std 1-5:

- Admitted children
<= 60
61-90 91-120 121-200 > 150 $>200$

No. of teachers
2
3
4
5
$5+1$ Headteacher Pupil-Teacher Ratio (excluding Headteacher) shall not exceed 40

## School facilities:

## All weather building with:

- At least one classroom for every teacher
- Office cum store cum headteacher's room
- Separate toilets for boys and girls
- Safe and adequate drinking water facility to all children
- A kitchen where mid-day meal is cooked in the school
- Playground
- Arrangements for securing the school building by boundary wall or fencing.

## Teaching learning equipment

shall be provided to each class as required.

## Library

There shall be a library in each school providing newspaper, magazines and books on all subjects, including story-books.

| Age: 15-16 BOYS | 86.4 | 11.9 | 0.0 | 1.7 | 100 |
| Age: 15-16 GIRLS | 84.2 | 11.8 | 1.1 | 2.9 | 100 |

Note: 'отнеR' includes children going to madarssa and EGS. 'мот IN SCHool' = dropped out + never enrolled.

## Chart 2: Trends over time

\% Children enrolled in private school by class 2007, 2009 \& 2011

Chart 1: Trends over time
\% Children out of school by age group and gender 2006-2011

How to read this chart: For example, the proportion of girls (age 11-14) not in school has changed from $1.7 \%$ in 2006 to $1.6 \%$ in 2007 to $0.9 \%$ in 2008 to $1 \%$ in 2009 to $0.4 \%$ in 2010 to $0.0 \%$ in 2011

Table 2: Sample description
\% Children in each class by age 2011

| Std. | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| I | 32.6 | 53.8 | 13.5 | 0.2 |  |  |  |  |  |  |  |  | 100 |
| II | 1.3 | 8.1 | 72.7 | 11.1 | 6.8 |  |  |  |  |  |  |  | 100 |
| III |  | . 2 | 11.9 | 58.9 | 22.7 | 6.3 |  |  |  |  |  |  | 100 |
| IV | 2.7 |  |  | 11.0 | 46.4 | 32.0 | 6.9 | 1.1 |  |  |  |  | 100 |
| V | 4.5 |  |  |  | 5.8 | 51.6 | 28.7 | 7.7 | 1.6 |  |  |  | 100 |
| VI | 1.2 |  |  |  |  | 7.3 | 55.9 | 28.1 | 7.7 |  |  |  | 100 |
| VII | 2.1 |  |  |  |  |  | 8.3 | 52.3 | 26.4 | 7.8 | 3.2 |  | 100 |
| VIII | 4.3 |  |  |  |  |  |  | 13.8 | 53.9 | 22.4 | 5.6 |  | 100 |

How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, $58.9 \%$ children are 8 years old but there are also $11.9 \%$ who are $7,22.7 \%$ who are 9 years old, etc.

## Young children in pre-school and school

Table 3: \% Children age 5-6 who are enrolled in different types of pre-school \& school 2011

## Reading

Table 4: \% Children by class and READING level All schools 2011

| Std. | Nothing | Letter | Word | Level 1 <br> (Std 1 Text) | Level 2 <br> (Std 2 Text) | Total |
| :--- | ---: | ---: | ---: | :---: | :---: | :---: |
| I | 15.6 | 54.6 | 20.6 | 6.1 | 3.1 | 100 |
| II | 6.8 | 36.3 | 41.4 | 8.9 | 6.6 | 100 |
| III | 1.5 | 18.0 | 41.1 | 34.7 | 4.8 | 100 |
| IV | 1.1 | 4.6 | 30.0 | 39.3 | 25.1 | 100 |
| V | 0.2 | 7.1 | 20.7 | 26.9 | 45.1 | 100 |
| VI | 0.3 | 3.8 | 10.6 | 36.2 | 49.0 | 100 |
| VII | 0.3 | 2.6 | 8.7 | 32.6 | 55.8 | 100 |
| VIII | 0.0 | 1.8 | 4.5 | 20.7 | 73.0 | 100 |
| Total | 2.9 | 14.8 | 21.8 | 26.4 | 34.1 | 100 |

How to read this table: Each cell shows the highest level of reading achieved by a child. For example, in Std III, $1.5 \%$ children cannot even read letters, $18 \%$ can read letters but not more, $41.1 \%$ can read words but not Std 1 text or higher, $34.7 \%$ can read Std 1 text but not Std 2 level text, and $4.8 \%$ can read Std 2 level text. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 4: Trends over time <br> \% Children in Std III who CANNOT READ Std I LEVEL TEXT By school type 2008-2011

## Arithmetic

Table 6: \% Children by class and ARITHMETIC level All schools 2011

| Std. | Nothing | Recognize Numbers |  | Subtract | Divide | Total |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  | 1 1-9 | $11-99$ |  |  |  |
| I | 16.9 | 56.9 | 20.5 | 4.1 | 1.7 | 100 |
| II | 10.1 | 30.1 | 41.7 | 15.9 | 2.3 | 100 |
| III | 4.0 | 28.0 | 43.2 | 22.3 | 2.6 | 100 |
| IV | 2.5 | 22.9 | 39.1 | 31.5 | 4.0 | 100 |
| V | 1.2 | 15.2 | 21.6 | 40.9 | 21.1 | 100 |
| VII | 1.6 | 10.5 | 21.2 | 44.9 | 21.8 | 100 |
| VII | 1.9 | 7.5 | 20.1 | 34.8 | 35.8 | 100 |
| VIII | 0.0 | 4.8 | 8.3 | 34.6 | 52.3 | 100 |
| Total | 4.3 | 20.9 | 26.4 | 29.6 | 18.8 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 4.0\% children cannot even recognize numbers 1-9, 28.0\% children can recognize numbers up to 9 but not more, $43.2 \%$ can recognize numbers to 99 but cannot do subtraction, $22.3 \%$ can do subtraction but not division, and $2.6 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

## Chart 6: Trends over time <br> \% Children in Std III who CANNOT RECOGNISE NUMBERS upto <br> 100. By school type 2008-2011

## Tuition

Table 7: Class-w ise \% children attending PAID TUITION CLASSES By school type 2007, 2009, 2010 and 2011

| Year | School | I | II | III | IV | V | VI | VII | VIII | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2007 | Govt | 25.2 | 20.8 | 35.8 | 28.1 | 34.7 | 38.4 | 25.6 | 35.7 | 30.8 |
|  | Pvt | 75.9 | 82.0 | 79.0 | 77.2 | 87.2 | 81.6 | 59.7 | 80.6 | 79.3 |
| 2009 | Govt | 12.9 | 21.2 | 30.7 | 21.4 | 36.8 | 28.7 | 27.6 | 27.2 | 26.6 |
|  | Pvt | 61.0 | 76.9 | 71.5 | 70.6 | 65.3 | 79.7 | 61.4 | 57.7 | 68.7 |
| 2010 | Govt | 35.4 | 32.8 | 26.9 | 41.0 | 41.1 | 37.5 | 29.1 | 41.4 | 35.9 |
|  | Pvt | 71.7 | 62.5 | 80.2 | 81.4 | 86.2 | 85.3 | 84.6 | 86.9 | 79.7 |
| 2011 | Govt | 28.0 | 26.4 | 35.6 | 33.4 | 30.0 | 34.1 | 28.8 | 24.6 | 30.4 |
|  | Pvt | 78.8 | 90.8 | 87.3 | 85.3 | 89.6 | 78.0 | 75.0 | 75.0 | 82.8 |

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

| Total | 4.5 | 8.8 | 32.8 | 31.8 | 22.2 | 100 |

How to read this table: Each cell shows the highest level of arithmetic achieved by a child. For example, in Std III, 3.3\% children cannot even recognize numbers 1-9, 8.5\% children can recognize numbers up to 9 but not more, $52.6 \%$ can recognize numbers to 99 but cannot do subtraction, $31.6 \%$ can do subtraction but not division, and $4.0 \%$ can do division. In sum, for each class, the total of all these exclusive categories is $100 \%$.

# Divisional estimates of learning outcomes and schooling status: Precision of ASER estimates 

Wilima Wadhwa ${ }^{1}$

Every year since 2005, ASER has presented estimates of learning and of schooling status at the state and district level. The survey design of ASER is based on the premise of generating estimates at the district level. Having estimates of learning levels at this level is desirable since education plans are made at the district level. As a result, ASER is one of the largest surveys undertaken by a non-government organization with a sample size of approximately 700,000 children in the age group of 3-16 years.

ASER is a household survey, undertaken in all rural districts of India. Within each district, 30 villages are randomly chosen ${ }^{2}$ and in each village 20 households are randomly selected, for a total of 600 households per district. This translates into around 900-1200 children per district.

The statistical precision of district level estimates is an issue because of the ASER sample design - namely clustering and absence of stratification at the village level. In a design without clustering, children in the relevant age group would be directly sampled. Not only is this expensive (in terms of survey time), but it is also difficult to have a reliable population frame that could be used for sampling. Instead ASER employs a two-stage clustering design. The first stage clustering happens when villages are randomly picked. The second stage clustering is when households within a village are randomly picked and the children belonging to that household are tested.

While this is an inexpensive and practical way of sampling children, it is well known that clustering increases the variability of estimates. One way of increasing precision at the district level would have been to stratify the village sample according to age of children or school type. However, this would require a prior household listing, which is expensive in terms of both time and resources.

The ASER sample is stratified, however, at the district level. Insofar as outcomes within a district are more homogenous than across districts, stratification within the district leads to more precise estimates at the state level.

Ramaswami and Wadhwa (2009)³ studied the precision of ASER state and district level estimates for a selection of states and variables for the year 2008. They find that state level averages are estimated precisely - with a margin of error of $5 \%$ or less. How ever, district-level estimates are less precisely estimated. The precision varies both across states and districts and according to the learning outcome. In both cases, learning outcomes of children in class 3-5 are relatively less precisely estimated.

Two commonly used measures of precision are the margin of error and the $95 \%$ confidence interval.
The margin of error is the \% interval around the point estimate that almost certainly contains the population estimate (i.e., with $95 \%$ probability). For instance, if x is the margin of error then the population proportion lies within $\pm x \%$ of the sample proportion with $95 \%$ probability.

Suppose $\hat{p}$ is the estimated sample proportion and is the associated standard error. From statistical theory, it is known that the interval [ ] contains the population proportion with 95\% probability - 95\% confidence interval. The margin of error expresses the confidence interval in terms of the sample estimate. It is thus defined as

$$
m e=\frac{2 \hat{\sigma}}{\hat{p}}
$$

A margin of error of $10 \%$ is regarded as an acceptable degree of precision in many studies. ${ }^{4}$ Estimates with a margin of error in excess of $20 \%$ are regarded as estimates with low precision.

[^68]Note that the margin of error depends on the standard error and the estimated proportion, and the standard error itself depends on the estimated proportion. For a given sample size, therefore, a lower precision will be associated with a variable which has a lower incidence in the population and/or a higher standard error. Further, in the case of proportions, for a given sample size, the standard error is the largest for a population proportion close to 0.5 . On the other hand, for a given incidence, one way to reduce the standard error and therefore increase precision is to increase the sample size.

In the case of ASER, as shown by Ramaswami and Wadhwa (2009), precision is not an issue at the state level. At the district level, however, since sample sizes in sub-populations of interest are often much smaller than the total sample size, precision can be an issue. Increasing the sample size at the district level, for a national survey, however, is extremely costly. In the past, ASER has clubbed classes while presenting district level estimates, in an attempt to increase the sample size. However, precision gains from this strategy were limited, especially for variables whose estimated proportions were in the vicinity of 0.5 .

One way to provide sub-state estimates with acceptable levels of precision is to club districts within a state. ${ }^{5}$ Many states have administrative divisions, comprised of two or more districts that can be used as units of analysis. These divisions are at a level of aggregation between the state and district level. This year, we provide divisional estimates from 2007 to 2011 for those states that have administrative divisions. ${ }^{6}$ These are Bihar, Chhattisgarh, Haryana, Jammu \& Kashmir, Jharkhand, Karnataka, Kerala, M adhya Pradesh, Maharashtra, Rajasthan, Uttar Pradesh and Uttarakhand.' In addition, in Andhra Pradesh, Gujarat, Himachal Pradesh, Punjab, Odisha and Tamil Nadu, divisions were created using geographical regions commonly used in the states. ${ }^{8}$
Divisional estimates are provided for the following 6 variables:
\% children in the age group 6-14 years who are out of school
\% children in the age group 6-14 years who are in private school
\% children in class 1-2 who can read letters, words or more
\% children in class 1-2 who can recognize numbers (1-9) or more
\% children in class 3-5 who can read level 1 (Std 1) text or more
\% children in class 3-5 who can do subtraction or more.

Figure 1: State Learning Levels, Margin of Error (\%), 2011

In addition to the point estimates for 2007-2011, the 95\% confidence interval [ $\hat{p} \pm 2 \hat{\sigma}$ ] is also presented. The point estimate as well as the confidence interval is presented for each division and also for the state as a whole.

Figure 1 presents the margin of error for the four learning outcomes in selected states in 2011. As is clear from the figure, most of these are below $5 \%$. Also, note that learning outcomes in class 3-5 are less precisely estimated as compared to those in class 1-2. Similar numbers are obtained for previous years.

At the division level too, among the four learning outcomes the variability is highest for learning levels in class $3-5$. As a result, the margin of error is the highest for these variables. In discussing the division level estimates we will concentrate on these variables since they give us the worst case scenario.

[^69]We can look at division level estimates in two ways. First, for a particular year and state, one can examine the precision of estimates across divisions; and second, for a particular state and division, we can look at the margin of error across years. Figures 2.1 and 2.2 present the margins of error for language and math in class 3-5 in 2011 across divisions of selected states. Language learning outcomes at division level in most states are estimated

with margins of under or close to $10 \%$. The exceptions are M adhya Pradesh and Tamil Nadu. Across the board, precision levels are lower for math learning outcomes. Rajasthan and Tamil Nadu have margins of error that are closer to $15 \%$ and those for Madhya Pradesh are close to $20-25 \%$.

Figures 3.1 and 3.2 present the margins of error, for language and math in class 3-5, for one division in the selected states, from 2007 to 2011. Margins of error are fairly robust over time, except in M P when they spike in 2011. Again, across the board precision levels are lower for math learning outcomes.

Why are margins of error consistently higher for math in class 3-5? Similarly, compared to learning outcomes in class 1-2, why are learning outcomes in class 3-5 less precisely estimated? First, for a given sample size, the margin of error is inversely proportional to the incidence of the variable concerned. What this implies is that any variable that has a low incidence in the population will be estimated with a high margin of error. Intuitively this makes sense because if something is not observed very frequently, one would need a much larger sample size to measure it accurately. How ever, this is not that much of a problem if the standard error is small. To see why,
consider the case of out of school children- say the point estimate is 0.04 (i.e., $4 \%$ ) with a standard error of 0.01 (i.e. $1 \%$ point). The margin of error would be $50 \%\left(=((2 * 0.01) / 0.04)^{*} 100\right)$ which is very high. However, note that this translates into confidence bounds of $\pm 2$ percentage points, i.e., with $95 \%$ probability the true proportion of out of school children lie between $2 \%$ and $6 \%$. In other words, given a low incidence, a high margin of error may still translate into tight confidence bands. Another way of looking at this is by focusing on in-school children instead of out of school children. If out of school children are 0.04 then in-school children will be 0.96 or $96 \%$ with the same standard error of 0.01 giving a margin of error of only $2.1 \%$ and confidence bounds of $\pm 2$ percentage points.

Second, the margin of error is directly proportional to the standard error. For a given sample size, a large standard error, implying imprecise estimation, will not surprisingly result in a high margin of error. In the case of proportions, the standard error itself depends on the value of the proportion, and is larger the closer the value is to 0.5 . Intuitively, the reason behind this is that the greatest uncertainty is associated with a proportion of 0.5 , requiring larger sample sizes to measure it accurately.

By and large, class 1-2 learning outcomes (i.e. the \% of children in Class 1-2 who can read letters or more/ recognize numbers 1-9 or more) are higher as compared to class 3-5 outcomes (i.e. \% of children in class 3-5 who can read Std 1 level text or more/do subtraction or more), resulting in lower margins of error. ${ }^{9}$ Similarly, in class 3-5, language outcomes are better than math outcomes and often math outcomes are close to 0.5 resulting in higher margins of error for math. ${ }^{10}$

Overall, the divisional estimates are more precisely estimated as compared to district level estimates. Clubbing districts increases the sample size and lowers the standard errors. It also smoothes the jumpiness in point estimates often observed at the district level. One of the problems associated with large standard errors and therefore with wide confidence intervals is that it is difficult to identify significant changes across districts and time. The use of divisional estimates resolves this problem to a large extent.

[^70]

| State | 74.66 | 72.05 | 66.23 | 69.80 | 70.94 | 64.25 | 63.37 | 63.81 | 63.66 | 64.54 |
|  | $\pm 1.81$ | $\pm 1.71$ | $\pm 2.05$ | $\pm 2.12$ | $\pm 2.00$ | $\pm 2.07$ | $\pm 1.93$ | $\pm 2.10$ | $\pm 2.21$ | $\pm 2.15$ |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the $95 \%$ confidence interval for the estimate. For instance, In Coastal Andhra division of Andhra Pradesh, in 2007, \% of Std I-II children who could read letters or more is $82.36 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 2.84 \%$ points of the estimate, i.e., betw een 85.20 \% and $79.52 \%$.

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the $95 \%$ confidence interval for the estimate. For instance, In Bhagalpur division of Bihar, in 2007, \% of Std I-II children who could read letters or more is $67.73 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 8.74 \%$ points of the estimate, i.e., between $76.47 \%$ and $58.99 \%$.

## Learning levels: Std III-V

| Division/Region | \% Children in Std III-V who CAN READ <br> Level 1 (Std I) text or more |  |  |  | \% Children in Std III-V who CAN DO |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  |  |  |  |  |  |  |  |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the $95 \%$ confidence interval for the estimate. For instance, In Bastar division of Chhattisgarh, in 2007, \% of Std I-II children who could read letters or more is $74.90 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 6.53$ \% points of the estimate, i.e., between 81.43 \% and 68.37\%.

|  | $\pm 5.09$ | $\pm 4.92$ | $\pm 4.69$ | $\pm 4.60$ | $\pm 5.24$ | $\pm 5.87$ | $\pm 4.56$ | $\pm 5.67$ | $\pm 5.36$ | $\pm 5.42$ |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the $95 \%$ confidence interval for the estimate. For instance, In Central division of Gujarat, in 2007, \% of Std I-II children who could read letters or more is 77.51 \%. With $95 \%$ probability, the true population proportion lies within $\pm 4.06 \%$ points of the estimate, i.e., between $81.57 \%$ and $73.45 \%$.

|  | $\pm 2.10$ | $\pm 2.41$ | $\pm 2.87$ | $\pm 2.55$ | $\pm 3.03$ | $\pm 2.79$ | $\pm 2.95$ | $\pm 3.21$ | $\pm 3.06$ | $\pm 3.48$ |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

> How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95\% confidence interval for the estimate. For instance, In Kangra division of Himachal Pradesh, in 2007, \% of Std I-II children who could read letters or more is $90.08 \%$. With 95\% probability, the true population proportion lies within $\pm 3.30 \%$ points of the estimate, i.e., between 93.38 \% and 86.78\%.

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

> How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95\% confidence interval for the estimate. For instance, In Bhopal division of Madhya Pradesh, in 2007, \% of Std I-ll children who could read letters or more is $95.44 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 1.83 \%$ points of the estimate, i.e., between 97.27 \% and 93.61\%.

|  | $\pm 2.31$ | $\pm 3.39$ | $\pm 1.79$ | $\pm 2.50$ | $\pm 2.96$ | $\pm 2.71$ | $\pm 3.53$ | $\pm 1.82$ | $\pm 2.99$ | $\pm 3.05$ |
| Nashik | 91.03 | 87.81 | 92.86 | 95.95 | 94.33 | 92.28 | 86.87 | 91.45 | 95.09 | 94.10 |
|  | $\pm 2.96$ | $\pm 3.53$ | $\pm 2.92$ | $\pm 1.77$ | $\pm 2.11$ | $\pm 3.03$ | $\pm 3.50$ | $\pm 2.80$ | $\pm 2.03$ | $\pm 2.03$ |
| Pune | 95.27 | 96.25 | 93.27 | 94.87 | 92.98 | 95.18 | 95.07 | 94.09 | 94.10 | 93.65 |
|  | $\pm 1.95$ | $\pm 1.51$ | $\pm 2.28$ | $\pm 1.89$ | $\pm 3.22$ | $\pm 1.89$ | $\pm 1.63$ | $\pm 2.00$ | $\pm 2.31$ | $\pm 3.13$ |
| State | 92.14 | 91.09 | 93.03 | 94.75 | 91.18 | 93.02 | 90.09 | 93.29 | 93.88 | 91.58 |
|  | $\pm 1.07$ | $\pm 1.17$ | $\pm 1.14$ | $\pm 0.86$ | $\pm 1.29$ | $\pm 1.04$ | $\pm 1.25$ | $\pm 1.04$ | $\pm 0.98$ | $\pm 1.21$ |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

> How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95\% confidence interval for the estimate. For instance, In Amravati division of Maharashtra, in 2007, \% of Std I-II children who could read letters or more is $89.04 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 3.04 \%$ points of the estimate, i.e., between 92.08 \% and 86.00\%.

|  | $\pm 2.16$ | $\pm 1.89$ | $\pm 2.15$ | $\pm 2.13$ | $\pm 2.36$ | $\pm 2.52$ | $\pm 2.19$ | $\pm 2.43$ | $\pm 2.37$ | $\pm 2.45$ |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95\% confidence interval for the estimate. For instance, In Central division of Odisha, in 2007, \% of Std I-II children who could read letters or more is $86.18 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 2.69 \%$ points of the estimate, i.e.,
between $88.87 \%$ and $83.49 \%$.

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95\% confidence interval for the estimate. For instance, In Doaba division of Punjab, in 2007, \% of Std I-II children who could read letters or more is $91.86 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 3.19 \%$ points of the estimate, i.e., between $95.05 \%$ and $88.67 \%$.

|  | $\pm 1.94$ | $\pm 2.03$ | $\pm 2.19$ | $\pm 1.94$ | $\pm 2.21$ | $\pm 1.96$ | $\pm 1.94$ | $\pm 2.18$ | $\pm 1.95$ | $\pm 2.22$ |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95\% confidence interval for the estimate. For instance, In Ajmer division of Rajasthan, in 2007, \% of Std I-II children who could read letters or more is $71.5 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 5.19$ \% points of the estimate, i.e.,
between $76.69 \%$ and $66.31 \%$.

| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  |  |  |  |  |  |  |  |  |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95\% confidence interval for the estimate. For instance, In Central division of Tamil Nadu, in 2007, \% of Std III children who could read letters or more is $49.57 \%$. With $95 \%$ probability, the true population proportion lies within $\pm 6.23 \%$ points of the estimate, i.e., between $55.80 \%$ and $43.34 \%$.

Learning levels: Std III-V

| Division/Region | \% Children in Std III-V who CAN READ <br> Level 1 (Std I) text or more |  |  |  |  | \% Children in Std III-V who CAN DO |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

| How to read these tables: The |
| :--- |
| first row for each division gives |
| the estimate of the relevant |
| variable/year. The numbers |
| below the estimate, in the |
| second row, are twice the |
| standard error of the |
| corresponding estimate and |
| represent the 95\% confidence |
| interval for the estimate. For |
| instance, In Garhwal division of |
| Uttarakhand, in 2007, \% of Std |
| I-II children who could read |
| letters or more is 78.35 \%. With |
| 95\% probability, the true |
| population proportion lies within |
| $\pm 3.74 \%$ points of the estimate, |
| i.e., betw een 82.09 \% and |
| $74.61 \%$. |

|  | $\pm 2.96$ | $\pm 2.38$ | $\pm 3.06$ | $\pm 3.40$ | $\pm 2.92$ | $\pm 2.86$ | $\pm 2.79$ | $\pm 3.09$ | $\pm 3.85$ | $\pm 3.12$ |

Note: Districts have been clubbed into divisions to produce these estimates. The grouping of districts is based on administrative divisions used in the state or by geographical regions.

How to read these tables: The first row for each division gives the estimate of the relevant variable/year. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the $95 \%$ confidence interval for the estimate. For instance, In Burdwan division of West Bengal, in 2007, \% of Std I-II children who could read letters or more is $92.74 \%$. With 95\% probability, the true population proportion lies within $\pm 2.31 \%$ points of the estimate, i.e., between 95.05 \% and 90.43\% .

## Sample design of rural ASER 2011

The purpose of rural ASER 2011 is twofold: (i) to get reliable estimates of the status of children's schooling and basic learning (reading, writing and math ability) at the district level; and (ii) to measure the change in these basic learning and school statistics from last year. Every year a core set of questions regarding schooling status and basic learning levels remains the same. However a set of new questions are added for exploring different dimensions of schooling and learning in the elementary stage. The latter set of questions is different each year.
ASER 2006 and 2007 tested reading comprehension for different kinds of readers. ASER 2007 introduced testing in English and asked questions on paid tuition, which were repeated in 2009. ASER 2008 for the first time had questions on telling time and oral math problems using currency. In addition, ASER 2008 incorporated questions on village infrastructure and household assets. Investigators were asked to record whether the village visited had a pukka road leading to it, whether it had a bank, ration shop, etc. In the sampled households information on assets like type of house, phone, television, etc was recorded. These questions were repeated in 2009 and in addition father's education was also recorded. ASER 2010, while retaining the core questions and questions on parents' education, household and village characteristics introduced for the first time higher level testing tools. Questions on critical thinking were introduced - these were based on simple mathematical operations that appear in Standard 5 textbooks.
ASER 2011 brings together elements from various previous ASERs. The core questions on school status and basic reading and arithmetic remain. In addition, parents' education, household and village characteristics continue to be surveyed.
Every alternate year, ASER surveyors visit a government primary or upper primary school in each sampled village. The school information is recorded either based on observations (such as attendance or usability of the facilities) or with information provided by the school (such as grants information). School observations have been reported in 2005, 2007, 2009 and 2010 and are also reported in ASER 2011. Beginning in 2010, school information is also collected on RTE indicators.
Finally, ASER 2011 continues the process of strengthening and streamlining started in 2008. Re-check of 4 or more villages in each district was introduced in 2008. This process was further strengthened in 2009. In ASER 2010, special attention was focused on improving training. In ASER 2011, in addition to the above, master trainers monitored the survey process in the field.
Since one of the goals of ASER is to generate estimates of change in learning, a panel survey design would provide more efficient estimates of the change. However, given the large sample size of the ASER surveys and cost considerations, we adopted a rotating panel of villages rather than children. In ASER 2010, we retained the 10 villages from 2008 and 2009 and added 10 new villages. In ASER 2011 we dropped the 10 villages from ASER 2008, kept the 10 villages from 2009 and 2010 and added 10 more villages from the census village directory.
The sampling strategy used generates a representative picture of each district. All rural districts are surveyed. The estimates obtained are then aggregated to the state and all-India levels.
Since estimates were to be generated at the district level, the minimum sample size calculations had to start at the district level. The sample size is determined by the following considerations:

- Incidence of what is being measured in the population. Since a survey of learning has never been done in India, the incidence of what we are trying to measure is unknown in the population. ${ }^{1}$
- Confidence level of estimates. The standard used is $95 \%$.
- Precision required on either side of the true value. The standard degree of accuracy most surveys employ is between 5 and 10 per cent. An absolute precision of 5\% along with a $95 \%$ confidence level implies that the estimates generated by the survey will be within 5 percentage points of the true values with a $95 \%$ probability. The precision can also be specified in relative terms - a relative precision of $5 \%$ means that the estimates will be within $5 \%$ of the true value. Relative precision requires higher sample sizes.
Sample size calculations can be done in various ways, depending on what assumptions are made about the underlying population. With a $50 \%$ incidence, $95 \%$ confidence level and $5 \%$ absolute precision, the minimum sample size required in each strata ${ }^{2}$ is $384 .^{3}$ This derivation assumes that the population proportion is normally distributed. On the other hand, a sample size of 384 would imply a relative precision of $10 \%$. If we were to require a $5 \%$ relative precision, the sample size would increase to $1600 .{ }^{4}$ Note that all the sample size calculations require estimating the incidence in the population. In our case, we can get an estimate

[^71]of the incidence from previous ASER surveys. However, incidence varies across different indicators - so incidence of reading ability is different from incidence of dropouts. In addition, we often want to measure things that are not binary for which we need more observations.
Given these considerations, the sample size was decided to be 600 households in each district. ${ }^{5}$ Note that at the state level and at the all-India level the survey has many more observations lending estimates at those levels much higher levels of precision.
ASER has a two-stage sample design. In the first stage, 30 villages are randomly selected using the village directory of the 2001 census as the sample frame. ${ }^{6}$ In the second stage 20 households were randomly selected in each of the 30 selected villages in the first stage.
Villages are selected using the probability proportional to size (PPS) sampling method. This method allows villages with larger populations to have a higher chance of being selected in the sample. It is most useful when the sampling units vary considerably in size because it assures that those in larger sites have the same probability of getting into the sample as those in smaller sites, and vice verse. ${ }^{7,8}$
In the selected villages, 20 households are surveyed. Ideally, a complete houselist of the selected village should have been made and 20 households selected randomly from it. How ever, given time and resource constraints a procedure for selecting households was adopted that preserved randomness as much as possible. The field investigators were asked to divide the village into four parts. This was done because villages often consist of hamlets and a procedure that randomly selects households from some central location may miss out households on the periphery of the village. In each of the four parts, investigators were asked to start at a central location and pick every 5th household in a circular fashion till 5 households were selected. In each selected household, all children in the age group of 5-16 were tested. ${ }^{9}$
The survey provides estimates at the district, state and national levels. In order to aggregate estimates up from the district level households had to assigned weights - also called inflation factors. The inflation factor corresponding to particular household denotes the number of households that the sampled household represents in the population. Given that 600 households are sampled in each district regardless of the size of the district, a household in a larger district will represent many more households and, therefore, have a larger weight associated with it than one in a sparsely populated district.
The advantage of using PPS sampling is that the sample is self weighting at the district level. In other words, in each district the weight assigned to each of the sampled household turns out to be the same. This is because the inflation factor associated with a household is simply the inverse of the probability of it being selected into the sample times the number of households in the sample. Since PPS sampling ensures that all households have an equal chance of being selected at the district level, the weights associated with households in the same district are the same. Therefore, weighted estimates are exactly the same as the unweighted estimates at the district level. However, to get estimates at the state and national levels, weighted estimates are needed since states have a different number of districts and districts vary by population.
Even though the purpose of the survey is to estimate learning levels among children, the household was chosen as the second stage sampling unit. This has a number of advantages. First, children are tested at home rather than in school, allowing all children to be tested rather than just those in school. Further, testing children in school might create bias a since teachers may encourage testing the brighter children in class. Second, a household sample will generate an age distribution of children which can be cross-checked with other data sources, like the census and the NSS. Third, a household sample makes calculation of the inflation factors easier since the population of children is no longer needed.
Often household surveys are stratified on various parameters of interest. The reason for stratification is to get enough observations on entities that have the characteristic that is being studied. The ASER survey stratifies the sample by population in the first stage. No stratification was done at the second stage. Finally, if we were to stratify on households with children in the 3-16 age group, we would need the population of such households in the village, which is not possible without a complete houselist of the village.

[^13]:    ${ }^{1}$ ASER state team members are called ASER Associates or ASER Regional Team members. They are "fellows" with ASER Centre for a period of $2-3$ years In addition to leading all ASER related activities in their state, they also participate in a course run by ASER Centre on assessment, survey, evaluation, research and communication. This course has recently received certification from Indira Gandhi National Open University.

[^14]:    ${ }^{1}$ At ASER Centre, we lay great emphasis on piloting all formats before they are finalized. The extremely detailed recheck format which was used this year was extensively piloted by all ASER team members who have many years of experience in the field. M ore importantly, the monitoring and recheck process was explained to and practiced by all master trainers in state trainings. Close to $25 \%$ of the time at these trainings was devoted to understanding and practising these processes.

[^15]:    ASER 2011
    Age group 3-16
    Children were asked

    - Enrollment status
    - Type of school
    - Tuition status

    Children 5-16 also did:

    - Reading tasks
    - Arithmetic tasks

    Mother's education
    Father's education

    Household characteristics
    Village information
    School visits

    ## Sampling:

    Randomly selected
    10 ASER 2009 villages
    10 ASER 2010 villages
    10 new ASER 2011 villages

[^16]:    If the child can read letters, then ask her to try reading the words again and then follow the instructions for word level testing.
    If she can read $\mathbf{4}$ out of $\mathbf{5}$ letters but cannot comfortably read words, then mark the child at 'Letter Level'. If the child is not at letter level (cannot recognize 4 out of 5 letters chosen), then mark the child at 'Nothing Level'.

[^69]:    ${ }^{5}$ For instance, NSS surveys are not representative at the district level. However, they are representative for NSS regions, which are formed using agroclimatic criteria.
    ${ }^{6}$ We decided to go with the state administrative divisions, rather than the NSS regions, since these are more commonly used within the state.
    ${ }^{7}$ The composition of each division was obtained from the state websites, and is reported alongside the divisional estimates presented in this report.
    ${ }^{8}$ See the section on Divisional Estimates in this report for the exact composition.

[^70]:    ${ }^{9}$ Often sample sizes are also larger for class 1-2, which would result in lower margins of error.
    ${ }^{10}$ This also explains the large margins of error for M adhya Pradesh in both language and math learning outcomes in 2011. Both these learning levels fell in 2011 and the point estimates are close to 0.5 .

[^71]:    ${ }^{1}$ For the rural sector we can use the estimates from ASER 2010 to get an idea of the incidence in the population.
    2 Stratification is discussed below.
    ${ }^{3}$ The sample size with absolute precision is given by $\frac{z^{2} p q}{d^{2}}$ where $z$ is the standard normal deviate corresponding to $95 \%$ probability ( $=1.96$ ),
    $p$ is the incidence in the population (0.5), $q=(1-p)$ and $d$ is the degree of precision required (0.05).
     $(0.5), q=(1-p)$ and $r$ is the degree of relative precision required (0.1).

[^72]:    ${ }^{5}$ Sample size calculations assume simple random sampling. However, simple random sampling is unlikely to be the method of choice in an actual field survey. Therefore, often a "design effect" is added to the sample size. A design effect of 2 would double the sample size. At the district level a $7 \%$ precision along with a $95 \%$ confidence level would imply a sample size of 196, giving us a design effect of approximately three. However, note that a sample size of 600 households gives us approximately $1000-1200$ children per district.
    ${ }^{6}$ Of these 30 villages, 10 are from ASER 2009, 10 from ASER 2010 and 10 are newly selected in 2011. They were selected randomly from the same sample frame. The 10 new villages are picked as an independent sample.
    ${ }^{7}$ Probability proportional to size (PPS) is a sampling technique in which the probability of selecting a sampling unit (village, in our case) is proportional to the size of its population. The method works as follows: First, the cumulative population by village calculated. Second, the total household population of the district is divided by the number of sampling units (villages) to get the sampling interval (SI). Third, a random number between 1 and the SI is chosen. This is referred to as the random start (RS). The RS denotes the site of the first village to be selected from the cumulated population. Fourth, the following series of numbers is formed: RS; RS+SI; RS+2SI; RS+3SI; ... The villages selected are those for which the cumulative population contains the numbers in the series.
    ${ }^{8}$ M ost large household surveys in India, like the National Sample Survey and the National Family Health Survey also use this two stage design and use PPS to select villages in the first stage.
    ${ }^{9}$ In larger villages, the investigators increased the interval according to a rough estimate of the number of households in each part. For instance, if a village had 2000 households, each part in the village would have roughly 500 households. Selecting every 5 th household would leave out a large chunk of the village un-surveyed. In such situations, investigators were asked to increase the interval between selected households.
