VIII		4.5 32.6 44.2 16.6 2.1							100				

How to read this table: If a child started school in Std I at age 6, she should be of age 8 in Std III. This table shows the age distribution for each class. For example, in Std III, 53% children are 8 years old but there are also 28.8% who are 7, 14.8% who are 9 and 2.4% who are older.

Chart 3: Trends over time % Children age 3, 4 and 5 not enrolled in school or pre-school 2006-2014*

* Data for 2011 is not comparable to other years and therefore not included here.

Data has not been presented where sample size was insufficient.

Reading

	Table 4: % Children by class and READING levelAll schools 2014													
Std	Not even letter	Letter	Word	Level 1 (Std I Text)	Level 2 (Std II Text)	Total								
I	20.8	45.3	18.5	8.8	6.7	100								
	7.4	23.3	23.2	21.8	24.3	100								
Ш	3.2	11.4	15.1	23.8	46.5	100								
IV	1.9	7.4	11.1	18.9	60.7	100

2014	73.5	89.3	79.6	71.5	82.5	75.3	

* This is the weighted average for children in government and private schools only.

To interpret the chart at left (Chart 4), several things need to be kept in mind:

First, in ASER, all children are assessed using the same tool. The highest level on this tool is the ability to read a Std II level text. ASER is a "floor" level test. It does not assess children using grade level tools. At the highest level, what ASER can tell us is whether a child can read at least Std II level texts or not.

Based on this tool, we can see that proportion of children who can read Std II level text increases as they go to higher classes. By Std VIII children have completed eight years of schooling and by this stage a very high proportion of children are able to read text at least at Std II level. This is true for every year for which data is shown. It is possible that some children are reading at higher levels too but ASER reading tests do not assess higher than Std II level.

However, what is also worth noting is how children at a given grade are doing in successive years. For example, this chart allows us to compare the proportion of children able to read Std II level texts in Std V for cohorts that were in Std V in 2010, 2012 and 2014.

Data has not been presented where sample size was insufficient.

Arithmetic

	Table 7: % Children by class and ARITHMETIC level All schools 2014												
Std	Not even 1-9	Recognize	numbers	Can subtract	Can divide	Total							
I	15.3	35.9	44.0	4.1	0.7	100							
	3.5	22.9	43.5	27.3	2.8	100							
Ш	1.7	11.4	34.7	35.7	16.6	100							
IV	1.0	7.3	30.8	27.7	33.3	100							
V	0.7	4.1	19.0	29.3	46.8	100							
VI	0.0	3.1	19.5	26.1	51.4	100							
VII	0.8	2.5	17.6	23.6	55.5	100							
VIII	0.0	1.7	15.0	21.5	61.8	100							
Total	2.8	10.8	27.7	24.5	34.3	100							

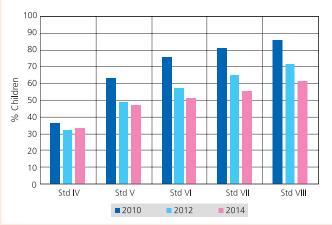

How to read this table: Each cell shows the highest level in arithmetic achieved by a child. For example, in Std III, 1.7% children cannot even recognize numbers 1-9, 11.4% can recognize numbers up to 9 but not more, 34.7% can recognize numbers up to 99 but cannot do subtraction, 35.7% can do subtraction but cannot do division, and 16.6% can do division. For each class, the total of all these exclusive categories is 100%.

Table 8: Trends over time

2014	52.8	74.0	61.0	37.9	63.9	46.9		

* This is the weighted average for children in government and private schools only.

To interpret the chart at left (Chart 5), several things need to be kept in mind:

First, in ASER, all children are assessed using the same tool. The highest level on this tool is the ability to do a numerical division problem (dividing a three digit number by a one digit number). In most states in India, children are expected to do such computations by Std III or Std IV. ASER is a "floor" level test. It does not assess children using grade level tools. At the highest level, what ASER can tell us is whether a child can do at least this kind of division problem.

Based on this tool, we can see that proportion of children who can do this level of division increases as they go to higher classes. By Std VIII children have completed eight years of schooling and by this stage a substantial proportion of children are able to do division problems at this level. This is true for every year for which data is shown. It is possible that some children are able to do operations at higher levels too but ASER arithmetic tests do not assess higher than this level.

However, what is also worth noting is how children at a given grade are doing in successive years. For example, this chart allows us to compare the proportion of children able to do division at this level in Std V for cohorts that were in Std V in 2010, 2012 and 2014.

Data has not been presented where sample size was insufficient.

Reading and comprehension in English

	Table 10: % Children by class and READING level in ENGLISH All schools 2014										
Std	Not even capital letters	Capital letters	Small letters	Simple words	Easy sentences	Total					
T	21.7	24.9	31.4	16.3	5.7	100

Type of school and paid additional tuition classes (tutoring)

The ASER survey recorded information about paid additional private tutoring by asking the following question: "Does the child take any paid tuition class currently?" Therefore the numbers given below do not include any unpaid supplemental help in learning that the child may have received.

Table 12: Trends over time% Children in Std I-V and Std VI-VIII by school type andTUITION 2011-2014

% Schools that could give information about how many members were present in the last meeting	97.4			

10

Average number of members present in last meeting

Every year schools in India receive three financial grants. This is the only money over which schools have any expenditure discretion. Since 2009, ASER has been tracking whether this money reaches schools.

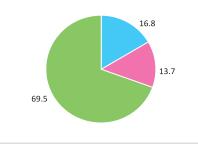

Name of Grant	Type of activity		
School Maintenance Grant	For minor repairs and infrastructure maintenance. Eg. Repair of toilet, boundary wall, whitewashing		
School Development Grant	For purchasing school and office equipment. Eg. Blackboards, sitting mats, chalks, duster		
Teacher Learning Material Grant*	For purchasing teaching aids		

* In 2013-14 and 2014-15 Government of India stopped sending money for this grant in most states.

Table 21: Continuous and Comprehensive Evaluation (CCE) in schools 2013-2014

CCE in schools	2013	2014			
% Schools which said they have heard of CCE	99.6	98.9			
Of the schools which have heard of CCE, % schools which have received materials/manuals					
For all teachers	86.0	80.7			
For some teachers	3.7	5.2			
For no teachers	7.7	10.0			
Don't know	2.6	4.1			
Of the schools which have received manual, % schools which could show it	95.8	94.7			

Chart 6: School Development Plan (SDP) in schools 2014

% Schools which reported not having an SDP for 2013-14 ■ % Schools which reported having an SDP for 2013-14 but could not show it

• % Schools which reported having an SDP for 2013-14 and could show it
