Note: For 3 and 4 year old children, only pre-school status is recorded. ASER 2014

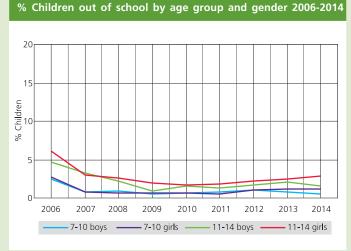

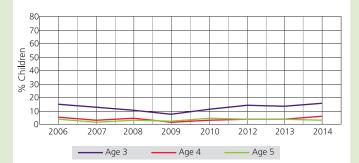

Chart 1: Trends over time

Each line shows trends in the proportion of children out of school for a particular subset of children. For example, the proportion of girls (age 11-14) not in school was 6.1% in 2006, 2% in 2009, 1.8% in 2011 and 2.9% in 2014.

Table 2: Sample description% Children in each class by age 2014													
Std	5	6	7	8	9	10	11	12	13	14	15	16	Total
1	9.6	57.5	28.5		4.4							100	
II	0.8	5.4	38.1	50.5	0.5 5.2					100			
III	1	1.2	5.1	34.0	52.9				6.7				100
IV		1.2		5.4	31.3	55.8			6	5.4			100
V		E S	5.0			33.3	53.3	6.9		1.5			100
VI			4.7				29.5	56.9	6.4		2.5		100
VII			5	5.8	8 32.9 49.6 10.0 1.7						100		
VIII				1.3				5.8	29.3	58.0	5	.6	100

How to read this table: If a child started school in Std I at age 6, she should be of age 8 in Std III. This table shows the age distribution for each class. For example, in Std III, 34% children are 8 years old but there are also 5.1% who are 7, 52.9% who are 9 and 6.7% who are older.

Chart 3: Trends over time % Children age 3, 4 and 5 not enrolled in school or pre-school 2006-2014*

* Data for 2011 is not comparable to other years and therefore not included here

Data has not been presented where sample size was insufficient.

Reading

Table 4: % Children by class and READING levelAll schools 2014										
Std	Not even letter	Letter	Word	Level 1 (Std I Text)	Level 2 (Std II Text)	Total				
1	45.2	34.0	13.6	4.3	2.9	100				
	16.8	24.7	22.1	18.4	17.9	100				
III	10.7	17.2	18.0	20.3	33.8	100				
IV	6.2	11.5	13.5	20.7	48.2	100				
V	5.5	9.0	11.4	20.6	53.5	100				
VI	4.1	6.4	8.7	16.1	64.8	100				
VII	3.3	4.0	7.4	15.1	70.2	100				
VIII	1.9	2.8	6.1	12.6	76.5	100				
Total	11.8	13.8	12.6	16.0	45.8	100				

How to read this table: Each cell shows the highest level in reading achieved by a child. For example, in Std III, 10.7% children cannot even read letters, 17.2% can read letters but not more, 18% can read words but not Std I level text or higher, 20.3% can read Std I level text but not Std II level text, and 33.8% can read Std II level text. For each class, the total of all these exclusive categories is 100%.

Table 5: Trends over time % Children in Std II and III at different READING levels by school type 2010-2014

Table 6: Trends over time % Children in Std IV and V at different READING levels by school type 2010-2014

Year		n in Std IV east Std I		% Children in Std V who can read Std II level text				
Tear	Govt.	Pvt.	Govt. & Pvt.*	Govt.	Pvt.	Govt. & Pvt.*		
2010	89.4	88.4	89.3	71.0	77.6	73.2		
2011	81.0	81.5	81.0	62.1	66.0	63.5		
2012	72.5	75.5	72.9	55.3	62.2	58.3		
2013	70.5	74.7	71.1	58.2	61.3	59.5		
2014	68.6	70.1	68.8	51.7	56.2	53.5		

* This is the weighted average for children in government and private schools only.

To interpret the chart at left (Chart 4), several things need to be kept in mind:

First, in ASER, all children are assessed using the same tool. The highest level on this tool is the ability to read a Std II level text. ASER is a "floor" level test. It does not assess children using grade level tools. At the highest level, what ASER can tell us is whether a child can read at least Std II level texts or not.

Based on this tool, we can see that proportion of children who can read Std II level text increases as they go to higher classes. By Std VIII children have completed eight years of schooling and by this stage a very high proportion of children are able to read text at least at Std II level. This is true for every year for which data is shown. It is possible that some children are reading at higher levels too but ASER reading tests do not assess higher than Std II level.

However, what is also worth noting is how children at a given grade are doing in successive years. For example, this chart allows us to compare the proportion of children able to read Std II level texts in Std V for cohorts that were in Std V in 2010, 2012 and 2014.

Data has not been presented where sample size was insufficient.

Arithmetic

Table 7: % Children by class and ARITHMETIC levelAll schools 2014									
Std	Not even 1-9	Recognize	numbers	Can subtract	Can divide	Total			
1	36.1	47.4	15.0	0.7	0.8	100			
	13.5	41.8	38.8	5.3	0.6	100			
	7.4	28.4	45.5	16.3	2.4	100			
IV	3.6	21.5	37.1	26.3	11.5	100			
V	4.5	16.2	38.2	22.2	18.9	100			
VI	2.6	12.3	38.0	24.4	22.7	100			
VII	2.3	9.0	38.7	21.7	28.4	100			
VIII	1.4	4.9	38.7	22.1	32.9	100			
Total	9.0	22.8	36.1	17.4	14.7	100			

How to read this table: Each cell shows the highest level in arithmetic achieved by a child. For example, in Std III, 7.4% children cannot even recognize numbers 1-9, 28.4% can recognize numbers up to 9 but not more, 45.5% can recognize numbers up to 99 but cannot do subtraction, 16.3% can do subtraction but cannot do division, and 2.4% can do division. For each class, the total of all these exclusive categories is 100%.

Table 8: Trends over time

2010	71.8	70.8	71.8	39.9	44.6	41.4
2011	58.5	59.6	58.6	31.4	35.2	32.8
2012	39.9	46.9	40.6	20.2	25.8	22.6
2013	31.9	42.2	33.3	16.3	20.4	18.1
2014	37.3	40.6	37.8	16.6	22.2	18.9

* This is the weighted average for children in government and private schools only.

To interpret the chart at left (Chart 5), several things need to be kept in mind:

First, in ASER, all children are assessed using the same tool. The highest level on this tool is the ability to do a numerical division problem (dividing a three digit number by a one digit number). In most states in India, children are expected to do such computations by Std III or Std IV. ASER is a "floor" level test. It does not assess children using grade level tools. At the highest level, what ASER can tell us is whether a child can do at least this kind of division problem.

Based on this tool, we can see that proportion of children who can do this level of division increases as they go to higher classes. By Std VIII children have completed eight years of schooling and by this stage a substantial proportion of children are able to do division problems at this level. This is true for every year for which data is shown. It is possible that some children are able to do operations at higher levels too but ASER arithmetic tests do not assess higher than this level.

However, what is also worth noting is how children at a given grade are doing in successive years. For example, this chart allows us to compare the proportion of children able to do division at this level in Std V for cohorts that were in Std V in 2010, 2012 and 2014.

Data has not been presented where sample size was insufficient.

Reading and comprehension in English

	Table 10: % Children by class and READING level in ENGLISHAll schools 2014								
Std	Not even capital letters	Capital letters	Small letters	Simple words	Easy sentences	Total			
1	61.6	16.1	11.8	7.9	2.6	100

Type of school and paid additional tuition classes (tutoring)

The ASER survey recorded information about paid additional private tutoring by asking the following question: "Does the child take any paid tuition class currently?" Therefore the numbers given below do not include any unpaid supplemental help in learning that the child may have received.

Table 12: Trends over time % Children in Std I-V and Std VI-VIII by school type and TUITION 2011-2014

Construction	New classroom built	14.6	84.8	0.6
	White wash/plastering		42.7	1.0
Repair	Repair of drinking water facility	48.9	50.2	1.0
	Repair of toilet	42.1	56.6	1.3
Purchase	Mats, Tat patti etc.	36.2	62.2	1.6
i di citase	Charts, globes or other teaching material	61.5	37.4	1.2

Table 22: School Management Committee (SMC) in schools 2014

% Schools which said they have an SMC	98.7
Of the schools that have SMC, % schools that had the last SMC m	eeting
Before Jan 2014	1.2
Jan to June 2014	3.9
July to Sept 2014	85.9
After Sept 2014	9.1
% Schools that could give information about how many members were present in the last meeting	95.2
Average number of members present in last meeting	11

Every year schools in India receive three financial grants. This is the only money over which schools have any expenditure discretion. Since 2009, ASER has been tracking whether this money reaches schools.

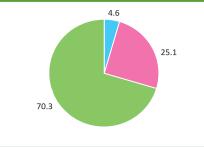

Name of Grant	Type of activity
School Maintenance Grant	For minor repairs and infrastructure maintenance. Eg. Repair of toilet, boundary wall, whitewashing
School Development Grant	For purchasing school and office equipment. Eg. Blackboards, sitting mats, chalks, duster
Teacher Learning Material Grant*	For purchasing teaching aids

* In 2013-14 and 2014-15 Government of India stopped sending money for this grant in most states.

Table 21: Continuous and Comprehensive Evaluation(CCE) in schools 2013-2014

CCE in schools	2013	2014
% Schools which said they have heard of CCE	98.1	98.6
Of the schools which have heard of CCE, % schools which have received materials/manuals		
For all teachers	93.1	94.5
For some teachers	5.0	4.7
For no teachers	1.6	0.5
Don't know	0.4	0.4
Of the schools which have received manual, % schools which could show it	88.7	84.4

Chart 6: School Development Plan (SDP) in schools 2014

% Schools which reported not having an SDP for 2013-14

% Schools which reported having an SDP for 2013-14 but could not show it

% Schools which reported having an SDP for 2013-14 and could show it
