How to read this table: If a child started school in Std I at age 6, she should be age 8 in Std 3. This table shows the age distribution for each class. For example, in Std III, 26.0% children are 8 years old but there are also 9.3% who are 7 years old or younger, 29.5% who are 9, 16.9% who are 10 years old, etc.

Note: In ASER 2011 for every state, reading tools were provided in the main medium of instruction in government schools. In Nagaland, where the medium of instruction is English, children were given the reading tool only in English. For home languages, a list of 122 languages was provided to all survey teams. This included 22 Scheduled languages and 100 Non-Scheduled language. The data in this table is for children for whom we have information for both school language and home language.

Note: In 2007, 2009, 2010 and 2011 the ASER survey recorded information about tuition. In all 4 years, the question asked was the following: "Does the child take any paid additional class currently?" Therefore, these numbers do not include any supplemental help in learning that children may have received from parents, siblings or from anyone else who did not require payment.

The PAISA section of ASER tracks receipt and spending of Sarva Shiksha Abhiyan (SSA) grants at the school level. This information is collected from schools visited during the survey. This page reports proportion of schools receiving the grants and carrying out specified activities in the schools. More detailed analysis of the PAISA data will be available in the PAISA 2011 report which will be released in March 2012.¹
